

NUCLEAR REGULATORY COMMISSION

10 CFR Chapter I

RIN 3150-AH33

Electronic Maintenance and Submission of Information

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its rules to clarify when and how licensees and other members of the public may use electronic means such as CD-ROM and e-mail to communicate with the agency. These amendments are necessary to implement the Government Paperwork Elimination Act (GPEA). At the same time that the NRC is amending its rules, it is also making available guidance on how to submit documents to the agency electronically. When this final rule becomes effective, this new guidance document, which is appended to this rule, will supersede earlier guidance on electronic submissions.

EFFECTIVE DATE: The final rule will become effective on January 1, 2004.

ADDRESSES: The final rule and any related documents are available on the NRC's interactive rulemaking Web site at <http://ruleforum.llnl.gov>. For information about the interactive rulemaking site, contact Ms. Carol Gallagher, (301) 415-5905, CAG@nrc.gov.

I. Background

On September 6, 2002, the Nuclear Regulatory Commission (NRC) published the direct final rule, "Electronic Maintenance and Submission of Information" (RIN 3150-AF61), for comment (67 FR 57084). Along with the rule, the NRC also published its draft "Guidance for Electronic Submissions to the Commission" for comment.

This rulemaking had the simple aim of conforming the NRC's regulations to the GPEA by removing from the regulations language that states or suggests an unnecessary prohibition of electronic submission of documents to the agency. Because the NRC believed that this action would not cause controversy, the NRC initially published these amendments as a direct final rule. However, the NRC received significant adverse comments on both the direct final rule and the guidance document appended to the rule. The NRC, therefore, withdrew the direct final rule on December 4, 2002 (67 FR 72091), and treated the comments received as comments on the companion proposed rule published concurrently with the direct final rule (67 FR 57120; September 6, 2002). The comments received are addressed in this final rule and guidance.

The NRC received formal comments from 19 persons or organizations. The comments concerned both the rule and the draft guidance. However, the majority of the comments were on the guidance document. Although the NRC is not required to address the comments received on its proposed guidance, the NRC believes that it is appropriate to document the resolution of the comments on the guidance document, and to do so in this notice, because the rule and the guidance are being published simultaneously and form a cohesive package.

Title XVII of Pub. L. 105-277, the Omnibus Consolidated and Emergency Supplemental Appropriations Act of 1999, enacted October 21, 1998,

contains provisions known as the Government Paperwork Elimination Act (GPEA), Sections 1701 *et seq.*, codified at 44 U.S.C. 3504, note. The GPEA requires, among other things, that by October 21, 2003, all Federal agencies provide persons with business before that agency the option of electronically maintaining, submitting, or disclosing information where "practicable." By that same October 2003 date, the agencies must also accept electronic signatures. The Act's provisions seek to take advantage of advances in modern technology to lessen the paperwork burden on those who deal with the Federal government.

Well before the passage of the GPEA, the NRC had taken major steps to increase the use of electronic communication. For example, many of the agency's regulations on recordkeeping have long permitted storage in electronic format. After the GPEA became law, the NRC moved quickly to meet the Act's requirements. In June 1999, the agency began testing a system that permitted holders of operating licenses for nuclear power reactors, and the vendors that supplied them, to make electronic submissions to the agency in a secure manner. On several occasions, the NRC held public meetings with licensees, vendors, and others to describe and demonstrate its Electronic Information Exchange (EIE) capability.

As a result of this pilot program, on January 26, 2001, the NRC issued Regulatory Issue Summary (RIS) 2001-05, "Guidance on Submitting Documents to the NRC by Electronic Information Exchange or on CD-ROM," which informs all Part 50 applicants and licensees that they have the option of submitting documents to the NRC over the Internet by the EIE process or on CD-ROM under procedures spelled out in the RIS. The RIS does not cover electronic submissions under regulations other than those in Part 50. However, on August 10, 2001, the agency issued a letter to certain fuel cycle facilities giving them the option of electronic submissions in many circumstances.¹ Nonetheless, these two documents do not cover other materials licensees or members of the general public.

II. The Final Rule

This rulemaking expands participation in electronic submissions by affording all licensees, vendors,

¹ The NRC has also issued guidance on managing quality assurance records in electronic media. See RIS 2000-18, October 23, 2000, available at the NRC's Web site.

applicants, and members of the public the option, where practicable, of submitting documents to the NRC in an electronic format, for example on CD-ROM, by e-mail, or through a special Web-based interface such as the NRC's Electronic Information Exchange. Generally, electronic submission of documents to the NRC remains voluntary; paper documents remain an acceptable form of submission.

The GPEA requires that agencies accept electronic submissions only when it is "practicable" to do so, but the statute does not define the term "practicable." At the very least, it is not "practicable" for the agency to receive electronic submissions unless they are made in a manner that enables the agency to receive, read, authenticate, distribute, process and retrieve a page at a time, and archive the submissions. The final regulations in this notice incorporate this general notion of "practicable." Although the proposed rule did not contain this language, we have added it throughout the final rule in part to make clear that the agency cannot as a practical matter accept electronic communications in every format that submitters might choose.

However, beyond this, the term acquires meaning only in concrete circumstances and moreover tends to change as those circumstances change because the underlying technology changes quickly. Under these continually changing circumstances, the NRC does not want to write certain technologies into its regulations. Therefore, the technologically driven details of how to make electronic submissions to the NRC are laid out in the guidance document that is appended to this rule. The guidance document will be updated as necessary to reflect new technology and agency experience. The guidance discusses, among other topics, the formats the NRC is prepared to accept, the use of electronic signatures, and the treatment of nonpublic information. Most of the amendments made by this rule take the limited approach of letting readers of the regulations know that the option of electronic submission is available in many cases, and that readers should consult the agency's guidance on electronic submissions.

The NRC has also used the criterion of practicability to determine to what extent sensitive information could be protected in electronic submissions, whether such submissions could serve the needs of immediate notification, and whether the agency was prepared to make all of its outgoing communications electronic. In each of these cases, as will be discussed further below, the agency

has concluded that electronic submissions are not yet always "practicable" because use of electronic submission in these other situations can entail disproportionate costs in time, labor, and other resources, and sometimes can even delay doing something that needs to be done quickly. Since one aim of the GPEA is to increase the efficiency of government, when the use of electronic media for submission decreases efficiency, the use of electronic media is, at least for the time being, not "practicable."

Public comments on the proposed rule have led us to make a significant change in what we consider "practicable." The proposed rule would have continued to require multiple copies of paper submissions (though in reduced numbers), and would, moreover, have required the same number of copies of documents submitted on CD-ROM. However, in light of the comments, the NRC has decided to eliminate nearly all requirements for multiple copies, and most of the changes to the proposed rule implement that decision. We say "nearly all," because we have retained, and made more explicit, the requirement in Part 63 that the application for a license for a first-of-a-kind high-level waste repository at Yucca Mountain, Nevada, be submitted in multiple paper copies. We have not wished to introduce new options into a unique process that has come far enough to give the probable participants reasonably settled expectations about how the application will be submitted and distributed. Moreover, given the technology that is reasonably available to all the probable participants, the application is more likely to be distributed in a timely way if the current regulations are adhered to; and, given the statutory time limit on the length of the licensing proceeding, time is of the essence.² However, these same arguments do not apply to possible future applications under the generic

² For similar reasons, we have revised § 63.22 to require that the license application, any amendments to the application, and the environmental impact statement and its supplements for the Yucca Mountain facility be submitted also on optical storage media. In fact, the Department of Energy has already submitted the final environmental impact statement for Yucca Mountain on optical storage media. Moreover, this new requirement in § 63.22 is virtually entailed by the existing requirement in 10 CFR 2.1013(a)(2) that the application be docketed in electronic form, and that the Secretary of the Commission determine that the application can be properly accessed under the Commission's rules for the electronic docket in the Yucca Mountain proceeding. Indeed, if the Secretary cannot make such a determination, the agency may reject the application as unacceptable for docketing. See 10 CFR 2.1012(a).

high-level waste regulations in Part 60, and so the requirements for multiple copies have been removed from that part. For a related discussion of the meaning of "practicable," see the beginning of Section III of this notice.

This single copy policy represents a major change in the way the NRC does business, and, as is noted later, the agency may have to make exception to the policy when dealing with CD-ROMs that contain certain kinds of files. The GPEA requires agency compliance by October 21, 2003, where practicable. The rule and guidance are being published by that date. However, the transition to electronic communications will be gradual. The NRC has established January 1, 2004, as the effective date of the rule and guidance document. It is not practicable to implement fully the rule and guidance any sooner. The guidance document has been updated to include several new sections on organizing and segmenting files. These new sections will enhance the NRC's capability to produce paper copies. In the meantime, the delayed effective date for the rule and guidance will allow additional time for the NRC to develop its implementation plan and procedures and prepare to meet its staff's requirements for on-demand paper and CD-ROM copies. This delay will also allow both the NRC staff and submitters (particularly NRC licensees) more time to become familiar with the guidance and to modify their business processes (as appropriate) to achieve a successful transition to the electronic environment. The existing guidance documents on electronic submissions, Regulatory Issue Summary 2001-05 (which was directed toward Part 50 licensees and applicants) and the August 10, 2001, letter (which was directed toward certain fuel cycle facilities) will remain in effect during the period between the required GPEA compliance date (October 21, 2003) and the effective date of this final rule (January 1, 2004). When this final rule takes effect, the new guidance document will supersede both of the existing guidance documents on electronic submissions.

