application of a mandatory safety standard. A petition for modification may be granted if the Secretary determines (1) that an alternative method of achieving the results of the standard exists and that it will guarantee, at all times, no less than the same measure of protection for the miners affected as that afforded by the standard, or (2) that the application of the standard will result in a diminution of safety to the miners affected.

Abstract: Executive Order 12958 as amended, "Classified National Security Information" authorizes the Information Security Oversight Office (ISOO) to develop standard forms that promote the implementation of the Government's security classification program. This is a continuing authority, which was first given to ISOO with the issuance of the predecessor executive order on security classification, Executive Order 12356. Prior to E.O. 12356, executive branch agencies developed their own forms to address security needs. For example, each agency had a different cover sheet for each of the classification levels. With the issuance of Standard Forms SF 703, 704 and 705 in 1985, executive branch agencies began using the same standard form to serve as a shield to protect classified information at the Top Secret, Secret and Confidential levels. These forms promoted and continue to promote consistency and uniformity in the protection of classified information. An individual can go from one agency to another and know that an orange cover sheet has Top Secret information attached to it (SF 703).
