SUPPLEMENTARY INFORMATION:**I. Abstract**

Regulations at 50 CFR 660.24 and 660.47 require that certain fishing gear must be marked. In the western Pacific pelagic longline fisheries, the vessel operator must ensure that the official number of the vessel is affixed to every longline buoy and float. In the western Pacific crustacean fisheries (Permit Area 1, Northwestern Hawaiian Islands) each trap and float must be marked with the vessel's identification number. The marking of gear links fishing or other activity to the vessel, aids law enforcement, and is valuable in actions concerning the damage, loss of gear, and civil proceedings.

Proposed Information Collection; Comment Request; Alaska License Limitation Program for Groundfish, Crab, and Scallops

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

SUPPLEMENTARY INFORMATION:**I. Abstract**

Any person who wishes to deploy a harvesting vessel in the license limitation program (LLP) king and Tanner crab fisheries in the Bering Sea/ Aleutian Islands (BSAI), in the LLP groundfish fisheries in the Gulf of Alaska (GOA) or the BSAI, or in the Scallop LLP scallop fisheries off the coast of Alaska must hold a valid LLP groundfish, LLP crab license, or LLP scallop license, respectively. Further, an original license must name a vessel and be on board that vessel when it is engaged in such fishing. Applications for permits were a one-time process. An

LLP application originally was used to determine owners of vessels who were qualified to obtain an LLP license, and no new LLP permits may be issued except under very specific conditions. The permits have no expiration date, but are transferable. This collection now supports LLP transfer activities for crab, scallops, and groundfish, and any appeals resulting from denied actions.

By providing stability in the industry and identifying the field of participants in the groundfish, crab, and scallops fisheries, LLP is an interim step toward a more comprehensive solution to the conservation and management problems of an open access fishery. The LLP restricts access to the commercial groundfish fisheries in the EEZ off Alaska except for certain areas where alternative programs exist. The LLP also restricts access to the commercial crab fisheries for the BSAI and access to the commercial scallop fisheries off Alaska.

II. Method of Collection

Transfer requests may be submitted by FAX or as paper submissions. Appeals may be submitted by mail as paper submissions.
