

(1) An orderly, on-the-ground, scientific inventory of soil resources according to their potentialities and problems of use; and

(2) Information about each kind of soil in sufficient detail to meet all reasonable needs of farmers, agricultural technicians, community planners, engineers, and scientists in planning and transferring the findings of research and experience to specific land areas.

§ 611.2 Cooperative relationships.

(a) Soil surveys on nonfederal lands are carried out cooperatively with State agricultural experiment stations and other State agencies. The cooperative effort is evidenced in a memorandum of understanding setting forth guidelines for actions to be taken by each cooperating party in the performance of soil surveys. Similar cooperative arrangements exist between NRCS and other Federal agencies for soil surveys on Federal lands.

(b) Arrangements for nonfederal financial participation in the cost of soil surveys may be made with States, counties, soil conservation districts, planning agencies, and other local groups.

Subpart B—Soil Survey Operations

§ 611.10 Standards, guidelines, and plans.

(a) NRCS conducts soil surveys under national standards and guidelines for naming, classifying, and interpreting soils and for disseminating soil survey information.

(b) A soil survey Memorandum of Understanding (MOU) is prepared prior to the start of each soil survey project, or a work plan is prepared for soil survey maintenance activities. These documents provide specific details and technical specifications to support the interpretive and data needs of the area to be surveyed. The MOU is signed by representatives of NRCS, land grant universities, and in some States representatives of other State agencies. Federal land administering agencies also sign the MOU if federal lands are included in the survey.

§ 611.11 Soil survey information.

(a) *Availability.* NRCS disseminates soil survey information to the public by any of the means described in paragraph (d) of this section. NRCS makes soil survey information available as soon as is practicable following field work or other soil survey activity that provides new soil survey information.

(b) *Content.* Soil survey information conforms with standards and meets the needs identified in the soil survey MOU or work plan as described in § 611.10 of

this part. Soil survey information includes: (1) Soil maps that delineate the location and extent of various soil areas;

(2) Soil characteristics for each of the soil areas shown on soil maps;

(3) Interpretations of the soil characteristics; and

(4) Information about the source, version, and applicability or limitations associated with the soil survey information.

(c) *Maintenance.* Soil survey information is reviewed on a periodic basis to ensure that the information continues to meet evolving needs.

(d) *Distribution.* Soil survey information is disseminated to the public through electronically accessible maps and reports, electronic access to data files, or printed documents. To the extent practicable, as limited by commonly accepted technology, soil survey information is disseminated in electronic form.

(e) *Resource conservation plan data.* Information prepared specifically for use in developing resource conservation plans for soil conservation district cooperators is considered confidential. Soil maps and interpretations prepared for this use will not be made available to others without the consent of the landowner as well as the district governing body. However, soil survey information from which the conservation plan was developed may be disseminated as described in paragraph (a) of this section.

Subpart C—Cartographic Operations

§ 611.20 Function.

The NRCS National Cartography and Geospatial Center provides cartographic services needed to carry out NRCS functions. Cartographic services include general cartography, photogrammetry, aerial photography, planimetric and topographic mapping, drafting, and specialized types of reproduction.

§ 611.21 Availability of aerial photography.

The National Cartography and Geospatial Center obtains necessary clearance for all aerial photography for NRCS. New aerial photography of designated areas in the United States is obtained yearly by NRCS through competitive contracting. This photography is obtained only after it is determined that imagery of these areas available from other sources does not meet NRCS scale and quality requirements. Orders for reproductions of NRCS aerial photography are subject to the fee schedule cited in § 1.2(b) of this title. Order reproductions from the National Cartography and Geospatial

center: USDA—National Resources Conservation Service; P.O. Box 6567, FWFC—Bldg. 23; 501 W. Felix Street; Forth Worth, Texas 76115.

§ 611.22 Availability of satellite imagery.

Cloud-free maps of the United States based on imagery received from a satellite are prepared and released to the public by NRCS. The maps offer the first image of the United States not obscured by clouds or distortions. Orders or requests for information should be directed to the National Cartography and Geospatial Center, USDA—Natural Resources Conservation Service; P.O. Box 6567, FWFC—Bldg. 23; 501 W. Felix Street; Forth Worth, Texas 76115. Orders are subject to the fee schedule cited in § 1.2(b) of this title.

Signed in Washington, DC on September 23, 2004.

Bruce I. Knight,

Chief, Natural Resources Conservation Service.

BILLING CODE 3410–16–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2004–18819; Airspace Docket No. 04–ACE–45]

Modification of Class D Airspace; and Modification of Class E Airspace; Grand Island, NE

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments, correction.

SUMMARY: This action corrects a direct final rule; request for comments that was published in the **Federal Register** on Wednesday, September 22, 2004, (69 FR 56690) [FR Doc. 04–21226]. It corrects an error in the legal description of the Class E airspace area extending upward from 700 feet above the surface at Grand Island, NE.

DATES: This direct final rule is effective on 0901 UTC, January 20, 2005.

