#### General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

## NUCLEAR REGULATORY COMMISSION

### Public Workshop To Discuss Current Issues Associated With the Decommissioning of Nuclear Facilities

**AGENCY:** Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of a public workshop to discuss current issues associated with the decommissioning of nuclear facilities.

**SUMMARY:** This notice announces a Public Workshop to discuss current issues associated with the decommissioning of nuclear facilities. The goal of the workshop will be to provide a forum for NRC staff to discuss, with nuclear industry and other interested stakeholders, NRC's process, and guidance, for developing and evaluating decommissioning plans (DPs) and license termination plans (LTPs), current issues associated with the decommissioning of nuclear facilities and to identify areas and strategies for improving the decommissioning process.

**SUPPLEMENTAL INFORMATION:** On July 21, 1997, the U.S. Nuclear Regulatory Commission (NRC) published the final rule on Radiological Criteria for License Termination (the License Termination Rule or LTR) as Subpart E to 10 CFR Part 20. NRC regulations require that materials licensees submit DPs to support the decommissioning of its facility if it is required by license condition, or if the procedures and activities necessary to carry out the decommissioning have not been approved by NRC and these procedures could increase the potential health and safety impacts to the workers or the public. NRC regulations also require that reactor licensees submit Post-shutdown Decommissioning Activities Reports and LTPs to support the decommissioning of nuclear power facilities.

Since the promulgation of the LTR, NRC staff has been developing guidance to assist both regulators and the regulated community in complying with the LTR. To facilitate early and continuing input from the regulated community and other stakeholders on this guidance, NRC held several workshops in 1998, 1999, and in 2000 on various technical issues associated with the decommissioning of nuclear facilities. As part of our continuing efforts to involve the regulated community and other stakeholders in our decommissioning program, we will hold a workshop November 8-9, 2000, at the Commission's Headquarters