Few of the NRC's regulations on communications explicitly rule out electronic communications. Thus, it has not proven difficult to remove regulatory text that impedes electronic communications in circumstances where electronic communications would be practicable. In searching our regulations, we found only one regulation—§ 50.4(c)—that explicitly required the submission of paper. Many of our regulations require written, or written and signed, communications.

These requirements need not be changed, because electronic communications certainly are "written" and we have in place technology for electronic signatures.

We have not had to propose amendments to our regulations on maintenance of records. A great many of these regulations already explicitly permit the use of electronic means to maintain records, and those that do not explicitly permit electronic maintenance of records do not in any way imply that electronic strategies for preservation are disallowed.

Thus, our amendments to existing regulations are confined largely to regulations that imply that electronic means of communication are prohibited. The typical regulation of this sort says that communications under a certain part of our regulations must be by mail or delivery in person. By appearing to be exhaustive, the regulation may be read to imply that electronic communication is prohibited. We have amended almost all of these or similar provisions, leaving in place only those regulations that dictate telephonic or similar communications when circumstances demand, as, for example, when a licensee must notify the agency promptly of a radiological overexposure or an accidental release of radioactive material.

These rulemaking amendments and the guidance document appended to this final rule do not address the submission of documents in hearings under the NRC regulations in 10 CFR part 2 and other parts that govern hearings. In particular, the amendments and guidance do not apply to proceedings under 10 CFR part 2 Subpart J, on the issuance of licenses for high-level waste repositories. Subpart J will continue to govern those proceedings. The use of electronic submissions in litigation in Federal courts and agencies is being widely discussed, and this rulemaking is not intended to resolve issues of when and how to use electronic submissions during hearings. Separate rules or guidance addressing procedures for electronic communications in hearings will be issued in the future for public comment. For at least the near future, parties in hearings must follow the directions that presiding officers issue on how submissions are to be made.

This final rule applies only to communications to the NRC from licensees, certificate holders, applicants, vendors who are required to submit documents to the NRC, external entities (Federal, State, and local governments) and other members of the public, but the GPEA is read to apply also to

communications from Federal agencies to the public. Though the NRC is working to further this aspect of the GPEA also, it is not yet practicable for the agency to send all of its communications to licensees and other members of the public by means of electronic submissions. Moreover, the agency must take into account that not all persons who are interested in its work have access to electronic communication. Nonetheless, the NRC's EIE process is designed for both receiving and sending electronic communications. Moreover, the NRC posts a large amount of information on its external Web site, including significant agency communications, and makes information publicly available via ADAMS, the NRC's electronic recordkeeping system.

III. Comments on the Guidance Document

This analysis presents a summary of the significant comments received on the draft guidance and the resolution of those comments by the NRC. The guidance has also been revised to incorporate editorial corrections, clarifications, and updates of the information, as appropriate.

Comment 1: The majority of the commenters objected to the NRC's proposed requirement that a paper copy accompany all submissions on CD-ROM. The commenters disagreed with this requirement, indicating they have moved to an electronic environment based on NRC guidance contained in RIS 2001-05, which states that submissions made on CD-ROM do not require the submission of a paper copy. Several commenters stated that the NRC's paper copy requirement with submissions on CD-ROM was based on the NRC staff's unwillingness to use electronic versions, and the agency's unwillingness to purchase printing equipment that would enable it to make paper copies from the CD-ROM submissions.

Response: The NRC proposed that a paper copy be required with CD-ROM submittals because the NRC is required to make information accessible to both its staff and the public. On the public side, this means making the information available not only to those who have the technology to access electronic information, but also to those who do not have access to computers and the Internet. Requiring a paper copy provides the NRC with an efficient means of reproducing documents for members of the public who do not use the technology for various reasons. The paper copy is also a means of making information accessible to individuals

with handicaps, as stipulated in section 508 of the Rehabilitation Act. Many of the formats currently being adopted for electronic information are images of textual information. These images do not work with the assistive technologies currently on the market. However, there are technologies available for converting text from paper to accessible formats for use by the handicapped. Thus, the NRC needs access to paper copies of many electronic submissions in order to provide information to the public.

Before establishing the requirement for submission of a paper copy with CD-ROM submittals, the NRC tested its ability to make copies from samples of CD-ROMs received from several nuclear utilities. Sample CD-ROMs were also provided to leading suppliers of printing and duplication services in the Washington, D.C., area to solicit cost estimates and to verify each supplier's ability to make paper copies from CD-ROMs submitted to the NRC. Both NRC and the local printing community have equipment that could print any file on the sample CD-ROMs. However, in some instances, the complexity of the file structures on the CD-ROM made it almost impossible to accurately reconstruct paper copies from the submissions. In those instances, the cost of creating paper copies from the CD-ROM would be prohibitive. Therefore, the NRC proposed that the individuals who create the documents (licensees, applicants, etc.) provide a single paper copy for use by the NRC for duplication purposes.

Nonetheless, after evaluating the public comments, the NRC is deleting from the guidance the requirement for a paper copy. In those instances where the NRC requires a paper copy for accessibility or other reasons, it will make every effort to produce the copy using NRC resources. The updated guidance includes several new sections on organization and segmentation of files being submitted to the NRC. The new sections will facilitate the NRC's capability to produce paper copies. However, when the agency is unable to successfully generate an accurate paper copy from the CD-ROM, the NRC may require the submitter to produce a paper copy. This will be handled on a case-by-case basis.

Comment 2: Commenters encouraged the NRC to develop the capability to handle many of the types of documents listed as "Exceptions to Electronic Submission" in the guidance.

Response: Many of the exceptions to electronic submission are not related to the capabilities of NRC systems to handle the electronic information. Some are driven by regulations and processes

that are not within the NRC's control. However, the NRC will continue to work to enhance the capabilities of the Electronic Information Exchange (EIE) process in the hope of accommodating some of the current exceptions to electronic transmissions. Since the draft was issued, the EIE capabilities have been enhanced to allow the submission of proprietary, privacy, and official-use-only information. For example, in the proposed guidance, fingerprint cards were listed as an exception to transmission via EIE. Under the current guidance, fingerprints can be transmitted via EIE.

Comment 3: The guidance limits the versions of software formats that may be submitted. In some cases the software versions prescribed by the NRC are not the current versions. The NRC should try to keep up with the latest versions of software.

Response: In the Federal environment, upgrades to the latest software can take time. However, the NRC agrees to take steps to ensure the timely approval of the most current versions of software for making submissions to the agency. However, based on National Archives and Records Administration (NARA) guidance documents issued subsequent to publication of the NRC's draft guidance, NRC is restricting the software format versions that are acceptable for submissions to the agency to the current and two prior versions. The guidance has been updated to incorporate this change.

Comment 4: Several commenters stated that versions of software should not be dictated and that there should be no restrictions on the use of versions of software.

Response: The NRC is required to transfer permanent records to NARA in an approved format. NARA currently does not allow submission of documents created using proprietary software. Thus, documents must be converted to an acceptable publicly available format.

Therefore, the NRC must require submitters to provide electronic information in one of the NARA-approved formats.

NARA further restricts formats by only accepting documents converted using the current version or the two previous versions of the software. The NRC is adopting the same approach for submissions to the agency.

The NRC has decided that only documents in one of the NARA-approved PDF formats (see Section 2.1 of the guidance document) or in one of the formats listed for transfer of spreadsheets that are intended for

further calculations by the NRC staff are acceptable for electronic submission to the NRC.

Comment 5: Some comments stated that the use of a three-digit numeric prefix in file names is too prescriptive, complicates production of documents, and is unnecessary.

Response: The NRC has several years of experience reviewing and attempting to capture documents submitted to the agency in electronic form. NRC has learned that, in many instances, it is almost impossible to decipher the correct order in which to capture the files to duplicate the document on the transfer medium. Each document submitted to the NRC is created differently, according to the business needs of the creating entity and the level of expertise in the use of the capture software by the individual who creates the document. In many instances the file structure, use of folders, other formatting conventions used, and the relationships between files cannot be determined. Microsoft Explorer and other file management tools further complicate the situation by reordering the file structure. Thus, the file structure of the document cannot be duplicated in the NRC's systems. As a result, the NRC is unable to capture these submissions in its electronic document/records management system. These submissions are currently managed outside of NRC's electronic document management systems as individual objects, maintained on the transfer medium provided. This creates migration and transfer issues that have to be managed on an individual basis. The use of the three-digit prefix is an effort to simplify document capture, ensure correct ordering of files, and increase the accuracy and fidelity of the information captured in the NRC's electronic systems.

For these reasons, the NRC will continue to require a three-digit prefix on all files submitted electronically.

Comment 6: Most comments received included remarks about the maximum file size that can be submitted electronically to the NRC. These comments all requested that the file size limit be increased.

