

and access road maintenance on ROWs are located within floodplains and wetlands areas. Per DOE's Floodplain/Wetlands Review Requirements, Western will prepare a floodplain/wetlands assessment.

**DATES:** Comments on the proposed floodplain/wetlands action are due to the address below no later than April 25, 2002.

**ADDRESSES:** Comments should be addressed to Mr. Steve Tuggle, Environmental Specialist, Sierra Nevada Region, Western Area Power Administration, 114 Parkshore Drive, Folsom, CA 95630-4710, fax (916) 985-1936, e-mail [tuggle@wapa.gov](mailto:tuggle@wapa.gov).

**FOR FURTHER INFORMATION CONTACT:** Mr. Steve Tuggle, Environmental Specialist, at the address noted above or telephone (916) 353-4549. For further information on DOE Floodplain/Wetlands Environmental Review Requirements, contact Ms. Carol M. Borgstrom, Director, NEPA Policy and Compliance, EH-42, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, telephone (202) 586-4600 or (800) 472-2756.

**SUPPLEMENTARY INFORMATION:** Western owns, operates, and maintains high-voltage transmission facilities in California and Nevada. As part of its mission, Western uses its transmission system to reliably deliver Federal power from points of generation to and between delivery points. Western's system in California's Sacramento Valley includes all, or a portion of, six 230-kV and one 115-kV transmission lines. These transmission lines are located in Placer, Sacramento, and Sutter counties, California. Most portions of the lines are located in rural, agriculturally dominated areas. However, major portions of the transmission lines are located in suburban/urban areas in or near the cities of Sacramento, Roseville, and Folsom.

Western needs to maintain its transmission line and access road ROWs. Vegetation growing in the ROWs could create a safety hazard to line crews and the public, as well as interfere with the reliable transmission of electricity. Western proposes to expand its vegetation maintenance methods to include expanded use of herbicides in combination with manual and mechanical methods. Western plans to adopt a more progressive management approach for vegetation and access road maintenance that would promote low-growing plant communities. The proposed action would be cost effective and ensure that system reliability and safety remain at

acceptable levels, while extending the lifetime of transmission components.

Based on a review of available Federal Emergency Management Agency flood hazard maps for Placer, Sacramento, and Sutter counties, Western has determined that the proposed action would be located within several 100- and 500-year floodplains, including the American River. Also, based on a review of national and state wetland inventories and the Natural Resource Conservation Service soil maps, Western has determined that the proposed action would be located in areas with wetlands.

Per DOE's Floodplain/Wetlands Review Requirements (10 CFR 1022.12), Western will prepare a floodplain/wetlands assessment. Removal of vegetation along the ROWs within 100- or 500-year floodplains is not expected to influence flow of water during 100- or 500-year flows but will be the subject of the floodplain/wetlands assessment. Maps and further information are available from the Western contact above.

## II. Background

The Toxic Substances Control Act, 15 U.S.C. 2609 section 10(g), authorizes EPA and other federal agencies to establish and coordinate a system for exchange among federal, state, and local authorities of research and development results respecting toxic chemical substances and mixtures, including a system to facilitate and promote the development of standard data format and analysis and consistent testing procedures. Through FOSTTA, the Chemical Information and Management Project (CIMP) focuses on EPA’s Chemical Right-to-Know Program and works to develop a more coordinated effort involving federal, state, and tribal agencies. The Pollution Prevention Project (P2) promotes the prevention ethic across society, helping companies incorporate P2 approaches and techniques and integrating P2 into mainstream environmental activities at both the federal level and among the states. Under the Emergency Planning and Community Right-to-Know Act, EPA, the states, and the tribes share responsibility for handling toxic chemical release information and making it available to the public through the Toxics Release Inventory. The Tribal Affairs Project (TAP) concentrates on chemical and prevention issues that are most relevant to the tribes, including lead control and abatement, subsistence lifestyles, and hazard communications and outreach. FOSTTA’s vision is to reinvigorate the projects, focus on major policy-level issues, recruit more senior state and tribal leaders, increase outreach to all 50 states and some 560 federally recognized tribes, and vigorously seek ways to engage the states and tribes in ongoing substantive discussions on complex and oftentimes controversial environmental issues that states and tribes resolve at their respective levels of government.

In January 2002, the Environmental Council of the States (ECOS), in cooperation with the National Tribal Environmental Council (NTEC), was awarded the new FOSTTA cooperative agreement. ECOS, NTEC, and EPA’s Office of Pollution Prevention and Toxics (OPPT) are co-sponsoring the meetings. As part of a cooperative agreement, ECOS facilitates ongoing efforts of the state and tribal leaders and

OPPT to increase understanding and improve collaboration on toxics and pollution prevention issues and to continue a dialogue on how federal environmental programs can best be implemented among the states, tribes, and EPA.

The fall FOSTTA meeting is scheduled October 21–22, 2002.

### III. Purpose of Meeting

The FOSTTA representatives and EPA will collaborate on environmental protection and chemical and prevention issues. The tentative agenda items identified by the states and the tribes follow:

1. Pilot project ideas for interfacing environment and public health (CIMP).
2. How to integrate the High Production Volume Challenge Program/Voluntary Children's Chemical Evaluation Program data with existing tools (e.g., risk screening environmental indicators) (CIMP).
3. The cumulative risk exposure initiative (CIMP).
4. Future directions for pollution prevention incentives for state grant programs (P2).
5. Pollution prevention and compliance assistance (P2).
6. Tribal risk assessment (TAP).
7. Tribal science council (TAP).

During the first half hour of the plenary session, ECOS and NTEC will discuss their plans for interacting with FOSTTA. At the remainder of the plenary, another topic of mutual interest to the approximately 30 state and tribal leaders will be discussed.
