

In light of this limitation, I do not view the Commission's action today as effectively eliminating, without prior notice, the ability of pipelines to apply for optional certificates.

(As a final matter, I add that the optional certificates used to be commonly known as optional "expedited" certificates. Presumably, the promised speed of Commission action on applications for optional certificates—at least in comparison to the slower pace of Commission action on traditional applications—once provided much of the motivation to pipeline certificate applicants, filing under optional procedures, that were confident that there was a market for additional capacity. Alas, as the Commission explains in its proposed rulemaking in a related docket, optional certificates today provide none of the expedition contemplated at the time of promulgation of optional certificate regulations in 1985. This is because "[e]nvironmental review is the driving force in total processing time, and environmental review requirements are the same under either program." Hopefully, there will not be a delay in the future.)

Therefore, I respectfully concur.

**Curt L. Hebert, Jr.,**  
Commissioner.