Response: The NRC contracted for a study to evaluate the most logical file size limit based on receipt and capture of incoming files and issues related to access, retrieval, and transfer via the Internet. This study concluded that the optimal file size limit for use by the NRC is 50MB. Therefore, the NRC is modifying its guidance to raise the file size limit for both EIE and CD-ROM submissions to 50MB per file. The NRC had previously proposed a 20MB limit.

Additionally, the NRC has discovered that small files are problematic because large numbers of small files require significant resources to capture and profile in electronic document management systems. Therefore, the NRC encourages submitters to combine files that are parts of larger documents to create 50MB files that can be more economically and efficiently managed.

Comment 7: Several comments stated that the resolution standards for images provided to the NRC are too high.

Response: The resolution standards included in the draft guidance were based on the NRC's experience with images and requirements identified by Adobe to ensure that images can be migrated. This proposed guidance was developed by the NRC before the availability of Government-wide guidance from NARA. Since the draft guidance was published, NARA has issued standards for the transfer of scanned images and PDF documents to NARA. The NRC is adopting these standards in Section 2.5 of the guidance so that the agency can comply with the NARA transfer requirements. The NARA guidance specifies higher resolution levels than proposed originally by the NRC for some image forms. The NRC's original proposed standard was 300 dots per inch (dpi) for Bi-tonal (Black and White) and 200 dpi for Color and Grayscale. The revised standard is 300 dpi for all three.

Comment 8: Several comments stated that the NRC should specify a standard format for submission of documents on CD-ROM that would allow for the upload of the documents into NRC systems.

Response: The NRC agrees. A new section has been added to the guidance (Section 2.14) to cover requirements for segmenting large documents, and another (Section 4.3) has been revised to cover requirements for the accompanying transmittal letter to facilitate the capture of CD-ROM submissions in ADAMS and other NRC systems.

IV. Section-by-Section Analysis

Well over 100 of our regulations are being amended by this final rule. However, we are making only a very few kinds of changes, and so an analysis of each and every amended section would be highly repetitious and, more important, would obscure the aims and forms of the amendments. Therefore, rather than describe each amended section, we will describe only the typical changes we are making and why we are making them.

Many of the kinds of changes are adequately represented by the proposed changes to sections of Part 30.

(1) The changes to § 30.6, "Communications," are examples of the most important kind of amendment in this rule. Section 30.6 and its analogues in other parts of the NRC's regulations have typically said that communications are to be mailed or delivered by hand to the agency or one of its regional offices. The amended section makes clear that the current list of options is not exhaustive, and that electronic communications are permitted where "practicable." The amendment refers readers to guidance for answers to questions about what is practicable and how electronic submissions are to be made. The NRC has developed a guidance document that provides specific information concerning electronic submissions. This guidance document appears as an appendix to this final rule. Please note that the guidance document will not be codified in the Code of Federal Regulations.

A variation on § 30.6 requires that paper submissions be on a "page-replacement" basis or that an envelope be marked a certain way. See, for example, § 72.70(c) and § 9.67. We have also amended these regulations to make clear that an electronic option is available on a full-replacement basis.

The amendment of § 30.6 illustrates a general principle we have followed throughout the amendments, namely, that the amended regulations should contain no less information than the previous regulations. We had considered saving time and reducing printed regulatory text by leaving existing communications regulations unchanged and simply adding to Chapter I of Title 10 of the Code of Federal Regulations a single new regulation on communications, applicable to communications under every part of the NRC's regulations. This regulation would have said that, with certain exceptions, the electronic option was available, notwithstanding what any other NRC communications regulation said. However, regulations on communications then would have contradicted each other, and readers of one of the other parts could have been misled by the part they were reading into thinking that communications had to be by mail or delivery in person. Thus, to avoid inconsistencies and to ensure that the new regulations contain as much information as the old ones, we have revised any section that, because it mentioned only one or two options for communications, implied that the electronic option was ruled out. Thus,

we have amended § 30.6 in several places.

(2) The amendments to § 30.50(c), "Reporting requirements," and § 30.55(c), "Tritium reports," are instances of a second major class of amendment in this final rule. The sections amended by this class typically required two or three kinds of notification to the NRC—a more or less immediate notification by phone or sometimes telefax or telegram of an incident, a pending shipment, or other time-sensitive matter; then a followup report several hours later, again by phone, telefax, or telegram; and finally, several days later, a written report to the appropriate office director. Section 30.50 requires all three kinds of reports. Generally speaking, we have not added an electronic option for the first two kinds of reports, the short-term ones, because the aims of these required reports are best served by consistently stable, rapid, and fully interactive means of communications. Electronic Information Exchange communications may not yet consistently meet these needs. E-mail delivery times, for example, can still be measured in days sometimes, and even "instant messaging" does not always permit the same facility of information exchange and discussion that the telephone permits. Thus, we have concluded that, at the present time, electronic communication of short-term reports is not yet "practicable." We will revisit these requirements as the technology advances. Nonetheless, the amendments in this final rule add the electronic option for communicating written followup reports required by §§ 30.50 and 30.55 and their analogues.

(3) The amendment to § 30.7(e)(3) is an example of a third class of amendment that is less important than the two that have already been discussed. Several regulations require that a licensee or applicant acquire a copy of an NRC form, either for posting at the licensee's facility (as in the case of § 30.7), for filling out and sending to the NRC to apply for a license, or to meet a reporting requirement. These regulations typically say that the form may be acquired by writing to a certain address or by calling a certain number. The amendments to these sections add that the forms may be acquired by visiting the NRC's Web site.

In addition, throughout the regulations we have also eliminated requirements for multiple copies of submissions. For example, § 51.66 previously required submittal of 25 copies of the environmental report and retention of an additional 125 copies for later distribution. The submittal requirement is now being reduced to a

single copy, and instead of being required to retain copies, an applicant will be required to maintain the capability to generate additional copies as directed.

This final rule text also makes a number of minor changes to reflect other final rules that the NRC has issued since the proposed rule on electronic submissions was issued. The text also contains a number of administrative changes, such as changes in phone numbers and street and e-mail addresses.

V. Voluntary Consensus Standards

The National Technology Transfer and Advancement Act of 1995 (NTTAA), Pub. L. 104-113, requires that Federal agencies use technical standards that are developed or adopted by voluntary consensus standards bodies unless using such a standard is inconsistent with applicable law or otherwise impractical. In this final rule, the NRC is not adopting any technical standard. It is simply helping to ensure, through a rulemaking, that the agency will be in timely compliance with the requirement in the Government Paperwork Elimination Act, Pub. L. 105-277, that Federal agencies allow electronic submissions of information where practicable. Thus, no showing of compliance with the NTTAA is necessary here.

VI. Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(2), because this action seeks nonpolicy, procedural changes to the NRC's regulations. Moreover, because of the broad nature of this action and the number of the NRC's regulations affected, several other categorical exclusions apply to this rule, including 10 CFR 51.22(c)(1) and (3)(i)-(iii). Also, 10 CFR 51.22(c)(16) applies to the guidance being issued in connection with this rule and to the rule itself. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for these changes to the regulations. Because of its procedural nature, this action does not raise environmental justice concerns.

VII. Paperwork Reduction Act Statement

The Office of Management and Budget (OMB) has determined that, because this final rule provides the option of collecting information by use of electronic means but does not amend the existing information collections to

which the rule pertains, OMB's review and approval under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 and following) are not required.

VIII. Regulatory Analysis

A regulatory analysis has not been prepared for this rulemaking. The amendments below will neither impose new nor relax existing safety requirements and, thus, do not call for the sort of safety/cost analysis described in the agency's regulatory analysis guidelines in NUREG/BR-0058. Moreover, the NRC is required by the Government Paperwork Elimination Act, Pub. L. 105-277 (44 U.S.C. 3505, *note*), to allow electronic submissions where practicable, and the final rule does simply that. Thus, an analysis of costs and benefits could not alter a decision to implement the policy embodied in this rule. However, the NRC believes that the rule will afford all persons who deal with the agency greater flexibility in choosing the format of many of their communications and, thus, will allow them to choose less costly alternatives, often reducing the current costs of their communications with the NRC.

IX. Regulatory Flexibility Certification

In accordance with section 605(b) of the Regulatory Flexibility Act (Title 5, Chapter 6 of the U.S. Code), the Commission certifies that this rule does not have a significant economic impact on a substantial number of small entities. Therefore, in accordance with section 605(b), the NRC is not preparing a regulatory flexibility analysis. The rule will in fact apply to the many small entities that are among the NRC's licensees, but it will impose no new burdens on those small entities. To the contrary, as noted in the regulatory analysis section of this notice, the agency's expectation is that the rule will reduce burdens.

The NRC is providing the certification to the Chief Counsel for Advocacy of the SBA, in accordance with section 605 of the Regulatory Flexibility Act.

X. Backfit Analysis

The NRC has determined that a backfit analysis is not required for this final rule because these amendments do not include any provisions that would require backfits as defined in 10 CFR Chapter I. Furthermore, this rule is necessary so that the NRC can respond adequately to the mandate in the Government Paperwork Elimination Act of 1998 that Federal agencies "provide for the option of the electronic maintenance, submission, or disclosure of information, when practicable as a

substitute for paper * * *'' (Pub. L. 105-277, Sec. 1704). Therefore, a backfit analysis has not been prepared for this final rule.

