

(iii) The State animal health officials for the sending and receiving States, and any other State employees designated by the State animal health officials.

(5) The receiving premises must not commingle swine received from different premises in a manner that prevents identification of the premises that sent the swine or groups of swine. This may be achieved by use of permanent premises or individual identification marks on animals, by keeping groups of animals received from one premises physically separate from animals received from other premises, or by any other effective means.

(6) Each premises must maintain, for 3 years after their date of creation, records that will allow an APHIS representative or State animal health official to trace any animal on the premises back to its earlier premises and its herd of origin, and must maintain copies of each swine production health plan signed by the producer, all interstate swine movement reports issued by the producer, and all reports the swine production system accredited veterinarian(s) issue documenting the health status of the swine on the premises.

(7) Each premises must allow APHIS representatives and State animal health officials access to the premises upon request to inspect animals and review records.

(i) *Cancellation of and withdrawal from a swine production health plan.* The following procedures apply to cancellation of, or withdrawal from, a swine production health plan:

(1) A State animal health official may cancel his or her State's participation in a swine production health plan by giving written notice to all swine producers, APHIS representatives, accredited veterinarians, and other State animal health officials listed in the plan. Withdrawal shall be effective upon the date specified by the State animal health official in the notice, but for shipments in transit, withdrawal shall become effective 7 days after the date of such notice. Upon withdrawal of a State, the swine production health plan shall continue to operate among the other States and parties signatory to the plan.

(2) A swine production system may cancel a swine production health plan, or withdraw one or more of its premises from participation in the plan, upon giving written notice to the Administrator and to the accredited veterinarians and State animal health officials listed in the plan. Withdrawal shall be effective upon the date specified by the swine production system in the written notice, but for shipments in transit withdrawal shall

become effective 7 days after the date of such notice.

(3) The Administrator may cancel a swine production health plan by giving written notice to all swine producers, accredited veterinarians, and State animal health officials listed in the plan. The Administrator shall cancel a swine production health plan after determining that swine movements within the swine production system have occurred that were not in compliance with the swine production health plan or with other requirements of this chapter. Before a swine health production plan is canceled, an APHIS representative will inform a representative of the swine production system of the reasons for the proposed cancellation. The swine production system may appeal the proposed cancellation in writing to the Administrator within 10 days after being informed of the reasons for the proposed cancellation. The appeal must include all of the facts and reasons upon which the swine production system relies to show that the reasons for the proposed cancellation are incorrect or do not support the cancellation. The Administrator will grant or deny the appeal in writing as promptly as circumstances permit, stating the reason for his or her decision. If there is a conflict as to any material fact, a hearing will be held to resolve the conflict. Rules of practice concerning the hearing will be adopted by the Administrator. However, cancellation of the disputed swine production health plan shall become effective pending final determination in the proceeding if the Administrator determines that such action is necessary to protect the public's health, interest, or safety. Such cancellation shall become effective upon oral or written notification, whichever is earlier, to the swine production system representative. In the event of oral notification, written confirmation shall be given as promptly as circumstances allow. This cancellation shall continue in effect pending the completion of the proceeding, and any judicial review thereof, unless otherwise ordered by the Administrator.

PART 85—PSEUDORABIES

1. The authority citation for part 85 would be revised to read as follows:

Authority: 21 U.S.C. 111, 112, 113, 115, 117, 120, 121, 123–126, 134b, and 134f; 7 CFR 2.22, 2.80, and 371.4.

§ 85.7 [Amended]

2. Section 85.7 would be amended as follows:

a. In paragraph (b)(3)(i) introductory text, by removing the phrase “The swine” and adding in its place the phrase “Unless the swine are moving interstate in a swine production system in compliance with § 71.19(h) of this chapter, the swine”.

b. In paragraph (b)(3)(ii), by removing the phrase “The swine are accompanied by a certificate” and adding in its place the phrase “Unless the swine are moving interstate in a swine production system in compliance with § 71.19(h) of this chapter, the swine are accompanied by a certificate”.

c. In paragraph (c)(1), by removing the phrase “The swine are accompanied by a certificate” and adding in its place the phrase “Unless the swine are moving interstate in a swine production system in compliance with § 71.19(h) of this chapter, the swine are accompanied by a certificate”.

