The Notice of Proposed Rulemaking (NPRM) contains proposed information collections subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–3. It will be submitted to the Office of Management and Budget (OMB) for review under the PRA. OMB, the general public, and other Federal agencies are invited to comment on the proposed information collections contained in this proceeding.

Background

In the NPRM, the Commission proposes to eliminate paper filings and require applicants to file electronically all applications and other filings related to international telecommunications services via the International Bureau Filing System (IBFS). Specifically, the Commission proposes to accept only electronically filed accounting rate changes, requests for assignment of a data network identification code, foreign carrier notifications, applications related to International Section 214 authorizations, applications related to submarine cable landing licenses, requests for recognized operating agency status, requests for assignment of an international signaling point code, and other associated filings.

The NPRM describes the benefits of electronic filing. The Commission concludes that mandatory electronic filing will further the Commission's goals to increase the efficiency of application processing and to expedite the availability of the application information for public use and inspection. Also, the Commission concludes that electronic filing would not impose any undue burdens on parties. The Commission seeks comment on these tentative conclusions and its proposal to mandate electronic

filing for all international filings described in the NPRM.

The NPRM describes the variety of applications and reports that applicants and authorized carriers must file with the Commission in connection with international telecommunications services. The NPRM contains a list of those filings for which mandatory electronic submission will be required through IBFS. In addition, the NPRM contains a list of filings that currently are not available for electronic submission. As a practical matter, the Commission cannot require mandatory electronic filing for any type of service until an IBFS electronic filing for is available, however the Commission is developing electronic forms for these submissions. The Commission seeks comments on making mandatory the electronic filing of those submissions currently processed manually.

The NPRM proposes to continue the Commission's policies for the confidential treatment of certain materials. Currently, IBFS does not accommodate confidential filings, but the Commission intends to develop the capability of IBFS to accommodate confidentially filed pleadings and applications. The NPRM seeks comment on this proposal.

The NPRM seeks comment on whether it would be necessary to implement a transition period to allow applicants and carriers to adjust to any changes to the rules. The NPRM proposes a 60-day transition period. The NPRM also proposes that, after the 60-day transition period, any filings received manually will be returned to the applicant or carrier without processing. The NPRM proposes to require mandatory electronic filing for those filings for which an IBFS form exists and will require additional filings to be made electronically as new IBFS forms are introduced. As each new IBFS form becomes available for electronic use, we propose to issue a public notice announcing the new electronic features.

Finally, the NPRM seeks comment on whether we should adopt a waiver process to allow an applicant to request a waiver of the proposed mandatory electronic filing requirements.

Procedural Matters

Initial Paperwork Reduction Act Analysis

This document contains proposed information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on the information

collection requirements contained in this document, as required by the Paperwork Reduction Act (PRA) of 1995, Public Law 104–13. Public and agency comments are due on or before October 8, 2004. Comments should address: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4), we seek specific comment on how we might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

New Internet filing forms will allow all interested persons to file electronically via the International Bureau Filing System (IBFS).

Initial Regulatory Flexibility Certification

The Regulatory Flexibility Act of 1980, as amended (RFA) requires that a Regulatory Flexibility Act analysis be prepared for notice-and-comment rule making proceedings, unless the agency certifies that “the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.” See 5 U.S.C. 601–602, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Public Law No. 104–121, Title II, 110 Stat. 857 (1996). The RFA generally defines the term “small entity” as having the same meaning as the terms “small business,” “small organization,” and “small governmental jurisdiction.” In addition, the term “small business” has the same meaning as the term “small business concern” under the Small Business Act. A “small business concern” is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA). See 5 U.S.C. 601(3) (incorporating by reference the definition of “small-business concern” in the Small Business Act, 15 U.S.C. 632). Pursuant to 5 U.S.C. 601(3), the statutory definition of a small business applies “unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such terms which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**.”

In this International E-Filing NPRM, the Commission seeks comment on possible changes to its rules to require mandatory electronic filing for international telecommunications services. As discussed above, the Commission has continued to make technological advancements in the area of electronic filing. In this proceeding we have sought to further streamline the filing processes.

The rule changes discussed in the International E-Filing NPRM, if adopted, would require the mandatory electronic filing for applications and reports associated with international telecommunications services. The proposal in the International E-Filing NPRM seeks comment on these proposed changes. We believe that the proposals are in the public interest and would not impose undue burdens on all carriers required to file for international telecommunications services pursuant

to our rules, including those carriers that are small entities. Further, any burdens caused by implementation of these proposals might be offset by the fact that services to the public would likely be expedited. Therefore, we certify that the proposals in this International E-Filing NPRM, if adopted, would not have a significant economic impact on a substantial number of entities. The Commission will send a copy of the International E-Filing NPRM, including this initial certification, to the Chief Counsel for Advocacy of the Small Business Administration. In addition, the International E-Filing NPRM (or summary) and initial certification will be published in the **Federal Register**.
