Title: NSPS for Lead-Acid Battery Manufacturing (40 CFR part 60, subpart KK) (Renewal) (OMB Control Number 2060-0081, EPA ICR Number 1072.07). This is a request to renew an existing approved collection that is scheduled to

expire on June 30, 2003. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The New Source Performance Standards (NSPS) for the regulations published at 40 CFR part 60, subpart KK, were proposed on January 14, 1980, and promulgated on April 16, 1982. These regulations apply to the following affected facilities in lead-acid battery manufacturing plants with production capacity that is equal to or exceeds 6.5 tons of lead: Grid casting facilities, paste mixing facilities, three-process operation facilities, lead-oxide manufacturing facilities, lead reclamation facilities, and other lead-emitting operations, commencing construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart KK.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports if using continuous emissions monitoring systems (CEMS). Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NSPS. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 62 hours (rounded) per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and

disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Lead-acid battery manufacturing plants/grid casting facilities, paste mixing facilities, three-process operation facilities, lead-oxide manufacturing facilities, lead reclamation facilities, and other lead-emitting operations.

Estimated Number of Respondents: 52.

Frequency of Response: Initial and semiannual, if using CEMS.

Estimated Total Annual Hour Burden: 4,053 hours (rounded).

Estimated Total Capital and Operations & Maintenance (O & M) Annual Costs: \$11,700 which includes no annualized capital/startup costs.

Changes in the Estimates: There is an increase of 3,930 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The net increase in labor burden from the most recently approved ICR is due to the inclusion of monitoring and recordkeeping requirements for sources using scrubbing systems in the burden calculation which had been omitted. We have determined that 25 percent of the sources (*i.e.*, 13 sources) would be required to monitor and record pressure drop across the scrubbing systems every 15 minutes. The inclusion of these rule requirements resulted in a significant net increase in labor hours even when the number of sources significantly decreased (*i.e.*, from 82 to 52) from the most recently approved ICR. The decrease in the number of sources did not affect the labor hours significantly because no periodic reports are required for existing sources. However, the decrease in the number of sources had a net decrease on the operation and maintenance costs associated with continuous monitoring devices when compared to the most recently approved ICR.

Imazalil; Availability of Risk Assessment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of documents that were developed as part of EPA's process for making pesticide reregistration eligibility decisions under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). These documents are the

occupational and ecological risk assessments and related documents for imazalil. This notice also starts a 60-day public comment period for the risk assessments. Comments are to be limited to issues directly associated with imazalil and raised by the occupational and ecological risk assessments or other documents placed in the docket. By allowing access and opportunity for comments on the risk assessments, EPA is seeking to strengthen stakeholder involvement and help ensure that our decisions under FIFRA are transparent and based on the best available information. The Agency cautions that the risk assessments for imazalil are revised; however, further refinements may be appropriate. Risk assessments reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

DATES: Comments, identified by the docket ID number OPP-2003-0217, must be received on or before August 25, 2003.

ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit I. of the **SUPPLEMENTARY INFORMATION**.