3. Section 85.8 would be amended by removing the period at the end of paragraph (a)(3) and adding in its place “; or”; and by adding a new paragraph (a)(4) to read as follows:

§ 85.8 Interstate movement of swine from a qualified negative gene-altered vaccinated herd.

(a) * * *

(4) The swine are moved interstate in a swine production system in compliance with § 71.19(h) of this chapter.

* * * * *

Done in Washington, DC, this 14th day of September 2000.

Bobby R. Acord,

Acting, Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 00–24132 Filed 9–20–00; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 99–CE–88–AD]

RIN 2120–AA64

Airworthiness Directives; DG Flugzeugbau GmbH Models DG–500 Elan Series, DG–500M, and DG–500MB Sailplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to certain DG Flugzeugbau (DG Flugzeugbau) GmbH

Models DG-500 Elan Series, DG-500M, and DG-500MB sailplanes. The proposed AD would require you to visually inspect the elevator control system for proper movement, obtain and incorporate a repair scheme if improper movement is found, and modify and install resin thickened cottonflock reinforcements to the elevator control system as a way to increase the stiffness of the elevator control support stand. The proposed AD is the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for the Federal Republic of Germany. The actions specified by the proposed AD are intended to detect and correct improper movement in the elevator control system and to increase the stiffness of the elevator control support stand. Without accomplishing these actions, the pilot's capability to use full elevator control deflection could be limited, which could require increased force in moving the elevator control with a consequent potentially uncontrolled flight condition.

DATES: The Federal Aviation Administration (FAA) must receive any comments on this proposed rule on or before October 9, 2000.

ADDRESSES: Submit comments in triplicate to FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 99-CE-88-AD, 901 Locust, Room 506, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from DG Flugzeugbau GmbH, Postbox 41 20, D-76646 Bruchsal, Federal Republic of Germany; telephone: +49 7257-890; facsimile: +49 7257-8922. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mike Kiesov, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4144; facsimile: (816) 329-4090.

SUPPLEMENTARY INFORMATION:

Comments Invited

How Do I Comment on the Proposed AD?

The FAA invites comments on this proposed rule. You may submit whatever written data, views, or arguments you choose. You need to include the rule's docket number and submit your comments in triplicate to the address specified under the caption

ADDRESSES. The FAA will consider all comments received on or before the closing date. We may amend the proposed rule in light of comments received. Factual information that supports your ideas and suggestions is extremely helpful in evaluating the effectiveness of the proposed AD action and determining whether we need to take additional rulemaking action.

Are There any Specific Portions of the Proposed AD I Should pay Attention to?

The FAA specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of the proposed rule that might suggest a need to modify the rule. You may examine all comments we receive before and after the closing date of the rule in the Rules Docket. We will file a report in the Rules Docket that summarizes each FAA contact with the public that concerns the substantive parts of the proposed AD.

We are re-examining the writing style we currently use in regulatory documents, in response to the Presidential memorandum of June 1, 1998. That memorandum requires federal agencies to communicate more clearly with the public. We are interested in your comments on whether the style of this document is clearer, and any other suggestions you might have to improve the clarity of FAA communications that affect you. You can get more information about the Presidential memorandum and the plain language initiative at <http://www.plainlanguage.gov>.

How Can I Be Sure FAA Receives My Comment?

If you want us to acknowledge the receipt of your comments, you must include a self-addressed, stamped postcard. On the postcard, write "Comments to Docket No. 99-CE-88-AD." We will date stamp and mail the postcard back to you.

Discussion

What Events Have Caused This Proposed AD?

The Luftfahrt-Bundesamt (LBA), which is the airworthiness authority for the Federal Republic of Germany, recently notified FAA that an unsafe condition may exist on certain DG Flugzeugbau GmbH Models DG-500 Elan Series, DG-500M, and DG-500MB sailplanes. The LBA reports an incident where a Model DG-500 sailplane experienced notably higher elevator control stiffness during an aerobatic flight. This situation was the result of the outer aluminum tube moving and

slipping within the elevator control support stand.

What Are the Consequences If the Condition Is Not Corrected?

If the elevator control support stand permits the outer aluminum tube to move, the pilot's capability to use full elevator control deflection could be limited, which could require increased force in moving the elevator control. This could lead to an uncontrolled flight condition.

Relevant Service Information

Is There Service Information That Applies to This Subject?

DG Flugzeugbau has issued Technical Note (TN) No. 348/12 and 843/12, dated October 6, 1999.

