Description: 30 CFR 75.100, 75.155, 77.100, and 77.105 require persons performing tasks and certain required examinations at coal mines which are related to miner safety and health, and which required specialized experience, are required to be either "certified" or "qualified." The regulations recognize State certification and qualification programs. However, where state programs are not available, under the Mine Act and MSHA standards, the Secretary may certify and qualify persons for as long as they continue to satisfy the requirements needed to obtain the certification or qualification, fulfill any applicable retraining

requirements, and remain employed at the same mine or by the same independent contractor. MSHA Forms 5000-4 and 5000-7 provide the coal mining industry with a standardized reporting format that expedites the certification process while ensuring compliance with the regulation. The information provided on the forms enables the Secretary of Labor's delegate—MSHA, Qualification and Certification Unit—to determine if the applicants satisfy the requirements to obtain the certification or qualification.

MSHA is presently in the process of streamlining its Forms. Forms 5000-4 and 5000-7 will be combined into one form 5000-41 for future use by coal mine operators. MSHA is requesting approval of this form.
