

Safety-Kleen's waste contains other waste codes (e.g., D004) that contribute to the total arsenic concentration of the waste. Therefore, it is not physically possible for Safety-Kleen to treat the waste to the K088 treatment standard of 26.1 mg/kg total arsenic. Instead, we are proposing that the 2850 cubic yards of waste comply with an alternative treatment standard for arsenic of 5.0 mg/L. This is, of course, the current universal treatment standard (UTS) for arsenic that would otherwise apply to this waste were it not for the K088 waste code carry through. After treatment, the waste is to be disposed in Safety-Kleen's North landfill, which is a RCRA permitted hazardous waste landfill.

B. Alternative Standard for Total Dithiocarbamates

For the 500 cubic yards of the waste that cannot meet the total dithiocarbamate treatment standard of 28 mg/kg developed for K161, P196, and P205, we are proposing to allow Safety-Kleen to dispose of the 500 cubic yards without further treatment for several reasons. First, any K161, P196, and P205 waste being handled by Safety-Kleen at Deer Park has already been incinerated. This satisfies the applicable regulatory requirements regarding this waste, and incineration is the best, demonstrated, and available treatment technology for these wastes and the types of regulated dithiocarbamates in them.

Second, the only reason why dithiocarbamates is an issue for these wastes is that the testing for compliance with the K161, P196, and P205 treatment standards occurs on treatment residuals sampled downstream of the scrubber water precipitation process. Non-regulated dithiocarbamate product added at that point presumably is the vast majority of any detectable dithiocarbamate, since at least 99.99% of any dithiocarbamate residing in the K161, P196, and P205 waste would be expected to have been destroyed in the combustion chamber.

Third, the dithiocarbamate issue only arises for this 500 cubic yards of waste because of an independent change in EPA regulations. Prior to March 4, 1999, the treatment standard for total dithiocarbamates in nonwastewaters was a specified method of treatment: CMBST, or combustion.³ On March 4,

1999, we revised the treatment standards for seven carbamate waste constituents so that they are now expressed as both numerical limits as well as specified technologies; removed all treatment standards for one additional waste constituent; and reinstated numerical treatment standards for 32 other carbamate waste constituents. (See 63 FR 47409).

Safety-Kleen was aware of the potential treatment problems that this reinstatement of the numerical treatment standards for total dithiocarbamates would cause, namely that the downstream residual testing of its incinerator treatment residuals would pick up non-regulated dithiocarbamates in addition to any trace amounts of regulated dithiocarbamates. On its part, Safety-Kleen instituted timely measures to avoid these problems. Starting on August 12, 1998, Safety-Kleen stopped accepting waste carrying EPA codes K161, P196, and P205. The facility's plan was to incinerate all of the dithiocarbamates waste in its inventory and landfill the residues prior to the effective date of our institution of numerical, concentration standards for total dithiocarbamates, i.e., March 4, 1999. However, this solution was compromised when EPA changed the TCLP-based arsenic K088 treatment standard to 26.1 mg/kg total arsenic on September 21, 1998. The 500 cubic yards of waste with the dithiocarbamate problem also carry the K088 waste code, fail the total arsenic standard for reasons addressed earlier, and therefore could not be landfilled prior to the March 4, 1999 target date for Safety-Kleen. EPA was not fully aware, at that time, about this linkage and the unforeseen consequence of changing the arsenic treatment standard for K088 on August 12, 1998, some seven months earlier than the revised dithiocarbamate standards went into effect—a date on which Safety-Kleen's disposal plans hinged.

one-year period. These alternative standards provided waste handlers a choice of meeting the original Phase III numerical concentration limits or of using a specified treatment technology (combustion for nonwastewaters; combustion, biodegradation, chemical oxidation, or carbon adsorption for wastewaters). The laboratory standards were still unavailable at the end of the one year, so we extended the alternative treatment standards for one additional year until August 26, 1998 (62 FR 45568, August 28, 1998). A September 4, 1998 final rule resolved the issue by revising the treatment standards for seven carbamate waste constituents so that they are now expressed as both numerical limits as well as specified technologies; removing all treatment standards for one additional waste constituent; and reinstating numerical treatment standards for 32 other carbamate waste constituents (see 63 FR 47409; effective on March 4, 1999).

We are therefore proposing to better harmonize the impacts of the two independent treatment standard changes that impact the 500 yards of Safety-Kleen's waste now being stored. Our avenue for relief is to propose to allow the 500 cubic yards of dithiocarbamate contaminated waste to be disposed without further treatment for the reasons discussed above. Our treatment objectives have already been achieved for K161, P196, and P205. Safety-Kleen has treated these wastes by the specified method of combustion and the regulated dithiocarbamates have been addressed in a manner that protects human health and the environment. Also, in light of Safety-Kleen's good faith effort to effectively treat and legally dispose of these wastes prior to March 4, 1999, we deem it appropriate to grant relief from the unintended consequences of our independent action to revise the K088 arsenic standard.