XI. Congressional Review

The provisions of 5 U.S.C. 801 *et seq.*, which govern congressional review of rulemakings, do not apply to this rulemaking because it concerns agency procedure and practice and will not substantially affect the rights and obligations of nonagency parties. See 5 U.S.C. 804(3)(C).

1.0 Introduction

1.1 Background

On October 10, 2003, the Nuclear Regulatory Commission (NRC) promulgated a final rule on electronic submission of information to the agency. This rule modified many NRC regulations to explicitly authorize electronic communications with the agency. The final rule stated that the NRC would issue specific guidance on acceptable procedures for electronic submissions. That guidance is contained in this document. This guidance document is the controlling source of information on electronic submissions to the NRC and supersedes *NRC Regulatory Issue Summary 2001–05, Guidance on Submitting Documents to the NRC by Electronic Information Exchange or on CD-ROM*, and the August 10, 2001, letter issued to certain fuel cycle facilities extending to them the option of electronic submissions in many instances. The NRC plans to update this guidance periodically to reflect changes in technology and agency experience by posting the latest version of the document on NRC's Web site at <http://www.nrc.gov>. While the Commission encourages the submission of electronic documents, submission of paper documents remains acceptable.

1.2 Scope

This guidance document governs the electronic submission of documents to the NRC. It includes the required procedures for corresponding electronically with the NRC via the Internet using Electronic Information Exchange (EIE), by CD-ROM, or by e-mail. It also includes procedures for corresponding by facsimile (fax). It does not address outgoing NRC communications.

NRC's Electronic Information Exchange (EIE) allows NRC to exchange information related to official agency business with its customers and other Federal agencies across the Internet. The EIE system uses a public key infrastructure and digital signing technology to authenticate documents and validate the identity of the person submitting the information. That is, the system ensures that the exchanged information is secure and that the person submitting the material is, in fact, who is indicated. It requires the use of digital signatures and certain software plug-ins. Procedures for acquiring a digital signature for communicating with the NRC via EIE can be found at Section 3.5, and procedures for acquiring the required software can be found at Section 3.6.

The NRC has enhanced its EIE system capabilities with a robust engine for facilitating the transmission process. The NRC encourages its user community to use EIE and evaluate its enhanced capabilities.

1.3 Applicable Transactions

Documents or other information submitted under oath or affirmation, or other documents where secure transfer is either required or appropriate, should be submitted over the Internet using EIE or submitted on CD-ROM. While e-mail and facsimiles are not appropriate for most submissions

required by NRC regulations, they may be used for certain other correspondence and communications with the NRC, such as rulemaking petitions and comments on rulemaking proceedings, communications with States and other Federal agencies, requests for enforcement actions under 10 CFR 2.206, and Freedom of Information Act (FOIA) requests and appeals, but not for information covered under the Privacy Act.

E-mail may be addressed to either specific individuals named as contacts in **Federal Register** Notices or other agency communications, or to the office specified in the regulation or communication specific to the document(s) being submitted; to addresses the NRC Web site provides for individual program offices or specific agency functions or services; or to the Office of Public Affairs. Individual program offices may be contacted through the NRC Web site at <http://www.nrc.gov> by selecting specific contact pages from "Contact Us" on the home page. The Office of Public Affairs may be reached through the "Contact Us" on the home page or at OPA@nrc.gov (use upper case where indicated). The sender will not receive an e-mail confirmation of receipt of the submission except for those communications using EIE.

1.3.1 Exceptions to Electronic Submission

A. All communications with the NRC may be submitted electronically via the Internet using Electronic Information Exchange except for the following:

1. Classified Information (*i.e.*, National Security Information and Restricted Data), and Safeguards Information. This information may only be submitted electronically on CD-ROM.

2. "Immediate" or "prompt" notifications to the NRC that NRC regulations require be made by telephone or telefax up to one week before or after an event (*e.g.*, 10 CFR 30.50 or 30.55(c)).

3. Notice of filing of bankruptcy petition, whether voluntary or involuntary (*e.g.*, 10 CFR 30.34(h)(1)).

4. Hearing requests, and documents pertaining to hearings or associated appeals, including, but not limited to, those associated with hearings conducted under 10 CFR parts 2, 4, 10, 12, 13, 14, 16, 19, 25, 76, 81, 110, 140, and 150. Separate rules or guidance addressing procedures for electronic communications in hearings will be issued in the future for public comment. (Nothing in this guidance document precludes presiding officers from their current practice of authorizing electronic communications on a case-by-case basis.)

5. Documents served on the NRC as a participant in Federal Court proceedings or in non-NRC administrative proceedings (such as administrative proceedings before the Merit Systems Protection Board, unless electronic submission is authorized by rule or order issued by a Federal Court or Agency).

6. NRC contractor proposals or invoices submitted in response to specific contractual requirements. (Because Federal Acquisition Regulation guidance as contained in Section 30 of the Office of Federal Procurement Policy Act [41 U.S.C. 426] allows the Federal Government to use electronic commerce

whenever practical, guidance for electronic submittal of proposals and invoices will be addressed in individual procurements. Further guidance for submission of these documents will be issued at a later date.)

7. Financial assurance instruments to meet decommissioning cost requirements and prescribed by regulation at 10 CFR 30.35(e) and (f); 10 CFR 40.36(d) and (e); and 10 CFR 70.25(e) and (f) (including surety bonds, letters of credit, lines of credit, and insurance).

8. Documents with special printing requirements. (*See* section 2.8). This information may only be submitted electronically on CD-ROM.

9. Segmented documents or files larger than 50 megabytes (MB). (*See* section 2.14.) This information may only be submitted electronically on CD-ROM.

B. All communications with the NRC may be submitted electronically on CD-ROM except for the following:

1. "Immediate" or "prompt" notifications to the NRC that NRC regulations require be made by telephone or telefax up to one week before or after an event (*e.g.*, 10 CFR 30.50 or 30.55(c)).

2. Notice of filing of bankruptcy petition, whether voluntary or involuntary (*e.g.*, 10 CFR 30.34(h)(1)).

3. Hearing requests, and documents pertaining to hearings or associated appeals, including, but not limited to, those associated with hearings conducted under 10 CFR parts 2, 4, 10, 12, 13, 14, 16, 19, 25, 76, 81, 110, 140, and 150. Separate rules or guidance addressing procedures for electronic communications in hearings will be issued in the future for public comment. (Nothing in this guidance document precludes presiding officers from their current practice of authorizing electronic communications on a case-by-case basis.)

4. Documents served on the NRC as a participant in Federal Court proceedings or in non-NRC administrative proceedings (such as administrative proceedings before the Merit Systems Protection Board, unless electronic submission is authorized by rule or order issued by a Federal Court or Agency).

5. NRC contractor proposals or invoices submitted in response to specific contractual requirements. (Because Federal Acquisition Regulation guidance as contained in section 30 of the Office of Federal Procurement Policy Act [41 U.S.C. 426] allows the Federal Government to use electronic commerce whenever practical, guidance for electronic submittal of proposals and invoices will be addressed in individual procurements. Further guidance for submission of these documents will be issued at a later date.)

6. Financial assurance instruments to meet decommissioning cost requirements and prescribed by regulation at 10 CFR 30.35(e) and (f); 10 CFR 40.36(d) and (e); and 10 CFR 70.25(e) and (f) (including surety bonds, letters of credit, lines of credit, and insurance).

1.3.2 Electronic Forms and Payments

Each form referred to in the NRC regulations can be found on the NRC Web site at <http://www.nrc.gov> in PDF format for viewing and printing by selecting "Forms"

from the index found on the home page and selecting the specific form required.

Financial payments required by regulations can be submitted electronically. Copies of NRC Form 628 to establish financial authorization electronically can be found at the NRC Web site at <http://www.nrc.gov> by selecting "Forms" from the index found on the home page. Payments by credit card of civil penalties, part 171 annual fees, part 170 licensing and inspection fees, and other fees, may be done by completing the authorization form included with the invoice or civil penalty. A copy of the form may be printed from the NRC Web site at <http://www.nrc.gov> by selecting "Forms" from the index found on the home page and selecting "NRC Form 629, Authorization for Payment by Credit Card."

1.3.3 Submissions Requiring Oath or Affirmation

Submissions requiring oath or affirmation may be submitted electronically using EIE or on CD-ROM. (*See* sections 3.7 and 4.3.2 of this guidance document.) These include the following:

1. Documents that by statute must be submitted under oath or affirmation (*e.g.*, pursuant to section 182 of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2232). Generally, oath or affirmation requirements apply to applications for a license, amendments to a license, some licensee responses to Notices of Violation (NOV), and certain letters of transmittal. NRC's regulations in 10 CFR parts 2 and 50 implement these statutory requirements; certain regulations require an oath or affirmation for submission of documents (*see, e.g.*, 10 CFR 50.54(f) and 10 CFR 50.30(b)).

