

Memorandum, is attached to this notice as an Appendix. Parties can find a complete discussion of all issues raised in this investigation and the corresponding recommendations in this public memorandum, which is on file in the Central Records Unit, room B-099 of the main Department building.

In addition, a complete version of the Decision Memorandum can be accessed directly on the World Wide Web at <http://ia.ita.doc.gov>. The paper copy and electronic version of the Decision Memorandum are identical in content.

Scope of Investigation

The scope of the investigation has been amended since the preliminary determination. For a description of the scope of this investigation, see the "Scope of Investigation" section, as well as item 2 in the "Discussion of the Issues" section, of the Decision Memorandum, which is on file in B-099 and available on the Web at <http://ia.ita.doc.gov>.

Period of Investigation

The period of investigation (POI) is October 1, 1998, through September 30, 1999.

Facts Available

In the preliminary determination, the Department based the dumping margins for the mandatory respondents, SMI and Sanyo Special Tube (Sanyo), on facts otherwise available pursuant to section 776(a)(2)(A) of the Act. For the final determination, the use of facts otherwise available continues to be necessary because the record does not contain company-specific information. Sanyo failed to respond to the Department's questionnaire, nor did it provide any indication that it was unable to do so. SMI responded to the Department's questionnaire, but failed to respond to all of the supplemental questionnaires and subsequently withdrew all of its questionnaire responses from the record. *See Memorandum from Constance Handley to the File, re: Return of Sumitomo Metal Industries Questionnaire Responses*, dated May 12, 2000. Therefore, the Department found that both Sanyo and SMI failed to cooperate by not acting to the best of their ability. As a result, pursuant to section 776(b) of the Act, the Department used an adverse inference in selecting from the facts available. Specifically, the Department assigned to the mandatory respondents the highest margin alleged in the petition. We continue to find this margin corroborated, pursuant to section 776(c) of the Act, for the reasons discussed in the *Preliminary Determination*. No

interested parties have objected to the use of adverse facts available for the mandatory respondents in this investigation, nor to the Department's choice of facts available. In addition, the Department has left the "All Others Rate" unchanged from the preliminary determination.

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we are directing the Customs Service to continue to suspend all entries of circular seamless stainless steel hollow products from Japan, that are entered, or withdrawn from warehouse, for consumption on or after May 1, 2000, the date of publication of our preliminary determination. The Customs Service shall require a cash deposit or bond equal to the dumping margin, as indicated in the chart below. These instructions suspending liquidation will remain in effect until further notice.

Manufacturer/exporter	Margin (percent)
Sanyo Special Tube	156.81
Sumitomo Metal Industries	156.81
All Others	62.14

ITC Notification

In accordance with section 735(d) of the Act, we have notified the International Trade Commission (ITC) of our determination. As our final determination is affirmative, the ITC will, within 45 days, determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing the Customs Service to assess antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

This determination is issued and published pursuant to sections 735(d) and 777(i)(1) of the Act.

Dated: July 5, 2000.

Troy H. Cribb,

Acting Assistant Secretary for Import Administration.

Certain Corrosion-Resistant Carbon Steel Flat Products From Japan: Notice of Initiation of Changed Circumstances Review of the Antidumping Orders and Intent To Revoke Order in Part

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of initiation and preliminary results of changed circumstances antidumping duty review, and intent to revoke order in part.

SUMMARY: In accordance with 19 CFR 351.216(b), Toyo Ink America ("TIA") requested a changed circumstances review of the antidumping order on Certain Corrosion-Resistant Carbon Steel Flat Products from Japan with respect to "doctor blades." Domestic producers of the like product have expressed no interest in continuation of the order with respect to doctor blades. In response to TIA's request, the Department of Commerce ("the Department") is initiating a changed circumstances review and issuing a notice of intent to revoke in part the antidumping duty order on certain corrosion-resistant carbon steel flat products from Japan. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: July 12, 2000.

FOR FURTHER INFORMATION CONTACT: Brandon Farlander or Rick Johnson, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-0182, (202) 482-3818, respectively.

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 ("the Act") by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations as codified at 19 CFR. part 351 (1999).

SUPPLEMENTARY INFORMATION:

Background

On May 23, 2000, TIA requested that the Department revoke in part the antidumping duty order on certain corrosion-resistant carbon steel flat products from Japan. Specifically, TIA requested that the Department revoke the order with respect to imports of doctor blades meeting the following specifications: carbon steel coil or strip, plated with nickel phosphorous, having a thickness of 0.1524 millimeters (0.006 inches), a width between 31.75 millimeters (1.25 inches) and 50.80 millimeters (2.00 inches), a core hardness between 580 to 630 HV, a surface hardness between 900–990 HV; the carbon steel coil or strip consists of the following elements identified in percentage by weight: 0.90% to 1.05% carbon; 0.15% to 0.35% silicon; 0.30% to 0.50% manganese; less than or equal to .03% of phosphorous; less than or equal to .006 percent of sulfur; other elements representing .24%; and the remainder of iron. TIA is an importer of the products in question.

