The redevelopment project will also include a mixture of commercial uses and improvements to community facilities such as expanding the existing health clinic, day care, family investment center, and gymnasium. Alternatives to be considered in the EIS include a no action alternative, a 1,270-unit alternative, and a 1,500-unit development.

Background

Under a Candidate Conservation Agreement with Assurances, participating landowners voluntarily implement conservation activities on their property to benefit nonlisted species that are proposed or candidates for listing under the Act, or other sensitive species. Landowners may be willing to implement measures that enhance populations of sensitive species on their property, but may be reluctant to do so because of potential land-use restrictions that could occur should the species eventually be listed under the Act. As a result of this potential regulatory concern, Candidate Conservation Agreements with Assurances encourage private and other non-Federal property owners to implement conservation efforts and reduce threats to non-listed species by assuring landowners that they will not be subjected to increased property use restrictions beyond those identified in
