

results of antidumping duty changed circumstances review, in accordance with 19 CFR 351.221(b)(4) and 19 CFR 351.221(c)(3)(I). This notice will set forth the factual and legal conclusions upon which our preliminary results are based and a description of any action proposed based on those results. Pursuant to 19 CFR 351.221(b)(4)(ii), interested parties will have an opportunity to comment on the preliminary results of review. In accordance with 19 CFR 351.216(e), the Department will issue the final results of its antidumping duty changed circumstances review not later than 270 days after the date on which the review is initiated.

During the course of this antidumping duty changed circumstances review, we will not change the cash deposit requirements for the merchandise subject to review. The cash deposit will only be altered, if warranted, pursuant to the final results of this review.

This notice of initiation is in accordance with section 751(b)(1) of the Act and 19 CFR 351.216 and 351.222.

Dated: October 12, 2004.

James J. Jochum,

Assistant Secretary for Import Administration.

Low Enriched Uranium From France, Germany, the Netherlands, and the United Kingdom: Extension of Time Limit for Preliminary Results of Countervailing Duty Administrative Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Extension of Time Limit for Preliminary Results of Countervailing Duty Administrative Reviews.

DATES: Effective October 19, 2004.

FOR FURTHER INFORMATION CONTACT:

Kristen Johnson, AD/CVD Operations, Office III, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-4793.

Statutory Time Limits

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department of Commerce (Department) to make a preliminary determination within 245 days after the last day of the anniversary month of an order/finding for which a review is requested and a final determination within 120 days after the date on which the preliminary determination is published. However, if it is not practicable to complete the review within the time period, section 751(a)(3)(A) of the Act allows the Department to extend these deadlines to a maximum of 365 days and 180 days, respectively.

Background

On March 26, 2004, the Department initiated administrative reviews of the countervailing duty orders on low enriched uranium from France, Germany, the Netherlands, and the United Kingdom, covering the period of review January 1, 2003 through December 31, 2003. *See* 69 FR 15788. The preliminary results are currently due no later than October 31, 2004.

Extension of Time Limit for Preliminary Results of Reviews

We determine that these reviews are extraordinarily complicated because there are a large number of complex issues to be considered and analyzed by the Department, along with numerous programs and changes to certain programs previously found countervailable. In order to complete our analysis, we require additional and/or clarifying information. As a result, it is not practicable to complete the preliminary results of these reviews within the original time limits. Therefore, the Department is extending the time limits for completion of the preliminary results until no later than February 28, 2005. This date constitutes a 120-day extension for the administrative reviews of low enriched uranium from France, Germany, the Netherlands, and the United Kingdom.

This extension is in accordance with section 751(a)(3)(A) of the Act.

Dated: October 14, 2004.

Jeffrey A. May,

Deputy Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE

Technology Administration

National Medal of Technology Nomination Evaluation Committee; Notice of Determination for Closure of Meeting

The National Medal of Technology Nomination Evaluation Committee has scheduled a meeting for November 30, 2004.

The Committee was established to assist the Department in executing its responsibilities under 15 U.S.C. 3711. Under this provision, the Secretary of Commerce is responsible for recommending to the President prospective recipients of the National Medal of Technology. The committee's recommendations are made after reviewing all nominations received in response to a public solicitation. The Committee is chartered to have twelve members.

TIME AND PLACE: The meeting will begin at 10 a.m. and end at 4 p.m. on November 30, 2004. The meeting will be held in Room 4813 at the U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230. For further information contact: Mildred S. Porter, Director National Medal of Technology, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Herbert C. Hoover Building, Room 4843, Washington, DC 20230, Phone: 202/482-5572.

If a member of the public would like to submit written comments concerning the committee's affairs at any time before and after the meeting, written comments should be addressed to the Director of the National Medal of Technology as indicated above.

SUPPLEMENTARY INFORMATION: The meeting will be closed to discuss the relative merits of persons and companies nominated for the Medal. Public disclosure of this information would be likely to significantly frustrate implementation of the National Medal of Technology program because premature publicity about candidates under consideration for the Medal, who may or may not ultimately receive the award, would be likely to discourage nominations for the Medal.

Accordingly, I find and determine, pursuant to section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. app. 2, as amended, that the November 30, 2004, meeting may be closed to the public in accordance with section 552b (c) (9) (B) of title 5, United States Code because revealing information about Medal candidates would be likely to

significantly frustrate implementation of a proposed agency Action.

Due to closure of the meeting, copies of the minutes of the meeting will not be available, however a copy of the Notice of Determination will be available for public inspection and copying in the office of Mildred Porter, Director, National Medal of Technology, 1401 Constitution Avenue, NW., Herbert Hoover Building, Room 4843, Washington, DC 20230, Phone: 202/482-5572.

