[Airspace Docket No. 00-ASO-26]

Proposed Amendment to Class D Airspace, Melbourne, FL**AGENCY:** Federal Aviation Administration (FAA), DOT.**ACTION:** Notice of proposed rulemaking.

SUMMARY: This action proposes to amend Class D airspace at Melbourne International Airport, FL, by lowering the airspace ceiling from 2,500 feet above ground level (AGL) to 1,900 feet AGL. Due to the high number of overflying aircraft, in the interest of safety the airspace above 1,900 AGL has been delegated by the Melbourne Air Traffic Control Tower, which provides Visual Flight Rules (VFR) service to aircraft operating in the vicinity of the Melbourne International Airport, to the Daytona Beach Radar Approach Control Facility, which provides Instrument Flight Rules (IFR) air traffic control service to the Melbourne International Airport. This proposed action will also change the name of the airport in the legal description from Melbourne Regional to Melbourne International Airport.

DATES: Comments must be received on or before August 14, 2000.

The Proposal

The FAA is considering an amendment to part 17 of the Federal Aviation Regulations (14 CFR part 71) to amend Class D airspace at Melbourne International Airport, FL, by lowering the airspace ceiling from 2,500 AGL to 1,900 feet AGL and changing the airport name in the legal description from Melbourne Regional to Melbourne International Airport. Class D airspace designations are published in Paragraph 5000 of FAA Order 7400.9G, dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designations listed in this comment would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical

regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