C. Conditions of the Proposed Variance

In summary, if we grant this one-time treatment variance, the approximately 2850 cubic yards of incinerator residues currently stored at Safety-Kleen's Deer Park facility would be subject to an alternative arsenic treatment standard of 5.0 mg/L. Furthermore, the 500 cubic yards of the waste that do not currently meet the total dithiocarbamates treatment standard of 28 mg/kg can be disposed at their current concentrations (which can be as high as 132 mg/kg) without further treatment. Finally, the waste would have to be disposed in Safety-Kleen's on-site Subtitle C landfill assuming it meets all other applicable federal, state, and local requirements.

Dated: July 20, 2000.

Timothy Fields, Jr.,

Assistant Administrator, Office of Solid Waste and Emergency Response.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30497; FRL-6595-8]

Pesticide Products; Registration Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of an application to register a pesticide product involving a changed use pattern pursuant to the provisions of section 3(c)(4) of the Federal Insecticide,

³ After promulgation of the Phase III rule on April 8, 1996 (but before the effective date of July 8, 1996) several companies reported that laboratory standards were not available for some of the carbamate waste constituents. After confirming this assertion, we promulgated an emergency final rule on August 26, 1996 (61 FR 43924) in which we established temporary alternative treatment standards for 40 carbamate waste constituents for a

Fungicide, and Rodenticide Act (FIFRA), as amended.

DATES: Written comments, identified by the docket control number OPP-30497, must be received on or before August 25, 2000.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the

SUPPLEMENTARY INFORMATION. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP-30497 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: Suku Oonnithan, Regulatory Action Leader, Registration Division (7505C), Office of Pesticide Programs Environmental Protection Agency, 1200 Pennsylvania Ave, NW., Washington, DC 20460-0001; telephone: 703-605-0368; e-mail address: oonnithan.suku@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Cat-egories	NAICS codes	Examples of potentially affected entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at <http://www.epa.gov/>. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "Federal Register—Environmental Documents." You can also go directly to the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>.

2. *In person.* The Agency has established an official record for this action under docket control number OPP-30497. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP-30497 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services

Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: "opp-docket@epa.gov," or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in WordPerfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number OPP-30497. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI that I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.

6. Offer alternative ways to improve the registration activity.

7. Make sure to submit your comments by the deadline in this notice.

8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. Registration Application

EPA received an application as follows to register a pesticide product containing active ingredients not included in any previously registered products pursuant to the provision of section 3(c)(4) of FIFRA. Notice of receipt of the application does not imply a decision by the Agency on the application.

Product Containing the Active Ingredient (Phosphine) Involving a Changed Use Pattern

EPA Reg. No. 68387-7. Applicant: CYTEC Industries, Inc., West Patterson, NJ 07424. Product name: ECO2FUME Fumigant Gas. Insecticide. Active Ingredients: Phosphine at 2% and carbon dioxide at 98%. Classification: Restricted use. Proposed change: To include in its presently registered non-food use; new uses: as a fumigant against insect pests of raw agricultural commodities, packaged processed food, and feed commodities.

List of Subjects

Environmental protection, Pesticides and pest.

Dated: July 12, 2000.

James Jones,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-F

ENVIRONMENTAL PROTECTION AGENCY

[OPP-34216A; FRL-6737-3]

Organophosphate Pesticide; Availability of Revised Risk Assessments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of the revised risk assessments and related documents for one organophosphate pesticide, phosalone. In addition, this notice starts a 60-day public participation period

during which the public is encouraged to submit risk management ideas or proposals. These actions are in response to a joint initiative between EPA and the Department of Agriculture (USDA) to increase transparency in the tolerance reassessment process for organophosphate pesticides.

DATES: Comments, identified by docket control number OPP-34216A, must be received by EPA on or before September 25, 2000.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit III. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP-34216A in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: Karen Angulo, Special Review and Reregistration Division (7508C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308-8004; e-mail address: angulo.karen@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Does this Action Apply to Me?

This action is directed to the public in general, nevertheless, a wide range of stakeholders will be interested in obtaining the revised risk assessments and submitting risk management comments on phosalone, including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the use of pesticides on food. As such, the Agency has not attempted to specifically describe all the entities potentially affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

II. How Can I Get Additional Information, Including Copies of this Document or Other Related Documents?

A. Electronically. You may obtain electronic copies of this document and other related documents from the EPA Internet Home Page at <http://www.epa.gov/>. To access this document, on the Home Page select "Laws and Regulations" "Regulations and Proposed Rules" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>.

To access information about organophosphate pesticides and obtain electronic copies of the revised risk assessments and related documents mentioned in this notice, you can also go directly to the Home Page for the Office of Pesticide Programs (OPP) at <http://www.epa.gov/pesticides/op/>.

B. In person. The Agency has established an official record for this action under docket control number OPP-34216A. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as CBI. This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

III. How Can I Respond to this Action?

A. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP-34216A in the subject line on the first page of your response.

1. By mail. Submit comments to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. In person or by courier. Deliver comments to: Public Information and Records Integrity Branch, Information Resources and Services Division, Office of Pesticide Programs, Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

3. Electronically. Submit electronic comments by e-mail to: opp-
