

(LBP) debris from residential housing units to be disposed of as household waste. Disposing of LBP debris as a household waste will reduce the cost of lead abatements in residential housing. As part of this project, LSB has pledged to utilize the cost savings made available through implementation of this XL project to perform approximately 12 additional residential lead abatements that will reduce lead exposure risks for roughly 30 children in Boston's Dorchester and Roxbury neighborhoods.

These additional residential abatements will be pursued according to HUD procedures. The HWE provisions utilized by LSB in this project will also be made available on a nationwide basis to any individual or contractor performing lead abatement activities in residential housing units—ultimately sparing thousands of children from lead poisoning.