2. Documents that must be sent by certified mail (*e.g.*, 10 CFR part 30, appendix A II. C. 2).

1.3.4 10 CFR Part 2 Submissions

Rulemaking petitions, comments filed in rulemaking proceedings (10 CFR part 2, subpart H), and requests for enforcement action under 10 CFR 2.206 may be submitted via EIE, CD-ROM, or e-mail. Other documents submitted pursuant to 10 CFR part 2, subpart B, "Procedure for Imposing Requirements By Order, or for Modification, Suspension, or Revocation of a License, or for Imposing Civil Penalties," may be submitted via EIE or CD-ROM. Submission of all other documents covered under part 2 are excluded from the scope of this guidance document. Separate rules or guidance addressing procedures for electronic communications in hearings will be issued in the future for public comment.

1.3.5 Freedom of Information Act and Privacy Act Requests

All Freedom of Information Act (FOIA) and Privacy Act requests and appeals may be submitted electronically by EIE, CD-ROM, facsimile, or e-mail. However, e-mail requests may not reveal personal privacy information.

2.0 Parameters for Electronic Files Submitted to the NRC

Unless otherwise noted, all electronic documents submitted to the NRC, including all enclosures or attachments that are

documents, should meet the file format specifications delineated in this section. Note: any electronic file that can be converted to PDF format (spreadsheets, slide presentations, etc.) Is considered a document by the NRC and is subject to these specifications.

Submittals may also contain other forms of electronic information including data files, computer models, and video or audio clips that are not considered documents. These files are not required to conform to the file format specifications established for documents.

2.1 File Formats

Electronic materials should be submitted in PDF or otherwise meet the specifications delineated in this section.

The following table defines the particular PDF output file formats and their use when submitting electronic documents to the NRC:

PREFERRED PDF OUTPUT FILE FORMAT

File format	Version	Filename extension	Recommended use
Adobe® Acrobat Portable Document Format (PDF) Formatted Text and Graphics (Formerly known as PDF Normal). Options should be set according to the settings described in Section 2.6.	Current or 2 previous	pdf	Textual documents converted from native applications only *,**.
Adobe® Acrobat PDF Searchable Image (Exact) [formerly known as PDF Original Image with Hidden Text]. Options should be set according to the settings described in Section 2.6.	Current or 2 previous	pdf	Textual documents converted from scanned documents.
Adobe® Acrobat PDF Image Only. Options should be set according to the settings described in Section 2.6.	Current or 2 previous	pdf	Preferred format for graphic-, image-, and forms-oriented documents (not for capture of text).

* Textual documents scanned from original paper copies converted to PDF Formatted Text and Graphics result in capture of only a text file that contains OCR conversion errors. This inaccurate representation of the original document is not acceptable for capture by the NRC as an archival record. If the native format of a document is not available for creating a PDF file, the NRC recommends that Searchable Image (Exact) PDF be generated from a scanned image of the document. This will create a PDF file that contains a 100% accurate representation of the original document which will be acceptable for transfer to the National Archives.

** Adobe® PDF Formatted Text and Graphics files that contain embedded images of text will not be accepted. These files are usually a result of cutting and pasting images of text, instead of the text itself, from one document to another while creating documents using word processing applications. This practice results in a picture of the text being created that is not full text searchable. However, images of text that are intended as a graphical representation only and are not meant to convey the information contained in the text will be accepted.

Note: Adobe has recently established a fourth PDF output file format (PDF Searchable Image (Compact)) that uses compression techniques to reduce file sizes of images. This is not an acceptable format for submission to the NRC because it uses lossy compression techniques that do not

result in a true and accurate representation of the original document.

Images originally created in a Tagged Image File Format (TIFF) that are primarily graphic-oriented in nature may be converted to PDF for submission to NRC using the PDF Image Only format as described above.

The NRC recommends that the results of spreadsheet applications be converted to one of the acceptable PDF file formats. The NRC staff may also require spreadsheet data to perform additional calculations/analyses. Spreadsheet data may be submitted using the following acceptable formats.

File format	Version	Filename EXTENSION	Preferred Use
Microsoft® Excel	Current or 2 previous	xls	Spreadsheet calculations.
Corel® QuattroPro	Current or 2 previous	wb3	Spreadsheet calculations.
Lotus® 1–2–3	Current or 2 previous	wk3/wk4	Spreadsheet calculations.

When submitting an electronic file using one of the acceptable formats, do not change the default, three-character extension for the file (e.g., a document prepared as “license_amendment.pdf” should be submitted with the “.pdf” file extension and a document prepared as a Microsoft Excel spreadsheet should be submitted with the “.xls” file extension).

2.2 Naming Conventions

Documents submitted to the NRC must:

- Conform to ISO 9660 format, including following the Joliet Extension.
- Have filenames that are limited to 49 characters (including the “.” and the three-character filename extension).
- Retain the default three-character file extension associated with the format in which the document was created (Example: for files created to conform to Adobe’s Portable Document Format, “.pdf”; for files created using Microsoft Excel, “.xls”).

- Include a three-digit numeric prefix (e.g., 001, 002, 003) in the filename that designates the correct order of the files contained in the submission, followed by the name of the file (Example: “001filename of first document.pdf”).
- Filenames should be based on the logical breakpoint used for segmentation of the document (e.g., chapter, section, etc.) as described in Section 2.14.

2.3 File Size Limitations

Large-size files create challenges for both the NRC staff and the public when viewing or downloading the documents. Therefore, the NRC requests that submitters make every effort to limit the size of each file to 50MB. If a document exceeds 50MB, it should be created using logical breaks in the document (e.g., file broken up into individual chapters—see section 2.14).

Additionally, small-size files are problematic as well. Large volumes of files

require significant resources to capture and profile in electronic document management systems. Therefore, the NRC encourages submitters to combine files that are components of larger documents to create 50MB files that can be more economically and efficiently managed.

The maximum size of a document submittal to the NRC depends on the method of transmission. For example, submitters may use EIE to submit PDF files and/or accepted spreadsheet files (see section 3.2) that do not exceed 50MB, including all attachments.

Submitters should use the CD-ROM transmission method in all other cases unless e-mail or facsimile is an appropriate option. (See sections 5.2 and 6.2.) The use of compression techniques (zipped files, downsized files, etc.) is not allowed for electronic files submitted to the NRC because they use lossy compression techniques that do not result in a true and accurate representation of the original document. The table below summarizes the size limitations based on the method of file transmission:

Method of transmission	Size limitations
Electronic Information Exchange (EIE)	Less than or equal to 50MB*.
CD-ROM	50MB or less per individual file on CD **, * * *
E-mail	Less than or equal to 10MB +.

* Total, combined size of message and attachments comprised of PDF file(s) and accepted spreadsheet format file(s). **Note:** Oversize drawings and other files with special printing requirements (Section 2.8), regardless of the file size, should be provided on CD-ROM.

** The total CD capacity may be used but submitters are urged to limit individual files to 50MB or less.

+ * * In some cases a single page document or object (e.g., oversize color drawing) may exceed the 50MB file size limit. Submission of oversize files (in excess of the 50MB limit) are allowed in these instances.

2.4 Security/Access Settings

Submissions should not contain any security settings, password protections, or any other attributes that will preclude full NRC access to and use of the files. NRC's internal security and archival processes will maintain the integrity of the materials that are submitted.

- Color PDF resolution, not less than 300 dpi
- Grayscale PDF resolution, not less than 300 dpi

Adobe® Acrobat “downsampling” (an optimization option available in Adobe Acrobat) may result in images with resolutions less than acceptable for submission to the NRC. Therefore, its use is not recommended.

established a custom optimization that strikes a balance between print and screen optimizations. This custom optimization provides adequate retrieval response time for viewing online while providing sufficient clarity and resolution for printing. The settings established for this custom optimization are listed below and should be used on all submittals to the NRC. The settings are specific to Adobe® Acrobat 5.0. However, when PDF creation software other than Adobe® Acrobat 5.0 is used, the PDF creation software should be configured with values equivalent to those listed below. All fonts should be embedded in the PDF file to ensure compliance with NARA guidelines.

2.5 Resolution

To comply with NARA Standards, PDF documents should be created using the following resolution guidelines:

- Bi-tonal (black and white) PDF resolution, not less than 300 dots per inch (dpi)

2.6 Settings for Creating PDF Formatted Text and Graphic Files

Adobe® Acrobat 5.0 provides four default optimizations when creating PDFs. These are eBook, Press, Print, and Screen. The NRC has reviewed these optimizations and has

¹ You must check the license(s) for any font(s) you intend to embed, to verify that embedding is allowed. In some cases, the program will warn you if a font is not licensed for embedding, but this varies by vendor. Fonts must be embedded to comply with NARA guidelines.

2.7 Use of Color

The NRC discourages the use of color because it significantly increases file size. If the use of color adds no value to the understanding of the information presented, its use should be avoided. If color is required to make the document understandable, its limited use is acceptable. Examples of color documents that meet this criteria are graphs, bar-charts, and engineering drawings that depend exclusively on the differences in color to understand the information and data being presented.

