DEPARTMENT OF HEALTH AND HUMAN SERVICES**Office of the Secretary****Notice of Interest Rate on Overdue Debts**

Section 30.13 of the Department of Health and Human Services' claims collection regulations (45 CFR part 30) provides that the Secretary shall charge an annual rate of interest as fixed by the Secretary of the Treasury after taking into consideration private consumer rates of interest prevailing on the date that HHS becomes entitled to recovery. The rate generally cannot be lower than the Department of Treasury's current value of funds rate or the applicable rate determined from the "Schedule of Certified Interest Rates with Range of Maturities." This rate may be revised quarterly by the Secretary of the Treasury and shall be published quarterly by the Department of Health and Human Services in the **Federal Register**.

The Secretary of the Treasury has certified a rate of 13⁷/₈% for the quarter ended September 30, 2000. This interest rate will remain in effect until such time as the Secretary of the Treasury notifies HHS of any change.

Dated: October 17, 2000.

[Program Announcement 01010]

Pregnancy Risk Assessment Monitoring System; Notice of Availability of Funds

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2001 funds for a cooperative agreement program for a Pregnancy Risk Assessment Monitoring System (PRAMS) program. CDC is committed to achieving the health promotion and disease prevention objectives of "Healthy People 2010," a national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the focus area of Maternal, Infant, and Child Health. For the conference copy of "Healthy People 2010," visit the Internet site: www.health.gov/healthypeople.

The purpose of the program is to assist State public health agencies in generating State-specific data for informing perinatal health programs and policies. This will be accomplished by assisting the State public health agencies to (1) establish or maintain State-specific, population-based surveillance of selected maternal behaviors and experiences that occur around the time of pregnancy and early infancy, (2) enhance the basic PRAMS surveillance system in order to more effectively reach special or related populations which are typically considered hard-to-reach populations, and (3) to implement alternative methodologies for surveying women about selected maternal behaviors and experiences. This announcement includes three separate categories:

Category A (Core Activities): To establish or maintain State-specific population-based surveillance of selected maternal behaviors and experiences that occur around the time of pregnancy and early infancy.

Category B (Enhanced Activities): To enhance regular PRAMS surveillance to reach special population groups, to test new data collection or analytic

methodologies related to pregnancy or infant health, or to gather additional information on specific topics from women or others. Category B funds cannot be used for ongoing sampling from data sources other than vital records.

1. Special or related population groups: Special populations may include teenagers, groups with low response rates, cultural groups, women whose first language is something other than English, low-income women, women from urban or rural areas, or incarcerated women. Related populations could include follow-up of women who have experienced a fetal death and women with children less than 5 years of age. Special or related populations to be considered for ongoing surveillance must be identifiable for sampling from vital records.

2. New data collection or analytic methodologies: Methodologies that might enhance regular PRAMS mail/telephone data collection could include in-person interviews, additional mail and telephone follow-up with in-person interviews, Internet-administered surveys, or use of community health workers or an organization (e.g., church, civic, cultural groups) to deliver the surveys. Methodologies that might enhance analytic capacity could include conducting small area analysis or GIS (Geographic Information Science), testing the validity and reliability of measures, or performing linkages with other data sets that focus on maternal and infant health issues (e.g., Medicaid data, WIC (Women, Infant, and Children) data, databases with potential contact information for pregnant women).

3. Specific topics: Special surveys focusing on specific topics or specific populations might include in-depth surveys of the PRAMS sample on a time-limited basis (e.g., additional detailed questions on a specific topic added to existing an questionnaire) or special surveys of other populations on topics related to PRAMS (e.g., prenatal care providers, hospitals, health insurance providers).

Category C (Alternative Methodologies): To implement one time (point-in-time) surveys for State-specific, population-based surveillance of selected maternal behaviors and experiences that occur around the time of pregnancy and early infancy.

B. Eligible Applicants

Applicants may apply for core activities (Category A), either as an existing grantee or as a new grantee, or they may apply for alternative

methodologies (Category C). In order to apply for enhanced activities (Category B), applicants must also apply for and receive Category A funding. A separate narrative must be provided for each category for which an applicant applies. Applications in each category will be evaluated separately.

For Category A (Core Activities):

Assistance will be provided only to the official State or territorial public health agencies designated as registration areas for vital statistics, including the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Applicants can apply for Category A funds, either as an existing or new state.

Existing PRAMS States are States that are funded under program announcement 96059 or 99070. These are: Alabama, Alaska, Arkansas, Colorado, Delaware, Florida, Georgia, Hawaii, Illinois, Louisiana, Maine, Maryland, Mississippi, Nebraska, New Mexico, New York State, New York City, North Carolina, Ohio, Oklahoma, South Carolina, Utah, Vermont, Washington, and West Virginia. All other States must apply as a new State.

All applicants for Category A must provide the following evidence of support letters:

1. Written assurance, signed by the head of the State's Vital Statistics unit, that:

a. the recipient PRAMS program will have timely (*i.e.*, able to draw a sample from birth certificates within 2 to 4 months after delivery) access to edited birth certificate information needed for sampling and data collection,

b. the recipient program will identify and commit a person from the Vital Statistics unit to act as a liaison to the PRAMS program to develop and maintain the sampling program and make any modifications needed throughout the life of the program,

c. final birth tape will be available by December 1 of the following data year for the purpose of weighting the annual data set, and,

d. any changes in the vital statistics system, such as with file layouts, will be communicated in writing to the recipient PRAMS program in a timely fashion, as it can affect the monthly sampling process.

2. A joint letter of commitment from the State Directors of the Maternal and Child Health (MCH), the Vital Statistics, and the Data Processing units, that they will work collaboratively to support the PRAMS program. This letter should