Scope of Review

This review covers flat-rolled carbon steel products, of rectangular shape, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating, in coils (whether or not in successively superimposed layers) and of a width of 0.5 inch or greater, or in straight lengths which, if of a thickness less than 4.75 millimeters, are of a width of 0.5 inch or greater and which measures at least 10 times the thickness or if of a thickness of 4.75 millimeters or more are of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the Harmonized Tariff Schedule of the United States (“HTSUS”) under item numbers 7210.30.0030, 7210.30.0060, 7210.41.0000, 7210.49.0030, 7210.49.0090, 7210.61.0000, 7210.69.0000, 7210.70.6030, 7210.70.6060, 7210.70.6090, 7210.90.1000, 7210.90.6000, 7210.90.9000, 7212.20.0000, 7212.30.1030, 7212.30.1090, 7212.30.3000, 7212.30.5000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7212.60.0000, 7215.90.1000, 7215.90.3000, 7215.90.5000, 7217.20.1500, 7217.30.1530, 7217.30.1560, 7217.90.1000, 7217.90.5030, 7217.90.5060, and 7217.90.5090.

Included are flat-rolled products of non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process (*i.e.*, products which have been worked after rolling)—for example, products which have been beveled or rounded at the edges. Excluded are flat-rolled steel products either plated or coated with tin, lead, chromium, chromium oxides, both tin and lead (“terne plate”), or both chromium and chromium oxides (“tin-free steel”), whether or not painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating. Also excluded are clad products in straight lengths of 0.1875 inch or more in composite thickness and of a width which exceeds 150 millimeters and measures at least twice the thickness. Also excluded are certain clad stainless flat-rolled products, which are three-layered corrosion-resistant carbon steel flat-rolled products less than 4.75 millimeters in composite thickness that consist of a carbon steel flat-rolled product clad on both sides with stainless steel in a 20%–60%–20% ratio. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive of the scope of this review.

Also excluded are certain corrosion-resistant carbon steel flat products meeting the following specifications: (1) Widths ranging from 10 millimeters (0.394 inches) through 100 millimeters (3.94 inches); (2) thicknesses, including coatings, ranging from 0.11 millimeters (0.004 inches) through 0.60 millimeters (0.024 inches); (3) a coating that is from 0.003 millimeters (0.00012 inches) through 0.005 millimeters (0.000196 inches) in thickness and that is comprised of either two evenly applied layers, the first layer consisting of 99% zinc, 0.5% cobalt, and 0.5% molybdenum, followed by a layer consisting of chromate, or three evenly applied layers, the first layer consisting of 99% zinc, 0.5% cobalt, and 0.5% molybdenum followed by a layer consisting of chromate, and finally a layer consisting of silicate; (4) carbon steel flat products measuring 1.84 mm in thickness and 43.6 mm or 16.1 mm in width consisting of carbon steel coil (SAE 1008) clad with an aluminum alloy that is balance aluminum, 20% tin, 1% copper, 0.3% silicon, 0.15% nickel, less than 1% other materials and meeting the requirements of SAE standard 783 for Bearing and Bushing Alloys; and (5) carbon steel flat products measuring 0.97 mm in thickness and 20 mm in width consisting of carbon steel

coil (SAE 1008) with a two-layer lining, the first layer consisting of a copper-lead alloy powder that is balance copper, 9% to 11% tin, 9% to 11% lead, less than 1% zinc, less than 1% other materials and meeting the requirements of SAE standard 792 for Bearing and Bushing Alloys, the second layer consisting of 45% to 55% lead, 38% to 50% PTFE, 3% to 5% molybdenum disulfide and less than 2% other materials.

Initiation of Changed Circumstances Antidumping Duty Administrative Review, and Intent To Revoke Order in Part

Pursuant to sections 751(d)(1) and 782(h)(2) of the Act, the Department may revoke an antidumping or countervailing duty order, in whole or in part, based on a review under section 751(b) of the Act (*i.e.*, a changed circumstances review). Section 751(b)(1) of the Act requires a changed circumstances review to be conducted upon receipt of a request which shows changed circumstances sufficient to warrant a review. Section 351.222(g) of the Department's regulations provides that the Department will conduct a changed circumstances administrative review under 19 CFR 351.216, and may revoke an order (in whole or in part), if it determines that producers accounting for substantially all of the production of the domestic like product have expressed a lack of interest in the relief provided by the order, in whole or in part, or if other changed circumstances sufficient to warrant revocation exist. In addition, in the event that the Department concludes that expedited action is warranted, 19 CFR 351.221(c)(3)(ii) permits the Department to combine the notices of initiation and preliminary results.