2.8 Files With Special Printing Requirements

Documents that contain electronic files with special printing requirements, such as requiring the use of a plotter or other special equipment to print, oversize drawings or graphics that require a paper size larger than 11 inches by 17 inches, or other enhancements such as 3D images, etc., may only be submitted electronically via CD-ROM as separate files. If special software components (e.g., printer drivers) are necessary, include those components, their configuration parameters, and any hardware configuration requirements on the same CD-ROM.

2.9 File Linkages

Files containing objects (e.g., pictures, tables, spreadsheets, and images of text) using link protocols such as Object Linking and Embedding (OLE), Dynamic Data Exchange (DDE), or any other object linking between electronic files are not practicable for the NRC to accept because the relationships among links in multiple file submissions are lost when captured in ADAMS or other agency electronic recordkeeping systems. However, links within a single electronic PDF file are acceptable.

2.10 Viruses

Files received by the NRC will be checked for viruses prior to acceptance. Any submission identified as having a virus will be rejected and returned to the submitter with an explanation of why the submittal was rejected.

2.11 Macros

Macros in files such as Microsoft® Excel are sometimes detected as viruses. Therefore, the use of macros should be limited because a file identified as having a virus will be rejected and returned to the submitter with an explanation of why the submittal was rejected.

2.12 Copyrighted Information

Submitting information electronically to the NRC shall be deemed to constitute authority for the NRC to place a copy of the information on its public document database and for the NRC to reproduce and distribute sufficient copies to carry out its official responsibilities. NRC use of the information specified herein does not constitute authority for others to use the information outside applicable requirements of copyright law.

2.13 Copies

Licenses and vendors submitting documents via EIE do not need to send confirming hard copies of the electronic documents. In instances where the NRC requires a paper copy for accessibility or other reasons, it will make every effort to produce the copy using NRC resources. However, in those instances where the agency is unable to successfully generate an accurate paper copy from the electronic submittal, the NRC may require a paper copy from the submitter. This will be handled on a case-by-case basis.

Many NRC regulations require submission of copies of documents to multiple NRC locations (e.g., Headquarters, Regional Offices, etc.). This practice continues for submissions that are made on CD-ROM. However, only a single copy of the CD-ROM is required to be submitted to each location.

Submissions made via EIE do not require submission to multiple locations.

2.14 Segmentation of Large Documents

Submitters should use the CD-ROM method of transmission (Section 4.0) for documents with file sizes greater than 50MB. Divide the document into file segments of 50MB or less at logical breakpoints such as:

- a. Chapters.
- b. Sections.
- c. Subsections.
- d. Appendices.
- e. Exhibits or attachments.
- f. Charts, tables, or formulae.
- g. For large transcripts, the end of a witness' testimony or session recess.

If the recommended file size cannot be achieved, consider moving the graphics (which are often large files) to an appendix or attachment. Any graphic or other large object that exceeds the 50MB limit and that cannot logically be divided should not be segmented.

Note: Oversize drawings and other files with special printing requirements (Section 2.8), regardless of the file size, should be provided on CD-ROM.

Additionally, small-size files are problematic as well. Large volumes of files require significant resources to capture and profile in electronic document management systems. Therefore, the NRC encourages submitters to combine files that are components of larger documents to create larger files that can be more economically and efficiently managed.

When CD-ROMs are submitted, use electronic folders to organize the contents at the chapter level consistent with the file name guidance outlined in Section 2.2. The numeric portion of the file name should be sequential across all folders. This means:

- Each chapter must have its own folder which should then contain all files associated with that Chapter, including sections, subsections, and graphics (either embedded within those sections/subsections or provided separately).
- The sections/subsections should be placed in logical sequential order within a folder.
- Separate folders may be created for appendices, exhibits, or attachments. Each item should have the file name reflect the folder where it resides, if practical, in conjunction with complying with the file name guidance in Section 2.2.

If multiple CD-ROMs are submitted, place the Table of Contents for the entire submission on each CD-ROM in a multi-set submission.

2.15 Sensitive or Non-Public Documents

Documents containing information that is deemed sensitive unclassified, specifically Proprietary Information (e.g., trade secrets, privileged, or confidential commercial or financial information), personal privacy information, or other Official Use Only information, may be submitted electronically via EIE or on CD-ROM. Documents containing Classified Information (i.e., National Security Information and Restricted Data) and Safeguards Information may be submitted electronically only on CD-ROM,

but not via EIE or e-mail. (See sections 3.9 and 4.3.1.)

3.0 Guidance for EIE Submissions

3.1 Who Can Participate

Applicants, licensees, external entities (including Federal, State, and local governments), vendors and members of the public who submit documents to the NRC may do so via EIE. The EIE is designed to ensure that electronic documents can be transmitted via the Internet in a secure and unalterable manner. Submittals such as those that are required to be submitted under oath or affirmation may be safely transmitted via EIE. Applicants, licensees, vendors, etc., must designate individuals who will have the responsibility for originating, signing, or sending documents to the NRC in compliance with regulatory requirements.

3.2 What Can Be Submitted

Documents may be submitted via EIE except as noted in section 1.3.1.A. and must qualify according to the following criteria:

- The file format is PDF and/or an acceptable spreadsheet format—See Section 2.1, and
- The entire submission is less than 50MB.

3.3 How To Register

The NRC provides for overall administration of the EIE process through the designated Local Registration Authority (LRA). The LRA creates and maintains an Authorized Certificate List (ACL) consisting of authorized internal and external EIE participants. Each participant must send an ACL containing the name and e-mail addresses of individuals who will be submitting digitally signed documents to the NRC. The ACL must be sent to the NRC in a signed paper form to the following address: Local Registration Authority (T6 C30), Electronic Information Exchange, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Upon receipt of the ACL, the NRC will e-mail to each individual named a unique personal identification number (PIN) to be used in applying for a digital certificate. Once received, the digital certificate will then enable individual users to digitally sign documents and submit them in a secure manner. The PIN number will be sent approximately 3 to 5 business days after receipt of the ACL. Participants may add or delete names from the ACL by written notification to the NRC using the above address. The LRA will use the ACL to validate authorized individuals requesting digital signature certificates. The LRA may be contacted via e-mail at EIE@nrc.gov.

3.4 What Is Needed To Participate

Participating individuals in the EIE initiative may use their existing workstations with standard desktop configuration. The recommended workstation configuration requires a Pentium 133 MHz (or higher) with a minimum of 32 MB of RAM, 20 MB of available disk space, and access to the World Wide Web (Web) through an Internet Service Provider (ISP). The operating system should be either Windows NT/2000 or Windows 95 (or higher). In addition, each workstation

must be equipped with browser software, consisting of either Netscape Navigator or Communicator (version 4.6 or higher) or Microsoft Internet Explorer (version 5.0 or higher). Other browser types, such as AOL or Mosaic, are not currently supported for use in the EIE system.

To utilize EIE, each individual must obtain a digital signature certificate (Digital ID) in order to digitally sign and submit the form used to transmit documents and to access the EIE external server to retrieve documents as needed. (See Section 3.5 of this guidance document.) Additionally, there is a software plug-in that must be downloaded and installed. Each process and step required to set up a computer or workstation to use EIE is described in the sections below. The processes and steps described are specific to both Netscape Navigator/Communicator 4.6 or higher and Microsoft Internet Explorer 5.0 or higher.

3.5 How To Obtain a Digital Signature Certificate

To obtain a Digital ID, authorized participants must first complete and submit an enrollment form. VeriSign, Inc. acts as the NRC's Certificate Authority (CA) and provides the NRC with a Digital Certificate (ID) enrollment page on its Web site. The NRC provides VeriSign Onsite Digital Certificates (ID's) at no cost to participants. The steps for obtaining a Digital Certificate are provided on the EIE home page at <http://www.nrc.gov/site-help/eie.html>. After accessing the EIE home page, click on the "Request/Retrieve Certificate" hyperlink and follow the step-by-step prompts.

3.6 How To Obtain Software Plug-ins

To utilize the EIE system, users must download and install one software plug-in. The software plug-in can be obtained from the EIE home page on the NRC Web site at <http://www.nrc.gov/site-help/eie.html>. The specific plug-in required is the Internet Form Viewer, which is a required plug-in regardless of the browser used. To successfully download and install the plug-in, simply go to the EIE home page and click on the "EIE Start Up" hyperlink and follow the step-by-step procedures provided.

3.7 How To Submit Documents

Documents eligible for submission to the NRC are restricted to specific formats. No documents with special attributes (e.g., documents with special printing requirements, such as requiring the use of a plotter or other special equipment to print, or other enhancements such as 3D images, etc.) will be accepted via EIE. The acceptable formats for electronic submission via EIE are listed in section 2.1 above. The submission of documents to the NRC using EIE will require the use of the NRC's EIE form. The EIE form is a document based on Extensible Mark-up Language (XML). It allows participants to sign, enclose, submit, and verify documents via the Internet. The document to be submitted or transmitted must be presented as an enclosure to the form. The form can be accessed by going to the NRC Web site at <http://www.nrc.gov/site-help/eie.html>. Once there, select either the

“Submit” or “Retrieve” hyperlink to access the form.

Once the form is displayed, users will need to fill in the fields on the form and attach the document(s) for submission to the NRC. Once the fields have been filled in and the intended documents are attached, the form must be digitally signed.

