SUPPLEMENTARY INFORMATION: The purpose of the Secretary of Energy

The Panel will focus on the evaluation of emerging non-incineration technologies for the treatment of low-level, alpha low-level and transuranic wastes containing polychlorinated biphenyls (PCBs) and other hazardous constituents. Waste categories to be addressed include inorganic homogeneous solids, organic homogeneous solids, and soils. The Panel will also evaluate whether the emerging non-incineration technologies could be implemented in a manner that would allow the Department of Energy to comply with all legal requirements, including those contained in the Settlement Agreement and Consent Order signed by the State of Idaho, Department of Energy, and the U.S. Navy in October 1995.

Tentative Agenda

The agenda for the August 22-24 meeting has not been finalized. DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Docket No. CP00-425-00]

Dominion Transmission, Inc. (formerly CNG Transmission Corp.); Notice of Request Under Blanket Authorization

August 8, 2000.

Take notice that on August 1, 2000, Dominion Transmission, Inc. (DTI), formerly CNG Transmission Corporation, 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP00-425-000 a request pursuant to Sections 157.205 and 157.208 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.208) for authorization to uprate the maximum

allowable operating pressure (MAOP) of twenty-eight (28) natural gas storage pipelines at the Oakland Storage Complex, located in Westmoreland County, Pennsylvania, under DTI's blanket certificate issued in Docket No. CP82-537-000, pursuant to Section 7(c) of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection. This filing may be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance).

DTI proposes to uprate the MAOP of twenty-eight (28) natural gas storage pipelines in the southern portion of the Murrysville Storage Pool of the Oakland Storage Complex, located in Westmoreland County, Pennsylvania. DTI states that the pipelines they propose to uprate are currently used to withdraw gas from the southern portion of the Murrysville Storage Pool for either recycling of gas to the higher pressure northern portion of the Murraysville Storage Pool or for delivery to DTI's customers or DTI's partner at the Oakland Storage Complex, Texas Eastern Transmission Corporation.

DTI proposes to uprate this segment of the system in order to prevent the pipeline system from exceeding the certificated MAOP in the event of the South Oakford Station going off line. DTI declares that it has employed a temporary solution to this situation by requiring field personnel to shut down in a portion of the storage pipeline
