SUPPLEMENTARY INFORMATION:

Title: 30 CFR Part 206, Subpart C, Federal Oil.

OMB Control Number: 1010-0136.

Abstract: The Department of the Interior (DOI) is responsible for matters relevant to mineral resource development on Federal and Indian

lands and the Outer Continental Shelf (OCS). The Secretary of the Interior is responsible for managing the production of minerals from Federal and Indian lands and the OCS, collecting royalties from lessees who produce minerals, and distributing the funds collected in accordance with applicable laws. MMS assists the Secretary in performing the royalty management functions.

Section 101(a) of the Federal Oil and Gas Royalty Management Act of 1982 (FOGRMA), as amended, requires that the Secretary "establish a comprehensive inspection, collection, and fiscal and production accounting and auditing system to provide the capability to accurately determine oil and gas royalties, interest, fines, penalties, fees, deposits, and other payments owed, and collect and account for such amounts in a timely manner." In order to accomplish these tasks, MMS developed valuation regulations for Federal leases at 30 CFR part 206, subpart C. These regulations were published as a final rule in the **Federal Register** on March 15, 2000 (65 FR 14022). Market value is a basic principle underlying royalty valuation. Consequently, these regulations include methods to capture the true market value of crude oil produced from Federal leases, both onshore and offshore.

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from Federal or Indian lands, that company or individual agrees to pay the lessor a share (royalty) of the value received from production from the leased lands. The lease creates a business relationship between the lessor and the lessee. The lessee is required to report various kinds of information to the lessor relative to the disposition of the leased minerals. Such information is similar to data reported to private and public mineral interest owners and is generally available within the records of the lessee or others involved in developing, transporting, processing, purchasing, or selling of such minerals. The information collected includes data necessary to assure that the royalties are paid appropriately. The valuation regulations at 30 CFR part 206, subpart C, require companies to collect and/or submit information used to value their Federal oil.

MMS is requesting OMB's approval to continue to collect this information. Not collecting the information would limit the Secretary's ability to discharge his/her duties and may also result in loss of royalty payments. Proprietary information submitted is protected, and there are no questions of a sensitive

nature included in this information collection.