FOR FURTHER INFORMATION CONTACT: Brenda Mumper, Air Traffic Division, Airspace Branch, ACE–520A, DOT Regional Headquarters Building, Federal Aviation Administration, 901 Locust Street, Kansas City, MO 64106; telephone: (816) 329–2524.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 04–21226, published on Wednesday, September

22, 2004, (69 FR 56690) modified the Class D airspace area, the Class E airspace area designated as a surface area, the Class E airspace area designated as an extension to the Class D airspace area and the Class E airspace area extending upward from 700 feet above the surface at Grand Island, NE. The modification corrected discrepancies in the Central Nebraska Regional Airport airport reference point used in the legal descriptions, redefined extensions to the airspace areas and brought the legal descriptions of the Grand Island, NE Class E airspace areas into compliance with FAA Orders 7400.2E, Procedures for Handling Airspace Matters, and 8260.19C, Flight Procedures and Airspace. However, the format of the legal description for the Class E airspace area extending upward from 700 feet above the surface was incorrect.

Accordingly, pursuant to authority delegated to me, the legal description of the Class E airspace area extending upward from 700 feet above the surface at Grand Island, NE, as published in the **Federal Register** on Wednesday, September 22, 2004, (69 FR 56690) [FR Doc. 04-21226] is corrected as follows:

§ 71.1 [Corrected]

■ On page 56692, Column 2, third paragraph, fifth and sixth lines, delete "Grand Island VORTAC (lat. 40°59'03" N., long. 98°18'53" W.)." In the last line of the same paragraph, change "Central Nebraska Regional" to read "Central Nebraska Regional Airport".

Issued in Kansas City, MO, on September 29, 2004

Paul J. Sheridan,

Manager, Air Traffic Division, Central Region.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2004-18825; Airspace Docket No. 04-ACE-51]

Modification of Class E Airspace; Harrisonville, MO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments.

SUMMARY: This action amends Title 14 Code of Federal Regulations, part 71 (14 CFR 71) by revising Class E airspace at Harrisonville, MO. A review of controlled airspace for Harrisonville,

MO revealed it does not reflect the current Lawrence Smith Memorial Airport airport reference point (ARP) and is not in compliance with established airspace criteria. The airspace area is modified and enlarged to conform to the criteria in FAA Orders.

DATES: This direct final rule effective on 0901 UTC, January 20, 2005. Comments for inclusion in the Rules Docket must be received on or before November 8, 2004.

ADDRESSES: Send comments on this proposal to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590-0001. You must identify the docket number FAA-2004-18825/Airspace Docket No. 04-ACE-51, at the beginning of your comments. You may also submit comments on the Internet at <http://dms.dot.gov>.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone 1-800-647-5527) is on the plaza level of the Department of Transportation NASSIF Building at the above address.

FOR FURTHER INFORMATION CONTACT: Brenda Mumper, Air Traffic Division, Airspace Branch, ACE-520A, DOT Regional Headquarters Building, Federal Aviation Administration, 901 Locust, Kansas City, MO 64106; telephone: (816) 329-2524.

SUPPLEMENTARY INFORMATION: This amendment to 14 CFR part 71 modifies the Class E airspace area extending upward from 700 feet above the surface at Harrisonville, MO. An examination of controlled airspace for Harrisonville, MO revealed that the Lawrence Smith Memorial Airport ARP used in the legal description for this Class E airspace area is incorrect, the legal description is not in proper format and the area does not comply with airspace requirements for diverse departures as set forth in FAA Order 7400.2E, Procedures for Handling Airspace Matters. The criteria in FAA Order 7400.2E for an aircraft to reach 1200 feet AGL, taking into consideration rising terrain, is based on a standard climb gradient of 200 feet per mile plus the distance from the airport reference point to the end of the outermost runway. Any fractional part of a mile is converted to the next higher tenth of a mile. This action expands the Harrisonville, MO Class E airspace area extending upward from 700 feet above

the surface from a 6.4-mile radius to a 6.9-mile radius of Lawrence Smith Memorial Airport, corrects the ARP in the legal description, corrects the legal description format by adding the city name to the airport line and brings the legal description of the Harrisonville, MO Class E airspace area into compliance with FAA Order 7400.2E. This area will be depicted on appropriate aeronautical charts. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9M, Airspace Designations and Reporting Points, dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Direct Final Rule Procedure

The FAA anticipates that this regulation will not result in adverse or negative comment and, therefore, is issuing it as a direct final rule. Previous actions of this nature have not been controversial and have not resulted in adverse comments or objections. Unless a written adverse or negative comment, or a written notice of intent to submit an adverse or negative comment is received within the comment period, the regulation will become effective on the date specified above. After the close of the comment period, the FAA will publish a document in the **Federal Register** indicating that no adverse or negative comments were received and confirming the date on which the final rule will become effective. If the FAA does receive, within the comment period, an adverse or negative comment, or written notice of intent to submit such a comment, a document withdrawing the direct final rule will be published in the **Federal Register**, and a notice of proposed rulemaking may be published with a new comment period.

Comments Invited

Interested parties are invited to participate in this rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above.
