

consequences of accidents, no changes are being made in the types of effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resource than those previously considered in the Final Environmental Statement for the North Anna Power Station, Unit 2, dated April 1973.

Agencies and Persons Consulted

On January 15, 2002, the staff consulted with the Virginia State official, Mr. Les Foldesi of the Virginia Department of Health, Bureau of Radiological Health, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated January 9, 2001. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor),

Rockville, Maryland. Publicly available records will be accessible electronically from the ADAMS Public Library component on the NRC Web site, <http://www.nrc.gov> (the Public Electronic Reading Room). Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or 301-415-4737, or by e-mail at pdr@nrc.gov.

Dated at Rockville, Maryland, this 7th day of February 2002.

NUCLEAR REGULATORY COMMISSION

Correction to Biweekly Notice Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

On January 22, 2002 (67 FR 2917), the **Federal Register** published the Biweekly Notice of Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations. On page 2923, top of column 3, the notice entitled "Entergy Nuclear Operations, Inc., Docket No. 50-333, James A. FitzPatrick (JAF) Nuclear Power Plant, Oswego County, New York," the Date of amendment request should be January 9, 2002, instead of November 2, 2001.

Dated at Rockville, Maryland, this 7th day of February 2002.

For the Nuclear Regulatory Commission.

John A. Zwolinski,

*Director, Division of Licensing Project
Management, Office of Nuclear Reactor
Regulation.*

POSTAL SERVICE

Plan for Secure Postage Meter Technology

AGENCY: Postal Service.

ACTION: Clarification of final plan.

SUMMARY: The Postal Service published the final plan for phases III and IV of the Postal Service's Plan for Secure Postage Meter Technology in the **Federal Register** on November 15, 2001 (Vol. 66, No. 221, pages 57492-57494). This

notice clarifies the definition of phase III and IV meters in the previous notice and details the requirements for each meter manufacturer to notify all customers of the retirement plan for any affected meters.

DATES: This clarification pertains to the final plan that was effective November 15, 2001.

FOR FURTHER INFORMATION CONTACT: Wayne Wilkerson by fax at (703) 292-4073.

SUPPLEMENTARY INFORMATION: In 1995, the Postal Service, in cooperation with all authorized postage meter manufacturers, began a phaseout of all mechanical postage meters because of identified cases of indiscernible tampering and misuse. Postal Service revenues were proven to be at serious risk. The completion of this effort, which resulted in the withdrawal of 776,000 mechanical meters from service, completed phase I of the Plan for Secure Postage Meter Technology. Phase II of the plan, the retirement of electronic meters that are manually set by Postal Service employees, is now being implemented. The plan for phases III and IV, describing the retirement of meters with nondigitally printed indicia, was published for comment in the **Federal Register**, August 21, 2000 (Vol. 65, No. 163, pages 50723-50724). Comments on the proposed plan were due by October 5, 2000. Responses to the comments and the final plan were published in the **Federal Register** on November 15, 2001. This notice clarifies the definition of the meters affected and the requirements for each manufacturer to notify customers of the plan.

Clarification of the Final Postal Service Plan for the Retirement of Letterpress Postage Meters

(Changes are shown in italicized text.)

Phases III and IV of the Postal Service proposed Plan for Secure Postage Meter Technology affect *non-digitally printing* meters that are remotely reset under the Computerized Meter Resetting System (CMRS). *The affected meters are those meters that print indicia using older letterpress technology rather than digital printing, even if they have a digital display.* If such a meter has an *additional* feature that automatically disables the meter if it is not reset within a specified time period or when certain preprogrammed criteria are met, it is called an enhanced meter. Phase III of the proposed plan *required* that the users of nonenhanced CMRS letterpress meters *be* notified of the schedule for the retirement of their meters by December 31, 2001. The placement of nonenhanced CMRS letterpress meters

must cease by December 31, 2002, and these meters must be off the market *and withdrawn from service* by December 31, 2006. *Prior to the signing of a contract for the new placement of any nonenhanced CMRS non-digitally printing meter, the manufacturer placing the meter must notify the customer that the meter must be withdrawn from service by December 31, 2006.* Phase IV of the proposed plan requires that the customers of enhanced CMRS letterpress meters *must be* notified of the schedule for the retirement of their meters by June 30, 2003. The placement of enhanced CMRS letterpress meters must cease by June 30, 2004, and these meters must be off the market *and withdrawn from service* by December 31, 2008. *Prior to the signing of a contract for the new placement of any enhanced CMRS non-digitally printing meter, the manufacturer placing the meter must notify the customer that the meter must be withdrawn from service by December 31, 2008.*

Stanley F. Mires,

Chief Counsel, Legislative.

