

**DEPARTMENT OF ENERGY****Federal Energy Regulatory  
Commission****[Project No. 2413-040]****Georgia Power Company; Notice of  
Availability of Draft Environmental  
Assessment**

October 13, 2000.

An environmental assessment (EA) is available for public review. The EA analyzes the environmental impacts of approving Georgia Power Company's (licensee for the Wallace Dam Project, FERC No. 2413) request to permit the Reynolds Plantation to increase the rate of water withdrawal 3 MGD, about 4.6 cubic feet per second (cfs), to 14.125 MGD, about 21.9 cfs. No additional construction is required at either site.

The Reynold plantation would increase the water withdrawal at the Rees Jones intake facility from 0.75 million gallons per day (MGD) from Lake Oconee to 10.75 MGD. The Reynolds Plantation also would increase the rate of water withdrawal at the National Course facility from 0.75 MGD to 1.875 MGD.

The EA was written by staff in the Office of Energy Projects, Federal Energy Regulatory Commission. In the EA, Commission staff conclude that approving the licensee's request to permit the Reynold plantation to increase its water withdrawals from Lake Oconee would not constitute a major federal action significantly affecting the quality of the human environment. Copies of the EA can be viewed on the web at [www.ferc.fed.us/online/rims.htm](http://www.ferc.fed.us/online/rims.htm). Call (202) 208-2222 for assistance. Copies are also available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE, Room 2A, Washington, DC 20426, or by calling (202) 208-1371.

Anyone may file comments on the EA. The public, federal and state resource agencies are encouraged to provide comments. All written comments must be filed within 30 days of the issuance date of this notice shown above. Send an original and eight copies of all comments marked with the docket number P-2413-040 to: The Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. If you have any questions regarding this notice, please contact

**SUPPLEMENTARY INFORMATION:**

*Title:* Standards of Performance for Ammonium Sulfate Manufacturing

Plants (OMB Control No.2060-0032; EPA ICR No 1066.03), expiration date 11/30/00. This is a request for extension of a currently approved collection.

**Abstract:** The Administrator has judged that PM emissions from ammonium sulfate manufacturing plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Owners/operators of ammonium sulfate manufacturing plants must make the following one-time-only reports: notification of the date of construction or reconstruction; notification of the anticipated and actual dates of startup; notification of any physical or operational change to an existing facility which may increase the regulated pollutant emission rate; and the notification of the date of the initial performance test. The recordkeeping requirements for ammonium sulfate plants consist of the occurrence and duration of all start-ups and malfunctions, the initial performance tests results, amount of ammonium sulfate feed material, and the pressure drop across the emission control system. Records of startups, shutdowns and malfunctions shall be noted as they occur. Records of the performance test should include information necessary to determine the conditions of the performance test, and performance test measurements (including pressure drop across the emission control system) and results. The Continuous Monitoring System (CMS) shall record pressure drop across the scrubbers continuously and automatically.

In order to ensure compliance with the standards promulgated to protect public health, adequate reporting and recordkeeping is necessary. In the absence of such information enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on April 18, 2000; no comments were received.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 91 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain,

or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*Respondents/Affected Entities:*  
Ammonium sulfate manufacturing facilities.

*Frequency of Response:* 1.  
*Estimated Number of Responses:* 2.  
*Estimated Total Annual Hour Burden:* 182 hours.