In accordance with sections 751(d)(1) and 782(h)(2) of the Act, and 19 CFR 351.216 and 351.222(g), based on affirmative statements by domestic producers of the like product, Bethlehem Steel Corporation; Ispat Inland Steel; LTV Steel Company, Inc.; National Steel Corporation; and U.S. Steel Group, a unit of USX Corporation, of no further interest in continuing the order with respect to certain corrosion-resistant carbon steel flat products described as doctor blades which are specified as carbon steel coil or strip, plated with nickel phosphorous, having a thickness of 0.1524 millimeters (0.006 inches), a width between 31.75 millimeters (1.25 inches) and 50.80 millimeters (2.00 inches), a core hardness between 580 to 630 HV, a surface hardness between 900–990 HV; the carbon steel coil or strip consists of

the following elements identified in percentage by weight: 0.90% to 1.05% carbon; 0.15% to 0.35% silicon; 0.30% to 0.50% manganese; less than or equal to .03% of phosphorous; less than or equal to .006 percent of sulfur; other elements representing .24%; and the remainder of iron, we are initiating this changed circumstances administrative review. Furthermore, we determine that expedited action is warranted, and we preliminarily determine that continued application of the order with respect to certain corrosion-resistant carbon steel flat products falling within the description above is no longer of interest to domestic interested parties. Because we have concluded that expedited action is warranted, we are combining these notices of initiation and preliminary results. Therefore, we are hereby notifying the public of our intent to revoke in part the antidumping duty orders with respect to imports of certain corrosion-resistant carbon steel flat products meeting the above-mentioned specifications from Japan.

If the final revocation in part occurs, we intend to instruct the U.S. Customs Service ("Customs") to liquidate without regard to antidumping duties, as applicable, and to refund any estimated antidumping duties collected for all unliquidated entries of certain corrosion-resistant carbon steel flat products meeting the specifications indicated above, not subject to final results of administrative review as of the date of publication in the **Federal Register** of the final results of this changed circumstances review in accordance with 19 CFR 351.222. We will also instruct Customs to pay interest on such refunds in accordance with section 778 of the Act. The current requirement for a cash deposit of estimated antidumping duties on certain corrosion-resistant carbon steel flat products meeting the above specifications will continue unless and until we publish a final determination to revoke in part.

Public Comment

Interested parties are invited to comment on these preliminary results. Parties who submit argument in this proceeding are requested to submit with the argument (1) a statement of the issue, and (2) a brief summary of the argument. Parties to the proceedings may request a hearing within 14 days of publication. Any hearing, if requested, will be held no later than two days after the deadline for the submission of rebuttal briefs, or the first workday thereafter. Case briefs may be submitted by interested parties not later than 14 days after the date of publication of this

notice. Rebuttal briefs and rebuttals to written comments, limited to the issues raised in those comments, may be filed not later than five days after the deadline for submission of case briefs. All written comments shall be submitted in accordance with 19 CFR 351.303 and shall be served on all interested parties on the Department's service list in accordance with 19 CFR 351.303. Persons interested in attending the hearing should contact the Department for the date and time of the hearing.

The Department will publish the final results of this changed circumstances review, including the results of its analysis of issues raised in any written comments. This notice is published in accordance with sections 751(b)(1) of the Act and 19 CFR 351.216 and 351.222.

Dated: July 6, 2000.

Troy H. Cribb,

Acting Assistant Secretary for Import Administration.

Mechanical Transfer Presses From Japan: Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of Final Results and Partial Recission of the Antidumping Duty Administrative Review of Mechanical Transfer Presses From Japan.

SUMMARY: On March 6, 2000, the Department of Commerce (the Department) published the preliminary results of its administrative review of the antidumping duty order on mechanical transfer presses (MTPs) from Japan. This review covers one manufacturer/exporter of MTPs during the period February 1, 1998 through January 31, 1999. We gave interested parties an opportunity to comment on our preliminary results.

Based on our analysis of the comments received, we have made certain changes in these margin calculations. Therefore, the final results differ from the preliminary results. The final weighted-average dumping margin for the reviewed firm is listed below in the section entitled "Final Results of Review."

EFFECTIVE DATE: July 12, 2000.

FOR FURTHER INFORMATION CONTACT:

Michael Strollo at (202) 482-5255 or Maureen Flannery at (202) 482-3020, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Applicable Statute

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the provisions codified at 19 CFR part 351 (1999).

Background

On March 6, 2000, the Department published the preliminary results of administrative review of the antidumping duty order on MTPs from Japan (65 FR 11764). We invited parties to comment on our preliminary results of review. We received comments from respondent, Komatsu, Ltd. (Komatsu). The Department has now completed this administrative review in accordance with section 751 of the Act.

Final Recission in Part of Antidumping Administrative Review

On April 12, 1999, we received a letter from Hitachi Zosen indicating that there were no entries of subject merchandise during the period of review (POR). On June 28, 1999, the petitioner withdrew its request for an administrative review with respect to Ishikawajima Harima Heavy Industries (IHI). On August 25, 1999, we requested that the U.S. Customs Service (Customs) contact us if they were suspending liquidation of entries of the subject merchandise during the period of review from Hitachi Zosen Corporation (Hitachi Zosen). We have received no such response. Therefore, we conclude that there have been no entries of subject merchandise made by Hitachi Zosen during the POR, and, thus, are rescinding the review with respect to Hitachi Zosen and IHI. *See Mechanical Transfer Presses from Japan: Preliminary Results and Recission in Part of Antidumping Duty Administrative Review*, March 6, 2000 (65 FR 11764).

Scope of Review

Imports covered by this review include MTPs currently classifiable under Harmonized Tariff Schedule