What Are the Provisions of This Service Bulletin?

The service bulletin includes procedures for:

- visually inspecting the elevator control system for proper movement; and
- modifying and installing resin thickened cottonflock reinforcements to the elevator control system as a way to increase the stiffness of the elevator control support stand.

What Action Did the LBA Take?

The LBA classified this service bulletin as mandatory and issued German AD Number 1999-341, dated November 18, 1999, in order to assure the continued airworthiness of these sailplanes in Germany.

Was This in Accordance With the Bilateral Airworthiness Agreement?

These sailplane models are manufactured in Germany and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the LBA has kept FAA informed of the situation described above.

The FAA's Determination and an Explanation of the Provisions of the Proposed AD

What Has FAA Decided?

The FAA has examined the findings of the LBA; reviewed all available information, including the service information referenced above; and determined that:

- the unsafe condition referenced in this document exists or could develop on other DG Flugzeugbau GmbH

Models DG-500 Elan Series, DG-500M, and DG-500MB sailplanes of the same type design;

- The actions specified in the previously-referenced service information should be accomplished on the affected sailplanes; and
- AD action should be taken in order to correct this unsafe condition.

What Does the Proposed AD Require?

This proposed AD would require you to:

- Visually inspect the elevator control system for proper movement;
- Obtain and incorporate a repair scheme if improper movement is found; and
- Modify and install resin thickened cottonflock reinforcements to the elevator control system as a way to increase the stiffness of the elevator control support stand.

Cost Impact

How Many Sailplanes Does the Proposed AD Impact?

We estimate that the proposed AD affects 10 sailplanes in the U.S. registry.

What Is the Cost Impact of the Proposed AD on Owners/Operators of the Affected Sailplanes?

We estimate the following costs to accomplish the proposed inspection and modification:

Labor cost	Parts cost per sail-plane	Total cost per sail-plane	Total cost on U.S. sail-plane operators
3 workhours × \$60 per hour = \$180.	\$25	\$205	\$2,050

Compliance Time of the Proposed AD

What Is the Compliance Time of the Proposed AD?

The compliance time of this proposed AD is to accomplish the inspection “within the next 30 calendar days after the effective date of this AD” and to accomplish the modification “within the next 120 days after the effective date of this AD.”

Why Is the Compliance Time Presented in Calendar Time Instead of Hours Time-in-Service (TIS)?

We have established the compliance in calendar time instead of hours time-in-service (TIS) because the unsafe condition described by the proposed AD is not directly related to sailplane operation. The chance of this situation occurring is the same for a sailplane with 10 hours time-in-service (TIS) as it would be for a sailplane with 500 hours TIS. A calendar time for compliance will assure that the unsafe condition is addressed on all sailplanes in a reasonable time period.

Why are the Compliance Times of the German AD Different Than the Compliance Times in the Proposed AD?

The German AD requires the inspection before next flight and the modification within 45 days of the effective date of the German AD. We do not have justification to require the proposed inspection before next flight. We use compliance times such as this when we have identified an urgent safety of flight situation. We believe that 30 calendar days will give the owners or operators of the affected sailplanes enough time to have the proposed inspection accomplished without compromising the safety of the sailplanes.

The 120-calendar day compliance time for the proposed modification gives the owners/operators of the affected sailplanes enough time to adequately schedule the work to coincide with other maintenance activities.

Regulatory Impact

Does This Proposed AD Impact Various Entities?

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposed rule would not have federalism implications under Executive Order 13132.

Does This Proposed AD Involve a Significant Rule or Regulatory Action?

For the reasons discussed above, I certify that this proposed action (1) is not a “significant regulatory action”

under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

DG Flugzeugbau GMBH: Docket No. 99–CE–88–AD

(a) *What sailplanes are affected by this AD?* This AD affects Models DG-500 Elan Series, DG-500M, and DG-500MB sailplanes, all serial numbers up to and including 5E203, that are certificated in any category.

(b) *Who must comply with this AD?* Anyone who wishes to operate any of the above sailplanes on the U.S. Register must comply with this AD.

(c) *What problem does this AD address?* The actions specified by this AD are intended to detect and correct improper movement in the elevator control system and to increase the stiffness of the elevator control support stand. Without accomplishing these actions, the pilot's capability to use full elevator control deflection could be limited, which could require increased force in moving the elevator control with a consequent potentially uncontrolled flight condition.

