Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2003-15818]

Exemption To Allow Werner Enterprises, Inc. To Use Global Positioning System (GPS) Technology To Monitor and Record Drivers' Hours of Service

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of intent to grant exemption; request for comments.

SUMMARY: FMCSA proposes to grant an exemption to Werner Enterprises, Inc. (Werner) from the requirement that drivers of commercial motor vehicles (CMVs) operating in interstate commerce prepare handwritten records of duty status (RODS). Werner would instead document its drivers' hours of service through the use of GPS technology and complementary computer software programs. Werner has used GPS technology manufactured by Qualcomm, Inc. and computer software programs to manage and record its drivers' duty status since June 10, 1998, when it entered into a Memorandum of Understanding (MOU) with the agency. The MOU was based on the agency's April 6, 1998, notice of interpretation concerning the use of such technology. Werner and FMCSA revised the MOU in March 2002. The agency proposes that the terms and conditions for the exemption be the same as those contained in the revised MOU, with a few exceptions based on recent discussions between FMCSA and Werner. FMCSA has monitored closely Werner's use of the GPS technology since June 1998. Based on this experience, the agency believes that the terms and conditions of the exemption

would achieve a level of safety equivalent to, or greater than, that provided by complying with the current RODS requirements.

SUPPLEMENTARY INFORMATION:

Background

On April 6, 1998, FMCSA published a notice of interpretation (63 FR 16697,

Apr. 6, 1998) requesting motor carriers to participate in a "pilot demonstration project" (the Project). The Project was a voluntary program under which motor carriers with GPS technology and related safety management computer systems could enter into an agreement with the agency to use such systems to record and monitor drivers' hours of service in lieu of complying with the handwritten records of duty status (RODS) requirement of 49 CFR 395.8. The agency indicated that it believes GPS technology and many of the complementary safety management computer systems being used by the motor carrier industry provide at least the same degree of monitoring accuracy as automatic on-board recorders allowed by 49 CFR 395.15. The original deadline for submitting applications was October 5, 1998, with subsequent extensions to June 30, 1999 (63 FR 71791, Dec. 30, 1998), and December 31, 1999 (64 FR 37689, Jul. 13, 1999). The extensions were provided because numerous motor carriers contacted the agency to express an interest in participating in the Project. Although participation in the Project was open to all interested motor carriers, Werner was the only company to sign a memorandum of understanding (MOU) with the agency to allow the use of GPS technology.

Status of Werner's Participation in the Project

On June 10, 1998, Werner entered into an MOU with the agency to use GPS technology and related safety management computer systems as an alternative to handwritten driver RODS. A copy of the MOU is included in the docket referenced at the beginning of this notice. Over the course of the pilot demonstration project, FMCSA conducted onsite reviews and investigated a complaint. The reviews and complaint investigation identified potential improvements to Werner's system that would increase the accuracy of the electronic RODS and thereby raise the level of hours-of-service compliance.

In March 2002, Werner and FMCSA entered into a revised MOU to amend the terms of the June 1998 agreement. A copy of the revised MOU is in the docket referenced at the beginning of this notice. The revised MOU contains specific provisions related to system modifications and internal hours-of-service compliance monitoring reports agreed to by Werner and FMCSA. The March 2002 MOU states:

At the end of the 18-month period of this agreement, an assessment will be made to consider making this pilot program permanent. The FMCSA will automatically extend the agreement period beyond 18
