

be assessed at the cash deposit rate, and cash deposits must continue to be collected, at the rate previously ordered. As such, the countervailing duty cash deposit rate applicable to a company can no longer change, except pursuant to a request for a review of that company. *See Federal-Mogul Corporation and The Torrington Company v. United States*, 822 F.Supp. 782 (CIT 1993) and *Floral Trade Council v. United States*, 822 F.Supp. 766 (CIT 1993) (interpreting 19 CFR 353.22(e), the antidumping regulation on automatic assessment, which is identical to 19 CFR 351.212(c)(ii)(2)). Therefore, the cash deposit rates for all companies except those covered by this review will be unchanged by the results of this review.

We will instruct Customs to continue to collect cash deposits for non-reviewed companies at the most recent company-specific or country-wide rate applicable to the company. Accordingly, the cash deposit rates that will be applied to non-reviewed companies covered by this order will be the rate for that company established in the most recently completed administrative proceeding conducted under the URAA. If such a review has not been conducted, the rate established in the most recently completed administrative proceeding pursuant to the statutory provisions that were in effect prior to the URAA amendments is applicable. These rates shall apply to all non-reviewed companies until a review of a company assigned these rates is requested. In addition, for the period January 1, 2001, through December 31, 2001, the assessment rates applicable to all non-reviewed companies covered by this order are the cash deposit rates in effect at the time of entry.

Upon completion of this administrative review, the Department will determine, and Customs shall assess, countervailing duties on all appropriate entries. In accordance with 19 CFR 351.212(b)(2), we have calculated a company-specific assessment rate for merchandise subject to this review. The Department will issue appropriate assessment instructions directly to Customs within 15 days of publication of the final results of review. If these preliminary results are adopted in the final results of review, we will direct Customs to assess the resulting assessment rates against the entered customs values for the subject merchandise on each of the company's entries during the review period.

In accordance with 19 CFR 351.310, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on these preliminary results. SUPPLEMENTARY INFORMATION:

I. Abstract

Data on fishery participation, expenditures and demographics will be collected from freshwater salmon and steelhead anglers in California. The data will be used to evaluate the economic effects of potential changes in fishery regulations, hatchery practices, and other actions that may be considered to protect chinook, coho, and steelhead stocks listed as threatened or endangered under the Endangered Species Act.

II. Method of Collection

Telephone interviewers will contact a random sample of steelhead report card holders to ask if they had gone steelhead fishing in California in the previous season. Those who were active in the previous season will be asked additional

questions regarding their fishing experiences, expenditures, and demographics. Because names and telephone numbers of salmon anglers are not available, a different method of identifying potential salmon respondents will be used. Specifically, names/telephone numbers of individuals who live in central and northern California and identify fishing as one of their interests will be purchased from a company that specializes in special purpose random digit samples. Telephone interviewers will contact individuals in the special purpose sample to ask if they had gone freshwater salmon fishing in California in the previous season. Those who were active in the previous season will be asked additional questions regarding their fishing experiences, expenditures, and demographics.

SUPPLEMENTARY INFORMATION:

I. Abstract

This collection contains certain reporting and recordkeeping requirements for vessels in the Pacific Coast Groundfish Fishery in the Exclusive Economic Zone for the northwest. These requirements affect fish processing vessels over 125 feet in length and catcher vessels that deliver their catch to motherships. NOAA also proposes to merge the requirement currently cleared under OMB Control Number 0648-0419 into this clearance. This requirement is for a report of intent to off-load non-whiting groundfish in excess of trip limits for purposes of donating that groundfish to a hunger-relief agency.

The information collected is needed to monitor catch, effort, and production for fishery management purposes.

II. Method of Collection

Forms are used for most requirements. These may be submitted by computer or by facsimile machine. Off-load notifications are made by telephone.