(d) *What actions must I accomplish to address this problem?* To address this problem, you must accomplish the following:

Action	Compliance time	Procedures
(1) Visually inspect the push rod guide to ensure that the outer aluminum tube of the guide does not move.	Within the next 30 days after the effective date of this AD, and prior to accomplishing the modification required in paragraph (d)(3) of this AD. The second inspection is not required if the modification is incorporated immediately after the initial inspection.	Follow the inspection procedures in the Instruction section of DG Flugzeugbau Technical Note (TN) 348/12 (applicable to the model DG-500 Elan Series) or TN 843/12 (applicable to the models DG-500M and DG-500MB), both dated October 6, 1999.
(2) If any movement is detected in the outer aluminum tube as specified in this AD and the referenced service information, accomplish the following: (i) Obtain a repair scheme from the manufacturer at the address presented in paragraph (h) of this AD; and (ii) Incorporate this repair scheme	Required prior to further flight after the inspection when the discrepancy is found.	In accordance with the repair scheme obtained from the manufacturer.
(3) Modify and install resin thickened cottonflock reinforcements to the elevator control system as a way to increase the stiffness of the elevator control support stand.	Within the next 120 days after the effective date of this AD.	Follow the modification procedures in the Working Instructions No. 1 for TN 348/12 (843/12), dated September 28, 1999. The instructions are referenced in DG Flugzeugbau Technical Note (TN) 348/12 (applicable to the model DG-500 Elan Series) or TN 843/12 (applicable to the models DG-500M and DG-500MB), both dated October 6, 1999.

(e) *Can I comply with this AD in any other way?* You may use an alternative method of compliance or adjust the compliance time if:

(1) Your alternative method of compliance provides an equivalent level of safety; and

(2) The Manager, Small Airplane Directorate, approves your alternative. Submit your request through an FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager.

Note 1: This AD applies to each sailplane identified in paragraph (a) of this AD, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For sailplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if you have not eliminated the unsafe condition, specify actions you propose to address it.

(f) *Where can I get information about any already-approved alternative methods of compliance?* Contact Mike Kiesov, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4144; facsimile: (816) 329-4090.

(g) *What if I need to fly the sailplane to another location to comply with this AD?* The FAA can issue a special flight permit under sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate your sailplane to a location where you can accomplish the requirements of this AD.

(h) *How do I get copies of the documents referenced in this AD?* You may obtain copies of the documents referenced in this AD from DG Flugzeugbau, Postbox 41 20, D-76646 Bruchsal, Federal Republic of Germany. You

may examine these documents at FAA, Central Region, Office of the Regional Counsel, 901 Locust, Room 506, Kansas City, Missouri 64106.

Note 2: The subject of this AD is addressed in German AD 1999-341, dated November 18, 1999.

Issued in Kansas City, Missouri, on September 11, 2000.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 99-ANM-10]

Proposed Modification of Class E Airspace, St. George, UT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class E airspace at St. George, UT. A new Area Navigation (RNAV) Standard Instrument Approach Procedure (SIAP) to Runway (RWY) 34 at St. George Municipal Airport has made this proposal necessary. Additional Class E controlled airspace from 700 feet and 1,200 feet above the earth is required to contain aircraft executing the RNAV RWY 34 SIAP with a Terminal Arrival Area (TAA) design to

St. George Municipal Airport. The intended effect of this proposal is to provide adequate controlled airspace for Instrument Flight Rules (IFR) operations at St. George Municipal Airport, St. George, UT.

DATES: Comments must be received on or before November 6, 2000.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace Branch, ANM-520, Federal Aviation Administration, Docket No. 99-ANM-10, 1601 Lind Avenue SW, Renton, Washington 98055-4056.

The official docket may be examined in the Office of the Regional Counsel for the Northwest Mountain Region at the same address.

As informal docket may also be examined during normal business hours in the office of the Manager, Air Traffic Division, Airspace Branch, at the address listed above.

FOR FURTHER INFORMATION CONTACT: Brian Durham, ANM-520.7, Federal Aviation Administration, Docket No. 99-ANM-10, 1601 Lind Avenue SW, Renton, Washington 98055-4056; telephone number: (425) 227-2527.

SUPPLEMENTARY INFORMATION: Comments Invited Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy related
