[Docket No. NHTSA-98-4807]

RIN 2127-AH72

Federal Motor Vehicle Safety Standards; Compressed Natural Gas Fuel Containers

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Final rule, correcting amendment; Response to Petitions for Reconsideration.

SUMMARY: On December 3, 1998, we published a final rule that deleted the material and manufacturing process requirements in the Federal motor vehicle safety standard on compressed natural gas fuel containers. As part of this final rule, we amended the provisions relating to the hydrostatic burst test to remove any reference to the deleted requirements. Those amendments also inadvertently amended the hydrostatic burst test requirement to require the stress ratio to be applied as a pressure ratio. This document corrects that error, and thereby moots requests related to that amendment in several petitions for reconsideration of the 1998 final rule.

This document also denies the request in a petition for reconsideration from Lincoln Composites, Inc., to link the deletion of the material and manufacturing process requirements with the addition of new performance tests to the standard.

DATES: This final rule is effective August 25, 2000. Petitions for reconsideration must be received by October 10, 2000.

ADDRESSES: Petitions should refer to the docket number of this rule and be submitted to: Administrator, National Highway Traffic Safety Administration, 400 7th Street, SW, Washington, DC 20590.
