Public Meeting/Open House

The Coast Guard and the Maritime Administration will host an informational open house from 3 p.m. to 7 p.m. on Tuesday, July 1, 2003, at the Lafayette Hilton Hotel, West Pinhook Road, Lafayette, Louisiana. A public meeting will be held concurrently with the informational open house, and will commence at 5 p.m. We invite the public and representatives of interested agencies to attend and provide their views on the proposed action and the evaluation contained in the draft EIS (A copy of the draft EIS is available as indicated under **ADDRESSES**). If you plan to attend the meeting and need special assistance, such as sign language interpretation or other reasonable accommodations, contact the U.S. Coast Guard as indicated in **FOR FURTHER INFORMATION CONTACT**.

Proposed Action

The application plan calls for construction of the Port Pelican Deepwater Port and associated anchorage in an area situated in the Gulf of Mexico approximately 36 miles south southwest of Freshwater City, Louisiana, in Vermilion Block 140. Additional information on the application can be found online at <http://dms.dot.gov> under docket number USCG-2002-14134, or in the notice of application published in the **Federal Register** at 67 FR 79234 (Dec. 27, 2002).

The proposed project would deliver natural gas to the United States Gulf Coast using existing gas supply and gathering systems in the Gulf of Mexico and southern Louisiana. Gas would then be delivered to shippers using the national pipeline grid through interconnections with major interstate and intrastate pipelines.

The project would consist of two concrete gravity based structure (GBS) units fixed to the seabed, which would include integral liquefied natural gas (LNG) storage tanks, support deck mounted LNG receiving and vaporization equipment and utilities, berthing accommodations for LNG carriers, facilities for delivery of natural gas to a pipeline transportation system, and personnel accommodations.

A 42-inch diameter offshore Pelican Interconnector Pipeline (PIPL), 37 nautical miles in length, would be constructed as part of the project. The PIPL would transport gas from the

terminal to a point near the Tiger Shoal Platform "A" where it would connect to the Henry-Floodway Gas Gathering System (HFGGS). The HFGGS would deliver the gas to the onshore U.S. gas pipeline network.

Alternatives

The draft EIS examines in detail an alternative location for siting of the project and a no-action alternative. The alternative site, approximately 30 miles east of Vermilion Block 140, would involve use of South Marsh Island Block 4.

Evaluation of the no-action alternative, defined as not approving the license application, provides a baseline for comparing the impacts associated with the proposed action and use of the alternative site.

(This is not a toll-free number).

SUPPLEMENTARY INFORMATION: The information collection for A Reporting System for the Public Law 102-477 Demonstration Project needs renewal. The 60-day notice requesting comments on OMB Control Number 1076-0135, "Public Law 102-477 Reporting," was published in the **Federal Register** on November 27, 2002 (67 FR 70963). We have held meetings with both tribal and Federal partners regarding the existing Public Law 102-477 tribal report forms. We have also shared the changes mandated by the government-wide employment and training OMB requirements with Federal partners and tribal representatives. Based upon our requests for input and recommendations, we are requesting two actions: (1) That tribes be able to use existing forms which will be gradually phased out as tribes are able to use new forms, but no later than September 30, 2003, and (2) we are requesting approval of the revised forms which will become effective October 1, 2003, at the latest. Tribes may adopt the new revised forms as they have made the necessary alterations to their computer programs and data collection forms so that they may adequately collect and accurately report the required data.

Abstract: The information collection is needed to document satisfactory compliance with statutory, regulatory and OMB requirements of the various integrated programs. Public Law 102-477 authorizes tribal governments to integrate Federally-funded employment, training and related services programs into a single, coordinated, comprehensive service delivery plan. Funding agencies include the Department of the Interior, Department of Labor, and the Department of Health and Human Services. The Bureau of Indian Affairs is statutorily required to serve as the lead agency. Section 11 of this Act requires that the Secretary of the Interior make available a single universal report format which shall be used by a tribal government to report on integrated activities and expenditures undertaken. The Bureau of Indian Affairs shares the information collected from these reports with the Department of Labor and the Department of Health and Human Services.

Method of Collection

Existing Forms: Currently, tribal governments voluntarily participating in Public Law 102-477 are required to annually complete two single page, one-sided report forms and one narrative report, which includes four pages of instructions. They replace 166 pages of instructions and applications
