

2. *Road Management.* Roads are recognized as having the potential to impact some terrestrial and aquatic species in various ways. Conservation measures would be developed considering (but not limited to) the following factors—human disturbance associated with road access, seasonal security, road construction requirements, road maintenance, road amounts, road locations, sedimentation/erosion potential, legacy management, and fish passage.

3. *Watershed/Riparian Area Management.* Alteration of forest vegetation associated with watershed function and riparian habitat is recognized as having the potential to impact some terrestrial and aquatic species in various ways. Conservation measures would be developed to regulation activities that could potentially impact watersheds and riparian areas. Such measures would include consideration of the following—water quality, stream shade, structure, woody debris recruitment, and riparian vegetation management.

4. *Grazing on Classified Forest Lands.* Livestock grazing in forested landscapes is recognized as having the potential to impact some terrestrial and aquatic species in various ways. Conservation measures would be developed to address impacts associated with riparian and upland rangelands on classified forest lands resulting from grazing. Such measures would include consideration of the following—condition of riparian vegetation, range condition, stream bank disturbance, season of use, browse utilization, plant species composition, and erosion.

5. *Weed Management.* Herbaceous weed species are recognized as having the potential to impact some terrestrial species in various ways. Conservation measures would be developed to address impacts associated with weed spread and control. Such measures would include consideration of the following—integrated weed management, education, biological controls, herbicide application, re-vegetation, minimization of disturbance, and prevention strategies.

6. *Land Use Planning.* The DNRC administers property in the planning area that may ultimately have long-term uses other than forestry. The DNRC also may buy, sell, or trade land in the planning area. Land use planning measures would be developed to mitigate the impacts of future development or adjustment of land ownership.

7. *Administration and Implementation.* The DNRC would initiate a program to track significant

elements of the HCP and develop a program to inform and educate contractors and employees on standards and practices to be implemented.

As currently envisioned, the HCP would incorporate active adaptive management features, including terrestrial and watershed analysis. Research and monitoring would help determine the effectiveness of the HCP, validate models used to develop the HCP, and provide the basic information used to implement “mid-course corrections” if necessary.

The Service will conduct an environmental review of the proposed HCP and prepare an EIS. The environmental review will analyze the proposal as well as a full range of reasonable alternatives and the associated impacts of each. The Service and the DNRC are currently in the process of developing alternatives for analysis. The scoping process will be used to identify reasonable alternatives in addition to the No Action alternative.

The environmental review of this project will be conducted in accordance with the requirements of the NEPA (42 U.S.C. 4321 *et seq.*), Council of Environmental Quality regulations (40 CFR parts 1500–1508), other appropriate Federal laws and regulations, and policies and procedures of the Service for compliance with those regulations. It is estimated that the draft EIS will be available for public review during the second quarter of calendar year 2004.

Comments and suggestions are invited from all interested parties to ensure that the full range of issues related to the proposed action are addressed and that all significant issues are identified. Comments or questions concerning this proposed action and the environmental review should be directed to the Service (*see ADDRESSES*).

DEPARTMENT OF JUSTICE**Bureau of Alcohol, Tobacco, Firearms and Explosives****Agency Information Collection Activities: Proposed Collection; Comments Requested**

ACTION: 60-day notice of information collection under review: extension of a currently approved collection; Limited Permittee Transaction Report.

The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for "sixty days". This process is conducted in accordance with 5 CFR 1320.10.

If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Megan Morehouse, Public Safety Branch, 800 K Street, NW., Suite 710, Washington, DC 20001.

Request written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should

address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension of a currently approved collection.

(2) *Title of the Form/Collection:* Limited Permittee Transaction Report.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form Number: ATF F 5400.4. Bureau of Alcohol, Tobacco, Firearms and Explosives.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. *Other:* business or other for-profit. The purpose of this collection is to enable ATF to determine whether limited permittees have exceeded the number of receipts of explosive materials they are allowed and to determine the eligibility of such persons to purchase explosive materials.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 400 respondents will complete up to six forms per year with each form taking 20 minutes to complete.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total annual public burden hours for this information collection is estimated to be 800 hours.
