SUPPLEMENTARY INFORMATION: The Final SEIS analyzes the direct, indirect and cumulative impacts related to expansion of existing mine facilities (pits, overburden dumps & heap leach pads) and development of the Millennium Projects. Development includes construction of five new pits, overburden disposal areas, two additional heap leach facilities, drainage diversions, haul and exploration roads and ancillary facilities. Alternatives analyzed include: (1) Moving the Trout Creek Diversion toward the west, farther from the Red Rock Pit, (2) increasing backfilling along the west high wall of the Red Rock Pit, and (3) taking no action. The agency-preferred alternative is alternative number 2; increasing backfilling along the west high wall of the Red Rock Pit. The Final SEIS contains in its entirety the analysis originally presented in the Draft SEIS (issued April 5, 2003) with all text changes presented in bold type. In addition, letters received during the Draft SEIS comment period and the agency's responses to the comments have been incorporated into the Final SEIS.

National Park Service

60-Day Notice of Intention To Request Clearance of Collection of Information; Opportunity for Public Comment

AGENCY: Department of the Interior, National Park Service.

ACTION: Notice and request for comments.

SUMMARY: NPS requests comments on extending and modifying two existing NPS information collection instruments that are processed by the existing, Internet-based Research Permit and Reporting System. One information collection instrument, the Application for a Scientific Research and Collecting Permit, is used by applicants to apply to parks for scientific research and collecting permits for natural or social science activities that require permits. The other instrument, the Investigator's

Annual Report, is used by permittees to submit their required annual progress reports. NPS will use the information you submit in response to this notice to assist its decision-making regarding whether or not to request extension of, and to make modifications to, the two collections of information administered through the existing Research Permit and Reporting System. Once NPS develops and adopts any modifications that may be appropriate, NPS currently expects to submit a request for an extension of the existing, but slightly modified, collection of information package to OMB with a request that OMB approve the package and assign an OMB clearance number to the two collection of information forms that are part of this system.

The NPS also is asking for comments on the practical utility of the information being gathered; the validity and accuracy of the reporting burden hour estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden to respondents, including use of automated information collection techniques or other forms of information technology.