Documents submitted electronically using EIE do not need to be digitally signed by the author(s). They may be digitally signed by the person who transmits them, but the author(s) are accountable for the content of the document(s) submitted. Generally, the persons who will digitally sign documents and transmit them electronically to the NRC are the same persons who currently dispatch licensing documents through the mail to the NRC. Licensees and vendors submitting documents via EIE do not need to send confirming hard copies of the electronic documents.

NRC regulations require that some documents be filed under oath or affirmation. There are currently two acceptable methods for providing this oath using the EIE processes.

1. Documents requiring oath or affirmation may use EIE to digitally sign the affirmation on the document. Using this process, the document must conclude with a statement to this effect: “I declare under penalty of perjury that the foregoing is true and correct. Executed on [date]”.

The electronic document must be digitally signed by the person affirming this statement. This person may then transmit the document directly to the NRC using EIE or may forward the document to someone else for transmission to the NRC. In the latter case, the transmitter must also sign the document to authorize the electronic transmission.

Except as set forth below, multiple documents requiring individual digital signatures by different persons cannot be sent in a single EIE transmission. The current EIE process only allows two persons to digitally sign a single transmission. Therefore, the NRC recommends that the method described below in item 2 be used for submissions that require multiple oath and affirmations.

Note: When digitally signing a document, the submitter is actually digitally signing the transmission form, not the document. Signing the form is the equivalent of signing the document.

2. Oath or affirmation affidavits may also be created in hard copy and physically signed. The original paper copy may then be scanned to create a PDF Searchable Image (Exact) file of the original signature page. This page, with the rest of the PDF file of the entire attachment, may then be submitted via EIE.

Note: Although there are other methods available to electronically sign documents using wordprocessing and other software, these are not currently acceptable for use in signing documents for submission to the NRC because they do not provide the levels of authentication, certification, and non-repudiation that are present in the EIE process.

Documents transmitted to the NRC electronically using EIE will be time- and

date-stamped when the last bit of the transmittal is received by the EIE server. The time and date of the transmission will become part of the record in the NRC’s Agencywide Documents Access and Management System (ADAMS). The transmitter will be e-mailed a notice of receipt of the document. The notice will include the time and date the transmission was received at the NRC.

Submission of documents via EIE satisfies agency submittal requirements. The submitter need not send additional copies to NRC regions or other agency offices.

For more detailed information and step-by-step procedures on how to submit documents to the NRC using EIE, see the “EIE Submittal Procedures” on NRC’s Web site at <http://www.nrc.gov/site-help/eie.html>.

3.8 Where To Submit Documents

Documents submitted using EIE are automatically sent to the NRC Document Processing Center for processing into ADAMS. No additional information is necessary, except for submissions intended for a Region. Submissions intended for the Regions should have the Region(s) listed in the comment box contained on the submission form.

3.9 Sensitive or Non-Public Documents

Documents containing information that is deemed sensitive unclassified, specifically Proprietary Information (e.g. trade secrets, privileged, or confidential commercial or financial information), personal privacy information, or other Official Use Only information, may be submitted electronically via EIE. Documents containing Classified Information (i.e., National Security Information and Restricted Data) and Safeguards Information may not be submitted electronically via EIE.

Submissions made via EIE that contain non-public information must be clearly marked with the appropriate designation (i.e., Proprietary Information, Privacy Act Information, or Official Use Only Information). When submitting documents via EIE that contain both publicly and non-publicly available files, all of the files should be clearly marked.

3.10 Additional User Assistance (References and Contact Information)

Additional information, as well as detailed user guides can be obtained from NRC’s Web site at <http://www.nrc.gov/site-help/eie.html>.

Should you have any questions, please contact the Local Registration Authority (LRA) at 301-415-6030 or by e-mail at EIE@nrc.gov.

4.0 Guidance for CD-ROM Submissions

4.1 Who Can Participate

This guidance is intended for licensees, applicants, external entities (including Federal, State, and Local governments), vendors, and members of the public who submit documents to the NRC.

4.2 What Can Be Submitted

Documents may be submitted via CD-ROM except as noted in section 1.3.1.B. above. As mentioned in Section 1, there are also

documents that should only be submitted using CD-ROM, such as large documents exceeding 50MB and documents that contain special printing requirements. Documents containing Classified Information (i.e., National Security Information and Restricted Data) and Safeguards Information may only be submitted electronically on CD-ROM and not via EIE or e-mail.

4.3 How To Submit CD-ROMs to the NRC

Each electronic submission made on CD-ROM must be transmitted by a signed letter in paper format (see transmittal letter example below). On the first page of the transmittal letter, submitters should include the following information, if applicable:

- Organization or Individual Name/ Address (Author).
- Docket Number (050-00XXX, 030,XXXXX, 110,XXXXX).
- Subject Line (a non-sensitive, brief, descriptive narrative of the subject of the submission that should include any relevant regulation upon which the submission is based).
- Any requests for withholding from public disclosure in accordance with 10 CFR 2.790.

On the last page of the transmittal letter, submitters should provide:

- The name, mailing and e-mail addresses, and phone number of a contact person who can resolve discrepancies, if any, in document submissions.
- A complete listing of the document components (electronic files and/or physical objects) that make up the submission. The components should be listed in the order in which they appear in the document. CD-ROM submissions that require multiple CD-ROMs to transmit all of the document components should indicate the total number of CD-ROMs included in the submission.

Each of the listed components should indicate the following information:

- The file name (as defined in Section 2.2, including file extension).
- The size of the file.
- Sensitivity level (e.g., publicly available, proprietary, classified, etc.).
- A non-sensitive description of all non-document components (e.g., digital image, etc.) in the format illustrated by the example below.

In addition, if there are any special instructions regarding the use of the CD-ROM (e.g., how to open the files, access the publication, etc.), include them as part of the transmittal letter.

For electronic submissions via CD-ROMs that contain Classified Information (i.e., National Security Information and Restricted Data), sensitive unclassified information, or non-public documents, additional requirements apply as described in sections 4.3.1 and 4.3.5.

This single page, over-sized engineering
drawing is referenced in "Evaluation Quality
Control" part 2 of 3. The drawing is done in
6 colors and is useful when printed using 24"
by 36" paper stock or viewed on a large high
resolution monitor using PDF reader
software. It has been scanned at 300 dpi
resolution and output in PDF 1.3 using the
Image Only option. Figure 371 is one of four
(4) files on the CD-ROM labeled "DOE03-
001 Evaluation Quality Control Parts 1, 2,
and 3—Non-publicly Available" and is
located as the fourth file on the CD-ROM.

4.3.1 Sensitive or Non-Public Documents

Documents containing information that is
deemed sensitive unclassified, specifically
Proprietary Information (e.g. trade secrets,
privileged, or confidential commercial or

financial information), personal privacy
information, or other Official Use Only
information, may be submitted electronically
on CD-ROM. Documents containing
Classified Information (i.e., National Security
Information and Restricted Data) and
Safeguards Information may also be
submitted electronically on CD-ROM.

Submissions made on CD-ROM must be
accompanied by a transmittal letter (see
section 4.3) that contains information
regarding the sensitivity level of the
transmitted documents. This letter should
contain a listing of each file contained in the
submission, with a description and the
sensitivity for each file clearly marked.

When submitting documents via CD-ROM
that contain both publicly and non-publicly
available files, all of the files should be
included on a CD-ROM. In addition, a
separate CD-ROM must be provided that
contains only the publicly available files.
Each CD-ROM must be clearly labeled
indicating its availability. Files contained on
CD-ROMs labeled as "Publicly Available"
will be released to the public.

CD-ROMs containing Classified
Information must be processed and produced
on systems approved under the provisions of
10 CFR 95.49. Each CD-ROM must be clearly
labeled as containing classified information.

The mailing package containing CD-ROMs
with documents containing Proprietary,
personal privacy, or Official Use Only
Information must be marked and transmitted
in accordance with the requirements set forth
in 10 CFR 2.790(b). Packages containing
Safeguards Information must comply with
the requirements of 10 CFR 73.21(e), 73.21(g),
and 73.21(h), as appropriate. CD-ROMs
containing Classified Information (i.e.,
National Security Information or Restricted
Data) must be packaged and submitted to the
NRC in accordance with the requirements
contained in 10 CFR 95.37, 95.39, and 95.41.

4.3.2 Oath or Affirmation

NRC regulations require that some
documents be filed under oath or affirmation.
There are currently two acceptable methods
for providing this oath if such a document is
submitted on CD-ROM.

1. Documents requiring oath or affirmation
submitted on CD-ROM must include the
following statement on either the transmittal
letter or the first page of the document
contained on the CD-ROM and must contain
the signature of the person swearing to the
accuracy of the information submitted: "I
declare under penalty of perjury that the
foregoing is true and correct. Executed on
[date]".

If the oath or affirmation is submitted on
the transmittal letter, it must contain the
original signature of the person swearing to
the accuracy of the information. If submitted
as part of the document contained on the
CD-ROM, the page containing the signature
must be provided as a scanned PDF
Searchable Image (Exact) file along with the
PDF version of the entire document being
submitted.

