

would allow these exemptions for two commercial vessels for 54 sea sampling days. All experimental work would be monitored by University of Massachusetts, Dartmouth, School for Marine Science and Technology (SMAST) personnel. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

SUPPLEMENTARY INFORMATION: An application for an EFP was submitted by SMAST on August 23, 2004. The EFP would exempt two federally permitted commercial fishing vessels from the following requirements in the NE Multispecies FMP: NE multispecies GB regulated mesh area minimum mesh size and gear requirements specified at § 648.80(a)(4) to allow them to use a codend modified with a horizontal net panel (the experimental haddock separator panel) and a small mesh cover for quantifying catch composition; the NE multispecies closed area restrictions specified at § 648.81(a) to allow them temporary access to Closed Area I for the purposes of conducting this study; and the NE multispecies minimum fish size requirements specified at § 648.83(a) to allow them to temporarily retain sub-legal sized fish for measurement.

The goal of this study is to assess the selectivity of a bycatch reduction device in the NE groundfish fishery. Three factors would be examined in this study: (1) Net selectivity—examination of catch composition of the experimental and control nets; (2) trawl

duration—tow duration would be modified to test catch rates based on tow durations of one hour, two hours, and three hours; and (3) seasonal variation—the study would be conducted during fall, winter, and spring, to determine if there are any seasonal differences in catch or fish behavior. The specific trawl design to be tested is referred to as a haddock separator trawl. The separation panel and 2-inch (5.08-cm) mesh cover would be sewn into the extension and codend of a conventional trawl net designed with 6.0-inch (15.24-cm) mesh in the fishing circle and 6.5-inch (16.5-cm) mesh in the codend. The codend would be further modified to create an upper and lower codend.

The study would begin in October and continue through July 31, 2005. During the study, the vessels would perform side-by-side tows. The number of tows would average approximately 8.3 per day. There would be 18 sea sampling days per season, over three seasons (fall, winter, and spring), for a total of 54 sea sampling days (not including steaming time). There would be 150 side-by-side tows per season, for a total of 450 tows per vessel. The tow durations would be one, two, and three hours, with 50 side-by-side tows of each duration per season. The vessels would fish in GB Closed Area I and the offshore fishing grounds represented by 30-minute squares 79, 80, 81, 96, 97, 98, 111, 112, and 113. All fish retained by the upper and lower codends would be counted, weighed, and measured. All legal catch would be landed and sold, consistent with the current daily and trip possession and landing limits. Current regulations restrict vessels fishing on GB to landing no more than 1,000 lb (454 kg) of cod per DAS, up to a maximum of 10,000 lb (4,536 kg) per trip, and no more than 3,000 lb (1,361 kg) of haddock per DAS, up to a maximum of 30,000 lb (13,608 kg) per trip from May 1 to September 30, and no more than 5,000 lb (2,268 kg), up to a maximum of 50,000 lb (22,680 kg) per trip from October 1 to April 30. Undersized fish would be returned to the sea as quickly as possible after measurement. The participating vessels would be required to report all landings in their Vessel Trip Reports.

The target fishery is the groundfish mixed-species fishery. The target species are haddock and cod. The applicant estimates the total amount of the main species that would be expected to be caught under this EFP are: 426,000 lb (193,230 kg) of haddock; 75,240 lb (34,128 kg) of Atlantic cod; and 11,340 lb (5,144 kg) of American plaice. Other commercially important fish commonly

found in the groundfish mixed-species fishery are expected to be caught incidentally. The incidental catch is expected to be comprised of skates, monkfish, witch flounder, winter flounder, spiny dogfish, and pollock.

The applicant is preparing an Environmental Assessment (EA) that will analyze the impacts of the proposed experimental fishery on the human environment. This EA will examine whether the proposed activities are consistent with the goals and objectives of the FMP, whether they would be detrimental to the well-being of any stocks of fish harvested, and whether they would have any significant environmental impacts. The EA will also examine whether the proposed experimental fishery would be detrimental to essential fish habitat, marine mammals, or protected species.

DEPARTMENT OF DEFENSE

Office of the Secretary

Nationwide TRICARE Demonstration Project

AGENCY: Office of the Secretary of Defense for Health Affairs/TRICARE Management Activity, DoD.

ACTION: Notice extending deadline for demonstration project.

SUMMARY: On Monday, November 5, 2001, the Department of Defense (DoD) published a notice of a nationwide TRICARE demonstration project (66 FR 55928-55930). On Wednesday, November 12, 2003, the DoD published a notice (68 FR 64087) to extend through October 31, 2004, the demonstration project scheduled to end on November 1, 2003. This notice is to advise interested parties of the continuation of the demonstration project in which the DoD Military Health System addresses unreasonable impediments to the continuity of health care encountered by certain family members of Reservists and National Guardsmen called to active duty in support of a federal/contingency operation. The demonstration previously scheduled to end on October 31, 2004, is now extended through October 31, 2005.

FOR FURTHER INFORMATION CONTACT: The Office of the Assistant Secretary of Defense for Health Affairs, TRICARE Management Activity, TRICARE Operations Directorate at (703) 681-0039.

SUPPLEMENTARY INFORMATION: The continued deployment of about 160,000 troops in support of Noble Eagle/Operation Enduring Freedom and Operation Iraqi Freedom in FY 2004 and FY 2005 warrants the continuation of the demonstration to support the health care needs and morale of family members of activated Reservists and Guardsmen. The impact if the demonstration is not extended includes higher out-of-pocket costs and potential inability to continue to use the same provider for ongoing care. There are three separate components to the demonstration. First, those who participate in TRICARE Standard will not be responsible for paying the TRICARE Standard deductible. By law, the TRICARE Standard deductible for active duty family members in \$150 per individual, \$300 per family (\$50/\$150 for E4s and below). The second component extends TRICARE payments up to 115 percent of the TRICARE maximum allowable charge, less the applicable patient copayment, for care

received from a provider that does not participate (accept assignment) under TRICARE to the extent necessary to ensure timely access to care and clinically appropriate continuity of care. The third component is waiver of the non-availability statement requirement for non-emergency inpatient care. Information and experience gained as part of this demonstration project will provide the foundation for longer-term solutions in the event of future national emergencies. This demonstration project is being conducted under the authority of 10 U.S.C. 1092.

Dated: September 28, 2004.
