SUPPLEMENTARY INFORMATION:

Background

Bovine tuberculosis is a contagious and infectious granulomatous disease caused by *Mycobacterium bovis*. It affects cattle, bison, deer, elk, goats, and other warm-blooded species, including humans. Tuberculosis in infected animals and humans manifests itself in lesions of the lung, lymph nodes, bone, and other body parts, causes weight loss and general debilitation, and can be fatal. At the beginning of the past century, tuberculosis caused more losses of livestock than all other livestock diseases combined. This prompted the establishment of the National Cooperative State/Federal Bovine Tuberculosis Eradication Program for tuberculosis in livestock. Through this program, the Animal and Plant Health Inspection Service (APHIS)

works cooperatively with the national livestock industry and State animal health agencies to eradicate tuberculosis from domestic livestock in the United States and prevent its recurrence.

Federal regulations implementing this program are contained in 9 CFR part 77, “Tuberculosis” and in the “Uniform Methods and Rules—Bovine Tuberculosis Eradication” (UMR), January 22, 1999, edition, which is incorporated by reference into the regulations in part 77. The regulations restrict the interstate movement of cattle, bison, and captive cervids to prevent the spread of bovine tuberculosis. Subpart A of part 77 (§§ 77.1–77.4) contains general provisions of the tuberculosis regulations such as definitions; subpart B (§§ 77.5–77.19) contains specific provisions regarding cattle and bison; and subpart C (§§ 77.20–77.41) contains specific provisions regarding captive cervids.

Currently, there are two definitions of *affected herd* in part 77. In § 77.5, *affected herd* is defined as “a herd in which tuberculosis has been disclosed in any cattle or bison by an official tuberculin test or by post mortem examination.” In § 77.20, *affected herd* is defined as “a herd of captive cervids that contains or that has contained one or more captive cervids infected with *Mycobacterium bovis* (determined by bacterial isolation of *M. bovis*) and that has not tested negative to the three whole herd tests as prescribed in § 77.39(d) of this part.”

We are proposing to remove these two definitions, which are out-of-date and inconsistent, and replace them with a new definition that would apply to cattle, bison, and captive cervids and be consistent with that in the UMR.

We would define *affected herd* as “a herd of livestock in which there is strong and substantial evidence that *Mycobacterium bovis* exists. This evidence should include, but is not limited to, any of the following: Epidemiologic evidence, histopathology, polymerase chain reaction (PCR) assay, bacterial isolation or detection, testing data, or association with known sources of infection.” This single definition, which matches the definition in the UMR, would provide more clarity to the regulations. In addition, the proposed definition would

make the regulations more consistent with the UMR.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

We are proposing to amend the tuberculosis regulations by removing the two different definitions of *affected herd* and replacing them with a single, updated definition. This action is necessary because the definitions that appear in the regulations are out-of-date and inconsistent. This action would provide more clarity to the regulations.

No economic benefits of costs are associated with this action, which would simply update and clarify our definition of *affected herd*. This action would have no effects on small entities, other Federal agencies, State governments, or local governments.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are in conflict with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Authority: 7 U.S.C. 8301–8317; 7 CFR 2.22, 2.80, and 371.4.

2. Section 77.2 would be amended by adding, in alphabetical order, a definition of *affected herd* to read as follows:

§ 77.2 Definitions.

* * * * *

Affected herd. A herd of livestock in which there is strong and substantial evidence that *Mycobacterium bovis* exists. This evidence should include, but is not limited to, any of the following: Epidemiologic evidence, histopathology, polymerase chain reaction (PCR) assay, bacterial isolation or detection, testing data, or association with known sources of infection.
