

imperative that you identify docket control number OPP-34203C in the subject line on the first page of your response.

1. *By mail.* Submit comments to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver comments to: Public Information and Records Integrity Branch, Information Resources and Services Division, Office of Pesticide Programs, Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

3. *Electronically.* Submit electronic comments by e-mail to: "opp-docket@epa.gov," or you can submit a computer disk as described in this unit. Do not submit any information electronically that you consider to be CBI. Electronic comments must be submitted as an ASCII file, avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on standard computer disks in WordPerfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by the docket control number OPP-34203C. Electronic comments may also be filed online at many Federal Depository Libraries.

B. How Should I Handle CBI Information that I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

IV. What Action is EPA Taking in this Notice?

EPA is making available for public viewing the revised risk assessments and related documents for one organophosphate pesticide, chlorpyrifos. These documents have been developed as part of the pilot public participation process that EPA and USDA are now using for involving the public in the reassessment of pesticide tolerances under the Food Quality Protection Act (FQPA), and the reregistration of individual organophosphate pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The pilot public participation process was developed as part of the EPA-USDA Tolerance Reassessment Advisory Committee (TRAC), which was established in April 1998, as a subcommittee under the auspices of EPA's National Advisory Council for Environmental Policy and Technology. A goal of the pilot public participation process is to find a more effective way for the public to participate at critical junctures in the Agency's development of organophosphate risk assessments and risk management decisions. EPA and USDA began implementing this pilot process in August 1998, to increase transparency and opportunities for stakeholder consultation. The documents being released to the public through this notice provide information on the revisions that were made to the chlorpyrifos preliminary risk assessments, which was released to the public October 27, 1999 (64 FR 57876) (FRL-6389-3) through a notice in the **Federal Register**.

In addition, this notice starts a 60-day public participation period during which the public is encouraged to submit risk management proposals or otherwise comment on risk management for chlorpyrifos. The Agency is providing an opportunity, through this notice, for interested parties to provide written risk management proposals or ideas to the Agency on the chemical specified in this notice. Such comments and proposals could address ideas about how to manage dietary, occupational, or ecological risks on specific chlorpyrifos use sites or crops across the United States or in a particular geographic region of the country. To address dietary risk, for example, commenters may choose to discuss the feasibility of lower application rates, increasing the time interval between application and harvest ("pre-harvest intervals"), modifications in use, or suggest alternative measures to reduce residues contributing to dietary exposure. For

occupational risks, commenters may suggest personal protective equipment or technologies to reduce exposure to workers and pesticide handlers. For ecological risks, commenters may suggest ways to reduce environmental exposure, e.g., exposure to birds, fish, mammals, and other non-target organisms. EPA will provide other opportunities for public participation and comment on issues associated with the organophosphate tolerance reassessment program. Failure to participate or comment as part of this opportunity will in no way prejudice or limit a commenter's opportunity to participate fully in later notice and comment processes. All comments and proposals must be received by EPA on or before October 16, 2000 at the addresses given under the **ADDRESSES** section. Comments and proposals will become part of the Agency record for the organophosphates specified in this notice.

List of Subjects

Environmental protection, Chemicals, Pesticides and pests.

Dated: August 8, 2000.

Jack E. Housenger,

Acting Director, Special Review and Reregistration Division, Office of Pesticide Programs.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-6852-4]

Regulatory Reinvention (XLC) Pilot Projects; Project XLC Phase I (Planning) Project Agreement: Clermont County, OH.

AGENCY: Environmental Protection Agency.

ACTION: Notice of Project XLC Phase I (Planning) Project Agreement.

SUMMARY: EPA is requesting comments on a proposed Project XLC Phase I (Planning) Project Agreement (PA) for Clermont County (hereafter "Clermont"). The PA is a voluntary agreement developed collaboratively by Clermont, the Ohio Environmental Protection Agency (OEPA), and EPA. Project XLC, announced in the Federal Register on November 1, 1995, (60 FR 55569), gives regulated sources the flexibility to develop alternative strategies that will replace or modify specific regulatory requirements on the condition that they produce greater environmental benefits.

Clermont County is one of the fastest developing counties in Ohio, located just east of Cincinnati. The County is experiencing significant changes in population density and rural demographics. The Clermont County XLC Project focuses on the East Fork of the Little Miami River (EFLMR) watershed. The specific waters within the County considered under this Agreement include the EFLMR mainstream and tributaries, and Harsha Lake, which is located centrally within the EFLMR basin. The EFLMR is a major tributary to the Little Miami River, which is a designated State and National Scenic River and is the State of Ohio's largest Exceptional Warmwater Habitat stream.

