ACTION: Proposed rule.

SUMMARY: This document seeks comment on a range of issues related to application of our existing children's programming rules to digital broadcasting. In addition, this document seeks comment on how to address the issue of the airing in programs viewed by children promotions that may be inappropriate for children to watch. Although this document seeks comment largely on challenges unique to the digital area, it also discusses several issues that apply equally to analog and digital broadcasting.

Title: NPRM—Children's Television Obligations of Digital Television Broadcasters.

Form No: FCC Form 398.

Type of Review: Revision of Existing Collection.

Respondents: Business or other forprofit.

Number of Respondents for FCC 398: 1,250.

Number of Respondents for Section 73.673: 1,225.

Estimated Time Per Response for FCC 398: 6 hours.

Estimated Time Per Response for Section 73.673: 1 minute per program and 6 minutes per program to publishers of program guides.

Total Annual Burden: 68,219 hours. Total Annual Costs: \$489,600.

The estimated time, burden and costs are based upon the existing burdens for the FCC 398 (3060–0754) and Section 73.673 (3060–0750). This burden in those collections could increase depending on what requirements are ultimately adopted.

Needs and Uses: This NPRM invites comments on how the existing children's educational television programming obligations and limitations should be interpreted and adapted to apply to digital broadcasters in light of the new capabilities made possible by that technology. This NPRM also seeks comments on what steps the FCC might take to increase public awareness of the availability of core programming and how to locate it. The current obligations consist of the FCC 398 which is required to be filed by commercial television broadcast stations each quarter.

This form is used to provide information on the efforts of commercial television stations to provide children's educational and informational programs aired to meet its obligation under the Children's Television Act of 1990 (CTA). The FCC 398 assists in efforts by the public and the Commission to monitor station compliance with the CTA.

In addition, Section 73.673 requires commercial TV broadcasters to identify programs specifically designed to educate and inform children at the beginning of the program and to provide information identifying such programs and the age groups for which they are intended to publishers of program guides. Depending on what requirements are ultimately adopted, there may be an increase in the burden for these collections.