POSTAL SERVICE

Privacy Act of 1974, Systems of Records

AGENCY: Postal Service.

ACTION: Advance notice of amendment to an existing system of records with the deletion of two general routine uses, and the addition of two new routine uses.

SUMMARY: The Postal Service proposes to amend Postal Service Privacy Act System of Records, 140.020, Postage—Postage Evidencing System Records. The proposed amendments reflect the collection and use of data to authorize and process the purchase of postage by credit cards for certain postage evidencing systems. This notice amends the following sections to reflect the acceptance of credit cards: Categories of records in the system; routine uses of records maintained in the system, including categories of users and the purposes of such uses; safeguards; notification procedure and record source categories.

DATES: This proposal will become effective without further notice on March 15, 2002, unless comments received on or before that date result in a contrary determination.

ADDRESSES: Mail or deliver written comments to the Records Office, U.S. Postal Service, Room 5846, 475 L'Enfant Plaza, SW, Washington, DC 20260-5846. You can view or make copies of all written comments between 8 a.m. and 4 p.m., Monday through Friday, at the same address.

FOR FURTHER INFORMATION CONTACT: Susie Travers, Records Office, 202-268-3362.

SUPPLEMENTARY INFORMATION: The Postal Service revised the Privacy Act system of records in USPS 140.020, Postage—Postage Evidencing System Records, in a notice published in the **Federal Register** on June 26, 2000, (65 FR 39446-39447). The revision further limited the categories of records covered. It was determined that only destinating five-digit ZIP Code information was needed to accomplish the system purpose.

The Postal Service is publishing this notice to expand the categories of records covered by the system to collect data for the acceptance of credit cards to include the credit card number, credit card expiration date, and credit card transaction number. The Postal Service is deleting general routine use (a), which is being replaced by new routine use 4, and routine use (m), because it is not necessary to share this information with the labor organizations. Routine use 3 is added to reflect how information may be disclosed for the purpose of authorizing and processing the purchase of postage by credit card. Routine use 4 permits disclosure for law enforcement purposes only pursuant to a Federal search warrant.

In addition to the protections imposed by the Privacy Act, the Postal Reorganization Act imposes restrictions on the disclosure of information of the type kept within system USPS 140.020. The Privacy Act prohibits the Postal Service from disclosing lists of postal customers or other persons.

For the above reasons, the Postal Service proposes to amend the following system:

USPS 140.020

SYSTEM NAME:

Postage—Postage Evidencing System Records, 140.020.

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

[CHANGE TO READ]

Customer name and address, change of address information, corporate business customer information (CBCIS) number, business profile information, estimated annual postage and annual percentage of mail by type, type of usage

(customer, postal, or government), post office where mail is entered, license number, date of issuance, ascending and descending register values, device identification number, device model number, certificate serial number, amount and date of postage purchases, credit card number, credit card expiration date, credit card transaction number, address verification service (AVS) response from credit card processor, credit card issuer authorization code, credit card billing address, amount of unused postage refunded, contact telephone number, date, destinating five-digit ZIP Code and rate category of each indicium created, and transaction documents.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

[CHANGE TO READ]

General routine use statements b, c, d, e, f, g, h, and j listed in the prefatory statement at the beginning of the Postal Service's published system notices apply to this system. Other routine uses are as follows:

* * * * *

[ADD]

3. Records or information from this system may be disclosed to the Postal Service's designated credit card processor for the purpose of authorizing and processing the purchase of postage by credit card.

4. Information from this system may be disclosed for law enforcement purposes to a government agency, either Federal, State, local, or foreign, only pursuant to a federal warrant duly issued under Rule 41 of the Federal Rules of Criminal Procedure. See *Administrative Support Manual (ASM)* 274.6 for procedures relating to search warrants.

* * * * *

SAFEGUARDS:

[CHANGE TO READ]

Paper records and computer storage media are maintained in closed file cabinets in secured facilities; automated records are protected by computer password. Information obtained from users over the Internet is transmitted electronically to the Postal Service by authorized postage evidencing system providers via a virtual, private network.

* * * * *

NOTIFICATION PROCEDURE:

[CHANGE TO READ]

Individuals wanting to know whether information about them is maintained in this system of records must address inquiries in writing to: Manager, Postage
