SUPPLEMENTARY INFORMATION:

Background

The Help America Vote Act (HAVA) of 2002 (Pub. L. 107-252) was signed into law by President Bush on October 29, 2002. Section 231 of the HAVA requires the Director of NIST to provide for the accreditation of laboratories that conduct testing on the hardware and software of voting systems. In response to the HAVA, the National Voluntary Laboratory Accreditation Program (NVLAP) is establishing a program for laboratories that test voting systems.

NVLAP accreditation criteria is established in accordance with the Code of Federal Regulations (CFR, Title 15, Part 285), NVLAP Procedures and General Requirements. Laboratories conducting this testing will be required to meet ISO/IEC International Standard 17025, General requirements for the competence of testing and calibration laboratories, the 2002 Voting System Standards, and any other criteria deemed necessary by the U.S. Election Assistance Commission (EAC). For each new laboratory accreditation program (LAP), NVLAP works with the affected testing community to develop program-specific technical requirements. These requirements tailor the general accreditation criteria referenced in Sections 4 and 5 of NIST Handbook 150 to the tests and services in the new LAP. Program-specific requirements include the details of the Scope of Accreditation, test and measurement equipment, personnel requirements, validation of test methods, and reporting of test results.

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Extension of Approval of Information Collection Requirements—Testing and Recordkeeping Requirements Under the Standard for the Flammability of Mattresses and Mattress Pads

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In the May 14, 2004, **Federal Register** (69 FR 26809), the Consumer Product Safety Commission published a notice in accordance with provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35) to announce the agency's intention to seek an extension of approval of information collection requirements in the Standard for the Flammability of Mattresses and Mattress Pads. 16 CFR Part 1632.

The Commission now announces that it has submitted to the Office of Management and Budget a request for extension of approval of that collection of information.

The standard is intended to reduce unreasonable risks of burn injuries and deaths from fires associated with mattresses and mattress pads. The standard prescribes a test to assure that a mattress or mattress pad will resist ignition from a smoldering cigarette. The standard requires manufacturers to perform prototype tests of each

combination of materials and construction methods used to produce mattresses or mattress pads and to obtain acceptable results from such testing. Sale or distribution of mattresses without successful completion of the testing required by the standard violates section 3 of the Flammable Fabrics Act. 15 U.S.C. 1192. An enforcement rule implementing the standard requires manufacturers to maintain records of testing performed in accordance with the standard and other information about the mattress or mattress pads which they produce.

Additional Information About the Request for Extension of Approval of Information Collection Requirements

Agency address: Consumer Product Safety Commission, Washington, DC 20207.

Title of information collection: Testing and Recordkeeping Requirements Under the Standard for the Flammability of Mattresses and Mattress Pads, 16 CFR Part 1632.

Type of request: Extension of approval.

Frequency of collection: Varies, depending upon the number of individual combinations of materials and methods of construction used to produce mattresses.

General description of respondents: Manufacturers and importers of mattresses and mattress pads.

Estimated Number of respondents: 751.

Estimated number of hours for all respondents: 19,526 per year.

Estimated cost of collection for all respondents: \$477,996.