2. Oath or affirmation affidavits may also
be created in hard copy and physically
signed. The original paper copy may either
be submitted along with the transmittal letter
and CD-ROM, or can be scanned to create a

PDF Searchable Image (Exact) file of the
original signature page which may be
submitted on the CD-ROM with the rest of
the PDF file of the entire attachment. NOTE:
The transmittal letter should indicate that a
separate affidavit is being provided as part of
the submittal package.

4.3.3 Living Documents

Many large documents historically
submitted to the NRC have been maintained
as living documents and have used a page-
replacement approach for update. Paper
submissions can still use this approach for
providing updates to living documents.

In the electronic environment, this
approach is not practicable. Consequently, if
a submitter chooses to make electronic
submission of these documents, all
subsequent updates must be submitted as
total replacements. The updated version
must include a list of changed pages and
each changed page must include both a
change indicator for the area changed (for
example, a bold line vertically drawn in the
margin adjacent to the portion actually
changed) and a page change identification
including either the date of change, change
number, or both.

4.3.4 CD-ROM File Format

The acceptable file formats are stated in
Section 2.1. However, for text-oriented
documents, the preferred file formats are
Portable Document Format (PDF) Formatted
Text and Graphics and PDF Searchable Image
(Exact). PDF Image Only is preferred for
submission of graphic image documents.
PDF files should be scanned at the
resolutions stated in Section 2.5 of this
document.

Large documents made up of multiple files,
folders, etc., often require the inclusion of a
search engine on the CD-ROM to facilitate
navigation, search, and retrieval of the
document. The inclusion of the search engine
enables the user to access the material
contained on the CD-ROM without having to
rely on other software in the user's resident
environment. The NRC encourages the
inclusion of these search engines to facilitate
the use of the materials in stand-alone mode.
However, only those products that do not
require the end-user to purchase a license to
use the products are acceptable.

4.3.5 Packaging/Labeling

When submitting documents that contain
both publicly and non-publicly available
files, all of the files should be included on
a CD-ROM. In addition, a separate CD-ROM
must be provided that contains only the
publicly available files. Each CD-ROM must
be clearly labeled indicating its availability.
CD-ROMs labeled as "Publicly Available"
will be released to the public (sent to the
Public Document Room, where they are
available for inspection and copying). The
mailing package containing CD-ROMs with
documents comprised of Proprietary,
personal privacy, or Official Use Only
Information must be marked and transmitted
in accordance with the requirements set forth
in 10 CFR 2.790(b). Packages containing
Safeguards Information must comply with
the requirements of 10 CFR 73.21(e), 73.21(g),
and 73.21(h), as appropriate. CD-ROMs

containing Classified Information (*i.e.*, National Security Information or Restricted Data) must be packaged and submitted to the NRC in accordance with the requirements contained in 10 CFR 95.37, 95.39, and 95.41.

Subsequent to the events of September 11, 2001, much of the incoming mail addressed to the Federal government is irradiated prior to delivery. Irradiation of CD-ROMs containing electronic information may result in damage to the media and its contents. Therefore, packages containing CD-ROM submissions should be clearly marked "CONTENTS CONTAIN CD-ROMs. DO NOT IRRADIATE."

4.3.6 Copies

Many NRC regulations require submission of copies of documents to multiple NRC locations (*e.g.*, Headquarters, Regional Offices, etc.). This practice continues for submissions that are made on CD-ROM. However, only a single copy of the CD-ROM is required to be submitted to each location.

4.3.7 Rejection of Submissions

It is not practicable for the NRC to accept:

- Any submission that contains a virus.
- Files submitted that are compressed.
- File formats other than those listed in Section 2.1, except submittals may also contain other forms of electronic information including data files, computer models, and video or audio clips.

- CD-ROMs that contain both publicly and non-publicly available files on a single CD, unless a second CD with only publicly available information is also provided.
- CD-ROMs containing OLE (Object Linking and Embedding), DDE (Dynamic Data Exchange), or any other object linking.
- Any inconsistencies, including omissions, between the transmittal letter and the files or physical objects received.

4.4 Where To Submit the CD-ROMs

Send CD-ROMs with transmittal letter to the mailing address specified in the regulation, order, or other document governing the submission of that particular application, report or correspondence. CD-ROMs containing Classified Information (*i.e.*, National Security Information and Restricted Data) must be marked in accordance with 10 CFR 95.37 and mailed to the appropriate NRC Classified mailing address. (See 10 CFR part 73, appendix A for a listing of addresses.)

4.5 Additional User Assistance (References and Contact Information)

Information can be found by visiting the NRC's Web site at <http://www.nrc.gov/site-help/eie.html>. Under the heading "Related Information," find the section "CD-ROM Submittal Procedures."

For assistance or to discuss problems with making CD-ROM submissions of electronic filings, contact the Document Processing Services Section at 301-415-2488 during the NRC's normal business hours (7:30 a.m. to 4:15 p.m. eastern time) or e-mail EIE@nrc.gov.

5.0 E-Mail Submissions

5.1 Who Can Participate

This guidance is intended for licensees, applicants, external entities (including Federal, State, and local governments), vendors and members of the public who submit documents to the NRC.

5.2 What Can Be Submitted

Documents (except for communications with States and other Federal agencies) submitted by e-mail, including the text of the e-mail, should contain only information that could be made available to the public and may be used for:

- Rulemaking petitions and comments in rulemaking proceedings.
- Requests for enforcement action under 10 CFR 2.206, which may be sent to 2206PETITIONS@NRC.GOV.
- All Freedom of Information Act (FOIA) and Privacy Act requests and appeals may be submitted electronically by e-mail. However, e-mail requests may not reveal personal privacy information.
- Responses to **Federal Register** Notices or other agency communications where NRC has provided a specific e-mail address.

Multiple document attachments are acceptable, but the e-mail cannot exceed the 10MB size limitation, and the e-mail must include the required information as listed in section 5.4.

In addition, the NRC provides a listing of contacts on the NRC Web site at <http://www.nrc.gov> that can be used for a variety of e-mail communications to the agency by selecting "Contact Us" from the home page. Documents can be submitted by e-mail for the purposes identified on the Web site, and should be sent to the specific e-mail address provided for each form of communication.

5.3 Rejection of Submissions

File submissions that do not meet the parameters outlined in this document, especially as outlined in Section 2.0, will be rejected and will require re-submission. If the e-mail (with attachments) exceeds the 10MB size requirement or contains a virus, the sender will receive an automated "Undelivered Mail" notice stating the reason for the delivery rejection.

If the documents do not comply with other file parameters outlined in section 2.0 (*e.g.*, unknown file format, compressed files, incorrect naming convention, corrupt/unreadable file or if it contains macros identified as potential viruses), the intended recipient may notify the addressee to re-submit the document(s). Finally, the body of the e-mail message/text must include the required information as listed in section 5.4.

5.4 How To Send E-Mail

Files sent via e-mail must be sent as an attachment to the e-mail message in order to retain the original formatting of the document(s). The e-mail message must include the name of a contact person who can respond to questions about the submission, along with the contact person's daytime phone number, mailing, and e-mail address. The e-mail must also identify/describe each document attached to the e-mail message. The format used to generate

each of the identified file(s) must also be listed.

5.5 Where To Submit E-Mail

E-mail may be addressed to either specific individuals named as contacts or to the office specified in the regulation or communication specific to the document(s) being submitted, to addresses the NRC Web site provides for individual program offices or specific agency functions or services, or to the Office of Public Affairs. Individual program offices may be contacted by using the addresses found at the NRC Web site at <http://www.nrc.gov>, and selecting "Contact Us" from the home page. The Office of Public Affairs may also be contacted through the "Contact Us" page or at OPA@nrc.gov. The Office of the Secretary of the Commission may be contacted at 2206PETITIONS@NRC.GOV for 2.206 petitions (use upper case where indicated). The sender will not be e-mailed a confirmation of receipt of the submission.

6.0 Facsimile (Fax) Submissions

6.1 Who Can Participate

This guidance is intended for licensees, applicants, external entities (including Federal, State, and local governments), vendors and members of the public who submit documents to the NRC.

6.2 What Can Be Submitted

Documents (except for communications with States and other Federal agencies) submitted by fax should contain only information that could be made available to the public and may be used for:

- Rulemaking petitions and comments in rulemaking proceedings.
- Requests for enforcement action under 10 CFR 2.206.
- All Freedom of Information Act (FOIA) and Privacy Act requests and appeals may be submitted electronically by facsimile. However, requests submitted by fax may not reveal personal privacy information.
- Responses to **Federal Register** Notices or other agency communications where NRC has provided for response by fax.
- Responses to NRC licensing-related questions.
- Information from export/import license applicants and licensees.

6.3 How To Send Facsimiles (Faxes)

Faxes must include the name of a contact person who can respond to questions about the submission, along with the contact person's daytime phone number and mailing or e-mail address.

6.4 Where To Submit Facsimiles (Faxes)

The NRC has established centralized receipt points (see listing of fax locations provided in section 6.5) for official submissions transmitted by fax at each of the Regional Offices and at NRC Headquarters. All official transmissions should be sent to one of these official receipt points to ensure that they are captured as official records of the agency.