Clermont County proposes a comprehensive watershed management plan for the EFLMR. The major goal of this watershed plan is to address environmental management of its resources with an aggressive and innovative approach so that it can maintain a balance between economic growth and the preservation of its rural character and environment, and where possible strive to improve the environment and protection of the area's natural resources. The County will work in partnership with the Ohio Environmental Protection Agency (OEPA) and EPA to design and implement a plan to maintain and improve water quality, land use and economic development in the County. The development of this watershed plan will empower the local community to work with the County to review current water quality standards and establish meaningful measures of environmental conditions that are based on the specific characteristics of the EFLMR and its tributaries. Once the water quality goals are established for the watershed, the primary responsibility for achieving those goals will be at the local level. The command and control regulatory framework will be replaced with a collaborative goal setting approach. As part of the watershed management plan, Clermont County will develop a sampling and monitoring program, and a County Environmental Protection Plan that will enable the County to compile data on existing watershed environmental conditions. New findings from the sampling program pertaining to the chemical and biological characteristics of the EFLMR will be used in computer-based simulations to make predictions regarding point and non-point source pollution. The plan will also use the information to identify which policy and capital changes regarding the land management policies

must be made in order to attain the County's water quality goals in the watershed. In addition, the County anticipates using an effluent trading system in which pollution credits may be exchanged among point and non-point sources.

No regulatory flexibility is needed for the initial planning phase of this Project. More specific details regarding regulatory flexibility will be identified in the development of subsequent phases that will implement the planning developed during the initial phase. This multi-phased approach is expected to achieve superior environmental performance through greater local responsibility and management of point and nonpoint sources. The Project is comprehensive in scope and will include development issues closely tied to water quality such as land use, development procedures, open space and farmland preservation, and economic development. Most importantly, the County is being proactive-investing in watershed management controls not currently regulated by the National Pollutant Discharge Elimination System permits and much sooner than would otherwise be required under a waste load allocation and Total Maximum Daily Loads developed by OEPA. Because the watershed is rapidly developing and degraded water quality is expected if existing regulations and practices are continued, the baseline for this proactive approach to superior environmental performance is defined as no adverse trends in water quality indicators.

DATES: The period for submission of comments ends on August 30, 2000.

ADDRESSES: All comments on the proposed Phase I (Planning) Project Agreement should be sent to: Mr. Christopher Murphy, US EPA, Region 5 Water Division (WA-16J), 77 West Jackson Boulevard, Chicago, IL 60604, or Ms. Lisa Reiter US EPA, Ariel Rios Building, Mail Code 1802, 1200 Pennsylvania Avenue, NW, Washington, D.C. 20460. Comments may also be faxed to Christopher Murphy (312) 886-0168 or Lisa Reiter (202) 260-3125. Comments may also be received via electronic mail sent to: murphy.christopher@epa.gov or reiter.lisa@epa.gov.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the Project Fact Sheet or the proposed Phase I (Planning) Project Agreement, contact: Christopher Murphy, US EPA, Region 5 Water Division (WA-16J), 77 West Jackson Boulevard, Chicago, IL 60604, or Ms. Lisa Reiter, US EPA, Ariel Rios

Building, Mail Code 1802, 1200 Pennsylvania Avenue, NW, Washington, D.C. 20460. The PA and related documents are also available via the Internet at the following location: <http://www.epa.gov/ProjectXL>. In addition, a hard copy of the proposed PA will be available at Clermont County's Office of Environmental Quality, Clermont County, 2379 Clermont Center Drive, Batavia, OH 45103—contact Paul Braasch, Clermont County Project XLC Coordinator for a copy: (513) 732-7745.

Questions to EPA regarding the documents can be directed to Christopher Murphy at (312) 886-0172 or Lisa Reiter at (202) 260-9041. To be included on the Clermont County Project XLC mailing list about future public meetings, XLC progress reports and other mailings from Clermont County on the XLC project, contact Paul Braasch, Clermont County Project XLC Coordinator, Office of Environmental Quality, Clermont County, 2379 Clermont Center Drive, Batavia, OH 45103. For information on all other aspects of the XLC Program, contact Christopher Knopes at the following address: Office of Environmental Policy Innovation, US EPA, Mail Code 1802, Ariel Rios Building, 1200 Pennsylvania Avenue, NW, Washington, D.C. 20460. Additional information on Project XLC, including documents referenced in this notice, other EPA policy documents related to Project XLC, Regional XLC contacts, application information, and descriptions of existing XLC projects and proposals, is available via the Internet at <http://www.epa.gov/ProjectXL>.

Dated: August 10, 2000.

Elizabeth A. Shaw,

Director, Office of Environmental Policy and Innovation.

Public Water System Supervision Program Revision for the State of South Dakota

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The State of South Dakota has revised its Public Water System Supervision (PWSS) primacy program by changing its definition of "public water system" and adding administrative penalty authority.
