DEPARTMENT OF NUCLEAR REGULATORY COMMISSION

[Docket No. 050-206, 050-361, and 050-362]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for an Exemption From Certain Control and Tracking Requirements in 10 CFR Part 20 Appendix G Section III.E for the San Onofre Nuclear Generating Station in San Diego County, CA

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of an exemption from certain control and tracking requirements in 10 CFR part 20 for the San Onofre Nuclear Generating Station (SONGS). The SONGS site consists of two operating reactors and a permanently shutdown nuclear reactor facility located in San Diego County, California. Inherent to the decommissioning process, large volumes of slightly contaminated rubble and debris are generated and require disposal. On January 26, 2004, Southern California Edison (the licensee) requested an exemption from the requirements in 10 CFR part 20, appendix G section III.E to investigate and file a report to the NRC if shipments of low-level radioactive waste are not acknowledged by the intended recipient within 20 days after transfer to the shipper. This exemption would extend the time period that can elapse during shipments of low-level radioactive waste before the licensee is required to investigate and file a report to the NRC from 20 days to 35 days. The exemption request is based on a statistical analysis of the historical data of low-level radioactive waste shipment times from the licensee's site to the disposal site using rail or combination truck/rail shipping methods. The NRC staff has prepared an environmental assessment (EA) in support of this action, in accordance with the requirements of 10 CFR part 51. The conclusion of the EA is a Finding of No Significant Impact (FONSI) for the proposed action.

II. EA Summary

The proposed action would grant an exemption to extend the 20-day investigation and reporting requirements for shipments of low-level radioactive waste to 35 days. Since 1999, the licensee has made over 150 shipments of low-level radioactive waste as part of the decommissioning efforts at the facility. MHF Logistical Solutions (MHF) is the rail broker company used by the licensee to perform these shipments. MHF
