

Permit No. 917 (File No. P77-4#2) authorizes the Northeast Fisheries Science Center (NMFS) to conduct three projects: 1) aerial and boat surveys, biopsy sampling and photo-identification of various cetacean species during stock assessment research; 2) capture, sample, tag and release pinnipeds during pinniped stock assessment research; and 3) collection of samples from animals of the Orders Cetacea and Pinnipedia [except walrus] for deposit into a scientific collection for research.

The amendment now authorizes the Northeast Fisheries Science Center to extend the permit to December 31, 2000.

Issuance of this amendment, as required by the ESA was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of this permit, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: June 28, 2000.

Chief, Permits Division, Office of Protected Resources, National Marine Fisheries Service.
