Request for Proposals for FY 2002—NOAA Educational Partnership Program With Minority Serving Institutions: Environmental Entrepreneurship Program

AGENCY: Office of Oceanic and Atmospheric Research (OAR), National Oceanic and Atmospheric Administration (NOAA). Commerce.

ACTION: Notice of request for proposals.

SUMMARY: The Office of Oceanic and Atmospheric Research (OAR) in the National Oceanic and Atmospheric Administration (NOAA), United States Department of Commerce is soliciting proposals for the NOAA Educational Partnership Program with Minority Serving Institutions (EPP/MSI): Environmental Entrepreneurship Program. The goal of the program is to strengthen the capacity of Minority Serving Institutions to foster student careers, entrepreneurship opportunities and advanced academic study in NOAA related sciences.

In Fiscal Year 2002, NOAA plans to make available a total of \$3,000,000 to support the EPP/MSI Environmental Entrepreneurship Program. The program will provide funds on a competitive basis to support projects at eligible Minority Serving Institutions, for up to three years duration, in the following two categories:

(1) Program Development and Enhancement—approximately six grants or cooperative agreements, each up to \$250,000 total for up to three years, to support the development and enhancement of outreach, education, applied research and training programs that will strengthen MSIs and their partners capacity to foster student careers, entrepreneurship opportunities and advanced academic study in NOAA related sciences.

(2) Environmental Demonstration Projects—approximately six grants or cooperative agreements, each up to \$300,000 total for up to three years to support the engagement of MSI faculties and students in field demonstration projects focused on applying environmentally sound methods and technologies to address NOAA related environmental issues.

DATES: A Letter of Intent to aid NOAA in planning the review of proposals is requested by April 30, 2002 but is not required. Proposals must be received by 5:00 p.m. (Eastern Daylight Savings Time) on May 30, 2002 (See Section VI. Instructions for Application: Timetable).

Catalog of Federal Assistance Number: 11.481—Educational Partnership Program with Minority Serving Institutions.

II. Program Description

Background

NOAA provides science, technology, and services to describe and predict changes in the Earth's environment, and conserve and manage wisely the Nation's coastal and marine resources to ensure sustainable economic opportunities. The agency has made a commitment to expand and strengthen its partnerships with Minority Serving Institutions that will serve as a catalyst to meet its principal goals of environmental stewardship, assessment, and prediction. In accordance with NOAA's overall mission, and with the policy of NOAA and the U.S. Department of Commerce to foster environmental education, research and economic sustainability, the purposes of the NOAA EPP/MSI Environmental

Entrepreneurship Program are to support:

1. Educational Opportunities. To prepare students with the necessary academic training, technical skills and experiences that will enable them to pursue careers, entrepreneurship opportunities and advanced academic study in environmental fields related to NOAA's mission.

2. Capacity Building. To develop or enhance the capacity of environmental related academic programs at MSIs in order to ensure they are effective pipelines through which students and faculty can gain the necessary experience to make environmentally and economically sound decisions.

3. Partnerships. To facilitate or strengthen MSI partnerships, where appropriate, with NOAA programs and facilities, community colleges and universities, industry, governments (state, local, commonwealth, territorial and tribal), and organizations (public, nonprofit, or private) that foster cooperative education and training activities for students and faculties.

4. Community Economic Development. To support MSIs and partners in preparing students with the necessary knowledge, skills, tools and technology that may be applied outside the classroom to ensure environmentally sustainable and economically viable local communities. The goal is to foster environmental entrepreneurship opportunities that empower students to become stewards of natural resources and the environment and to transfer knowledge gained to address environmental problems of importance in their local communities.

Rationale

The recruitment of minorities, particularly underrepresented minorities, in the fields of science and engineering, lags behind expectations. According to the most recent data compiled by the National Science Foundation (NFS), "Women, Minorities and Persons with Disabilities in Science and Engineering: 2000," the percentage of minority scientists and engineers in the workforce ranges from 0.3 percent for American Indians to about 3.0 percent each for African-Americans and Hispanics. The quality and nature of academic experiences at each point of the educational pipeline are crucial to bringing more minorities into environmental science and engineering fields. Bachelors, Masters and Doctoral degrees are the underpinnings of environmental science career achievement and employment. At both the undergraduate and graduate levels,
