SUPPLEMENTARY INFORMATION: *Title:*

Pipeline Safety Reports of Abandoned Underwater Pipelines

Type of Request: Renewal of existing information collection.

Abstract: Underwater pipelines are being abandoned at an increasing rate as older facilities reach the end of their useful life. This trend is expected to continue. In 1992, Congress responded to this issue by amending the Pipeline Safety Act (49 U.S.C. 60108(c)(6)(B)) which directs the Secretary of Transportation to require operators of an offshore pipeline facility or a pipeline crossing navigable waters to report the abandonment to the Secretary of Transportation in a way that specifies whether the facility has been abandoned properly according to applicable Federal and State requirements. RSPA's regulations for abandonment reporting can be found at 49 CFR 192.727 and 195.402.

Respondents: Gas and hazardous liquid pipeline operators.

Estimated Number of Respondents: 400.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 2,400 hours.

Comments are invited on: (a) The need for the proposed collection of information for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques.

All timely written comments to this notice will be summarized and included in the request for OMB approval. All comments will also be available to the public in the docket.

Issued in Washington, DC on May 14, 2002.

Stacey L. Gerard,

Associate Administrator for Pipeline Safety.
