**SUPPLEMENTARY INFORMATION:** The Spinal Cord Dysfunction (SCD)-Registry provides a registry of veterans with spinal cord injury and disorders (SCI&D). This registry contains pertinent information on veterans with SCI&D and enables better coordination of care among VHA staff. The purpose of the registry is to assist clinicians, administrators, and researchers in identifying and tracking services for veterans with spinal cord dysfunction resulting from trauma or diseases. The SCD-Registry can also facilitate clinical, administrative, and research reports for medical center use. Local Veterans Health Information System and Technology Architecture (VistA) SCD-Registries provide aggregate data to the National SCD-Registry database at the Austin Automation Center (AAC). This centralized AAC registry is used to provide a VA-wide review of veteran demographics and clinical aspects of injury and disorders for administrative and research purposes.

VHA's Health Services Research and Development Service (HSR&D) and the congressionally-chartered Paralyzed Veterans of America (PVA) originally developed the SCD-Registry. However, these records are maintained exclusively by VA.

The Routine Uses of Records Maintained in the System, including Categories of Users and the Purposes of Such Uses are amended as described below.

- Routine use number seven (7) has been amended in its entirety. VA must be able to comply with the requirements of agencies charged with enforcing the law and conducting investigations.
