Environmental Review

Deepwater ports for the transportation, storage, or further handling of oil or natural gas must be licensed in accordance with the Deepwater Port Act of 1974, as amended, 33 U.S.C. 1501 *et seq.* ("the Act"). The Coast Guard and the Maritime Administration (MARAD) jointly process applications for deepwater port licenses. A notice of application for a proposed Compass Port liquefied natural gas deepwater port, to be located in the Gulf of Mexico approximately 11 miles south of Dauphin Island, Alabama, was published in the **Federal Register** on May 20, 2004 (69 FR 29142). That notice contains a fuller description of the proposed deepwater port. In addition to information previously published in the **Federal Register**, the applicant has identified five locations as possible fabrication sites for the concrete Gravity Based Structures (GBS's) which would be used to contain the LNG storage tanks. The proposed locations are:

Big Bend Site, Freeport, TX;
Zachary Construction Site, Harbor Island, TX;
Gulf Marine Fabrications, Ingleside, TX;
Kiewit Construction Site, Ingleside, TX;
Port of Altamira, Mexico.

The complete application, including environmental documentation provided by the applicant, is available in the public docket (see "Viewing Comments and Dockets," above).

The Act establishes a licensing process for proposed deepwater ports, and that process includes review of the proposed port's natural and human environmental impacts. Consistent with the DWPFA, this environmental review must comply with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4332, and with the following authorities: Coast Guard regulations in 33 CFR part 148, Council on Environmental Quality regulations in 40 CFR parts 1500–1508, DOT Order 5610.1C (Procedures for Considering Environmental Impacts), and Coast Guard Commandant's Instruction (COMDTINST) M16475.1D. Environmental review includes public involvement, and consultation with States deemed adjacent to the proposed port (in this case, Alabama and Mississippi). The Coast Guard is the lead agency for determining the

required scope of environmental review, and in this case the Coast Guard has determined that an environmental impact statement (EIS) must be prepared. Therefore, we are publishing the notice of intent described in 40 CFR 1508.22, to announce our intention to prepare and consider an EIS, and to describe our proposed action and possible alternatives, describe the scoping process required by 40 CFR 1501.7, and provide contact information. Contact information is provided above, under **FOR FURTHER INFORMATION CONTACT**.

The proposed action requiring environmental review is the Federal licensing of the Compass Port deepwater port application. The alternatives to licensing approval are licensing with conditions (including conditions designed to mitigate environmental impact), and denying the application, which for purposes of environmental review is the "no-action" alternative.

Public scoping is an early and open process for determining the scope of issues to be addressed in an EIS and for identifying the significant issues related to a proposed action. The scoping process begins with publication of this notice, extends through the public comment period (see *DATES*), and ends when the Coast Guard completes the following actions:

- Invites the participation of Federal, State, and local agencies, any affected Indian tribe, the applicant, and other interested persons;
- Determines the actions, alternatives, and impacts described in 40 CFR 1508.25;
- Identifies and eliminates from detailed study those issues that are not significant or that have been covered elsewhere;
- Allocates responsibility for preparing EIS components;
- Indicates any related environmental assessments or environmental impact statements that are not part of the EIS;
- Identifies other relevant environmental review and consultation requirements;
- Indicates the relationship between timing of the environmental review and other aspects of the application process; and
- At its discretion, exercises options provided in 40 CFR 1501.7(b).

Once the scoping process is complete, the Coast Guard will prepare a draft EIS, and we will publish a **Federal Register** notice announcing its public availability. If you want to be mailed or emailed the draft EIS notice of availability, please contact the person named in **FOR FURTHER INFORMATION CONTACT**. We will provide the public

with an opportunity to review and comment on the draft EIS. After the Coast Guard considers those comments, we will prepare the final EIS and similarly announce its availability and solicit public review and comment.
