Reporting

Under the current and previous IHAs, CALTRANS has provided monitoring reports (Green et al. (2001, 2002). The findings from these reports have been summarized previously in this document.

CALTRANS will provide weekly reports to the Southwest Regional Administrator (Regional Administrator), NMFS, including a summary of the previous week's monitoring activities and an estimate of the number of harbor seals that may have been disturbed as a result of seismic retrofit construction activities. These reports will provide dates, time, tidal height, maximum number of harbor seals ashore, number of adults, sub-adults and pups, number of females/males, number of harbor seals with a red pelage, and any observed disturbances. A description of retrofit activities at the time of observation and any sound pressure levels measurements made at the haulout will also be provided. A draft interim report must be submitted to NMFS by April 30, 2003.

A draft final report must be submitted to the Regional Administrator within 90 days after the expiration of this IHA. A final report must be submitted to the Regional Administrator within 30 days after receiving comments from the Regional Administrator on the draft final report. If no comments are received from NMFS, the draft final report will be considered to be the final report.

CALTRANS will provide NMFS with a follow-up report on the post-construction monitoring activities within 18 months of project completion in order to evaluate whether haulout patterns are similar to the pre-retrofit haul-out patterns at Castro Rocks.

National Environmental Policy Act

In conjunction with the promulgation of regulations implementing section 101(a)(5)(D) of the MMPA, NMFS completed an EA on May 9, 1995, that addressed the impacts on the human environment from issuance of IHAs and the alternatives to that action. NMFS analysis resulted in a Finding of No Significant Impact. In addition, NMFS prepared an EA in 1997 that concluded that the impacts of CALTRANS' seismic retrofit construction of the Bridge will not have a significant impact on the human environment. Accordingly, this proposed action has not changed significantly from the 1997 action, it is categorical excluded from further NEPA analysis and, therefore, a new EA will not be prepared. A copy of these two relevant EAs are available (see ADDRESSES).

Preliminary Conclusions

NMFS has preliminarily determined that the short-term impact of the seismic retrofit construction of the Bridge, as described in this document, should result, at worst, in the temporary modification in behavior by harbor seals and, possibly, by some California sea lions. While behavioral modifications, including temporarily vacating the haulout, may be made by these species to avoid the resultant visual and acoustic disturbance, this action is expected to have a negligible impact on the animals. In addition, no take by injury and/or death is anticipated, and harassment takes will be at the lowest level practicable due to incorporation of the mitigation measures mentioned previously in this document.

Proposed Authorization

NMFS proposes to renew an IHA to CALTRANS for the potential harassment of small numbers of harbor seals and California sea lions incidental to seismic retrofit construction of the Bridge, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. NMFS has preliminarily determined that the proposed activity would result in the harassment of only small numbers of harbor seals and possibly California sea lions and will have no more than a negligible impact on these marine mammal stocks.

Information Solicited

NMFS requests interested persons to submit comments, information, and suggestions concerning this request (see ADDRESSES).
