CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

Sunshine Act Meeting

In connection with its investigation into the cause of a fire at the Third Coast Industries' Friendswood facility, the United States Chemical Safety and Hazard Investigation Board announces that it will convene a Public Meeting beginning at 9 am local time on March 6, at Crowne Plaza Medical Center, 6701 South Main, Houston, TX 77030, Telephone: (713) 797-1110.

At the meeting CSB staff will present to the Board the results of their investigation into this incident, including an analysis of the incident together with a discussion of the key findings, root and contributing causes and draft recommendations. In addition, the Chair may present the Board's Strategic Plan, and action needed on selected recommendations from past CSB investigations.

Recommendations are issued by a vote of the Board and address an identified safety deficiency uncovered during the investigation, and specify how to correct the situation. Safety recommendations are the primary tool used by the Board to motivate implementation of safety improvements and prevent future incidents. The CSB uses its unique independent accident investigation perspective to identify trends or issues that might otherwise be overlooked. CSB recommendations may be directed to corporations, trade associations, government entities, safety organizations, labor unions and others.

After the staff presentation the Board will allow a time for public comment. Following the conclusion of the public comment period, the Board will consider whether to vote to approve the final report and recommendations. When a report and its recommendations are approved, this will begin CSB's process for disseminating the findings and recommendations of the report not only to the recipients of recommendations but also to other public and industry sectors. The CSB believes that this process will ultimately lead to the adoption of recommendations and the growing body of safety knowledge in the industry, which, in turn, should save future lives and property.

All staff presentations are preliminary and are intended solely to allow the Board to consider in a public forum the issues and factors involved in this case. No factual analyses, conclusions or findings should be considered final. Only after the Board has considered the staff presentation and approved the staff report will there be an approved final record of this incident.

In the early morning hours of May 1, 2002, a fire erupted at the Third Coast Industries Friendswood facility, located in an unincorporated area of Brazoria County, Texas. The facility blended and packaged motor oils, hydraulic oils, and engine and other lubricants. The fire quickly spread due to the facility's design and lack of fire control equipment. The nearest water for firefighters was more than a mile away. The fire consumed more than 1.2 million gallons of combustible and flammable liquids and destroyed the site. More than 180 firefighters and support personnel responded, and it took 23 hours to bring the fire under control. Several neighboring buildings were destroyed, one hundred residents were evacuated and a local school was closed for a day. No employees or firefighters were injured during the incident.

The meeting will be open to the public. Please notify CSB if a translator or interpreter is needed, at least 5 business days prior to the public meeting. For more information, please contact the Chemical Safety and Hazard Investigation Board at (202) 261-7600, or visit our Web site at: <http://www.csb.gov>.

Christopher W. Warner,
General Counsel.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Guidance Conference Calls for Organizations Interested in Applying for a Learn and Serve America Program Grant

AGENCY: Corporation for National and
Community Service.

ACTION: Notice of conference calls.

SUMMARY: The Corporation for National and Community Service is offering a series of teleconference calls for nonprofit organizations and institutions of higher education interested in applying for a Learn and Serve America program grant. These training teleconferences will familiarize organizations with the requirements of the Learn and Serve America programs and the steps in submitting an application via the eGrants system. The toll free number for these calls is (888) 552-5348 and the pass code is #76068. There will be 20 lines per call and they will be on a first come, first served basis.

DATES: The teleconference calls will take place on:

February 26, 2003—Wednesday—
School/Community-Based

February 27, 2003—Thursday—Higher
Education

March 4, 2003—Tuesday—School/
Community-Based

March 5, 2003—Wednesday—Higher
Education

March 12, 2003—Wednesday School/
Community-Based & Higher
Education

All teleconference calls will begin at
2 p.m. EST.

ADDRESSES: Our address is the
Corporation for National and
Community Service, Learn and Serve
America, 9th Floor, 1201 New York
Avenue, NW., Washington, DC 20525.

FOR FURTHER INFORMATION CONTACT: For
further information regarding these
conference calls, please contact Ms.

Juanita Peoples (202-606-5000, Ext. 117) e-mail jpeoples@cns.gov.

Dated: February 19, 2003.

Amiko Matsumoto,

Acting Director, Learn and Serve America.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP01-409-001, CP01-410-001, CP01-411-001 and CP01-444-001]

Calypso Pipeline, LLC, Tractebel Calypso Pipeline, LLC; Notice of Filing

September 9, 2002.

Take notice that on August 30, 2002, Calypso Pipeline, LLC (Calypso) and Tractebel Calypso Pipeline, LLC (Tractebel Calypso) jointly filed an amendment in the above-referenced dockets to reflect a change in ownership associated with the applications filed on July 20, 2001, and September 19, 2001, by Calypso (Calypso Application) in the same docketed proceedings. The August 30, 2002 filing requests that the Commission accept a substitution of Tractebel Calypso as the applicant in the pending Calypso Application to reflect the change in ownership and the filed revisions to certain exhibits in the Calypso Application. These revisions reflect only a change in ownership. The application is on file with the Commission and open to public inspection. This filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "FERRIS" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, call (202) 502-8222 or for TTY, (202) 208-1659.

By the Calypso Application, Calypso requests authorization to construct, own, and operate a new pipeline system consisting of approximately a 36 mile, 24-inch offshore segment and approximately a 5.8 mile, 24-inch onshore segment (Calypso Pipeline Project). The offshore pipeline will extend from the boundary of the U.S. Exclusive Economic Zone (EEZ) and the Bahama EEZ, off the southeast Florida coastline to shore at Port Everglades in Fort Lauderdale, Florida. The proposed onshore pipeline segment will be located in Broward County, Florida. The onshore pipeline segment will connect the offshore pipeline with Florida Gas Transmission Company's ("FGT")

existing 24-inch Lauderdale Lateral at Mile Post 1.6 in Broward County, Florida. Calypso's proposed pipeline was designed to transport up to 832,000 MMBtu per day.

Calypso and Tractebel Calypso have executed a Purchase and Sale Agreement (PSA) for the Calypso Pipeline Project. Per the PSA, Tractebel Calypso will acquire the assets related to the Calypso Pipeline Project. Those assets consist principally of the Calypso Application; the Enron LNG Marketing, LLC Precedent Agreement; and various other surveys, permits, easements, and rights-of-way applications and engineering work product. The sale of the Calypso Pipeline Project to Tractebel Calypso ultimately is subject to the approval of the Bankruptcy Court. Tractebel Calypso will then notify the Commission of the closing of the transaction, and will thereafter be considered the applicant of record under the Calypso Application, with all the rights and responsibilities attached to such status.

Any questions regarding the application are to be directed to Michael J. Zimmer, Esq., Baker & McKenzie, 815 Connecticut Avenue, NW., Washington, DC, 20006.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before September 30, 2002, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone

will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission may issue a preliminary determination on non-environmental issues prior to the completion of its review of the environmental aspects of the project.

This preliminary determination typically considers such issues as the need for the project and its economic effect on existing customers of the applicant, on other pipelines in the area, and on landowners and communities. For example, the Commission considers the extent to which the applicant may need to exercise eminent domain to obtain rights-of-way for the proposed project and balances that against the non-environmental benefits to be provided by the project. Therefore, if a person has comments on community and landowner impacts from this proposal, it is important either to file comments or to intervene as early in the process as possible.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a
