Proposed Project: Evaluation Questions for State Nutrition and Physical Activity Programs to Prevent Obesity and Other Chronic Diseases—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDHP), Centers for Disease Control and Prevention (CDC)

Background and Description: CDC's State Nutrition and Physical Activity

Programs to Prevent Obesity and Other Chronic Diseases were established to prevent and control obesity and other chronic diseases by supporting States in the development and implementation of nutrition and physical activity interventions, particularly through population-based strategies such as policy-level changes, environmental supports and the social marketing process. The goal of the program is to attain population-based behavior change in increased physical activity and better dietary habits; this leads to a reduction in the prevalence of obesity, and ultimately in a reduction in the prevalence of obesity-related chronic diseases.

The evaluation of CDC's State Nutrition and Physical Activity Programs to Prevent Obesity and Other Chronic Diseases has been designed to focus on three primary areas: CDC training and technical assistance; State Plan development; and State interventions. Within each of these primary evaluation areas, the plan identifies specific evaluation questions that have been chosen for study. The evaluation questions will be asked of the funded states via a web-based data collection system supported by an electronic database. This evaluation will take place every 6 months during the funding cycle.

Cost to the respondents: There is no cost to the respondents.