Dated: October 12, 2004.

Phillip J. Bond,

Under Secretary of Commerce for Technology.

BILLING CODE 3510-18-P

DEPARTMENT OF DEFENSE

Department of the Navy

Record of Decision for Purchase of Land in Hancock County, MS for a Naval Special Operations Forces Riverine and Jungle Training Range

AGENCY: Department of the Navy, DoD.

ACTION: Notice of record of decision.

SUMMARY: The Department of the Navy announces its decision to purchase approximately 5,200 acres of privately owned property in the northwestern acoustic buffer of the John C. Stennis Space Center in Hancock County, MS to establish a Naval Special Operations Forces Riverine and Jungle Training Range.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Davis, P.E. (Code ES12/RD), Southern Division Naval Facilities Engineering Command, P.O. Box 190010, North Charleston, SC 29419-9010; phone (843) 820-5589; facsimile (843) 820-7472; or e-mail: richard.a.davis1@navy.mil.

SUPPLEMENTARY INFORMATION: Pursuant to Section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969, 42 U.S.C. 4321 *et seq.*; Council on Environmental Quality regulations (40 CFR Parts 1500-1508); and Department of the Navy regulations (32 CFR 775), the Department of the Navy (Navy) announces its decision to purchase approximately 5,200 acres of privately owned property in the northwestern acoustic buffer of the John C. Stennis Space Center (SSC) in Hancock County, MS to establish a Naval Special Operations Forces (SOF) riverine and jungle training range. This decision implements Basic Training Alternative C, the preferred type and tempo of training alternative at Alternative Range

Location 3, as described in the Final Environmental Impact Statement (EIS). The range will provide Naval SOF with reliable and priority access to a local training range characterized by a permanent riverine and jungle environment and where live combat exercises using Short Range Training Ammunition (SRTA) can be conducted.

Background and Issues: Naval SOF have conducted riverine and jungle training along the lower Pearl River and its tributaries within the boundaries of the SSC since the late 1990's. Current training operations consist of transitory events, including riverine patrol and interdiction, insertion and extraction in the riverine and jungle environment, inland reconnaissance and surveillance operations, craft concealment and evasion tactics and surveillance of rivers and waterways. Only blank-fire is authorized during these training activities.

The timely development of SRTA has made it possible to consider the use of SRTA-fire in specific existing training areas where all previous weapons training has been limited to blank-fire. This training improvement allows Naval SOF to understand the dynamics of firing live ammunition, such as the dynamics of randomly-fired projectiles leaving the weapon, the reaction (ricochet) of ammunition hitting objects, and a demonstration of techniques that avoid friendly-fire incidents during combat. SRTA-fire is safer for use during training and SRTA-fire is safer potentially on the environment.

The purpose of the proposed action is to significantly improve existing Naval SOF riverine and jungle training available at SSC by establishing a training range where Naval SOF have priority access to conduct live combat exercises using SRTA. The proposed range will meet the needs of Naval SOF for comprehensive, systematic, and progressive jungle and riverine training under realistic combat conditions. As a result, the readiness of Naval SOF to support national defense objectives will be increased and the potential for combat casualties reduced.

The proposed property acquisition will be completed as quickly as practicable, consistent with Congressional appropriations and final assessments and negotiations with property owners. Military use of the property will continue by permission of existing property owners, but will be expanded consistent with the Final EIS and this Record of Decision to include SRTA and increased operational tempo only after all of the necessary parcels are purchased.

Alternatives Considered: In identifying a reasonable range of alternatives that will satisfy the Navy's purpose and need, Naval Special Warfare Command (NAVSPECWARCOM) initially evaluated the feasibility of training at existing military and Federal installations within the southeast United States where NAVSPECWARCOM units had previously conducted (or had submitted a request to conduct) riverine training, as well as locations known to have specifically developed a riverine training capability, including: Fort Knox, KY; Eglin Air Force Base (AFB), FL; Camp Lejeune, NC; and SSC, MS. A screening analysis, based upon operational factors set out in the Final EIS was conducted to determine whether these potential range locations could be considered reasonable alternatives. Only the SSC area was found to be consistent with the operational screening factors and as a result, Fort Knox, Eglin AFB, and Camp Lejeune were eliminated from further evaluation.

Additional operational factors were applied to the analysis of alternative training range sites in the vicinity of SSC. These operational factors considered the extent to which realistic training scenarios could be conducted and the safety of Naval SOF personnel and the public. Of the five candidate ranges evaluated, only Alternative Range Location 3 was found to meet all identified operational factors.

In addition to the no action alternative, three operational alternatives (Basic Training Alternatives A, B, and C) were analyzed in detail, in the Final EIS. The basic training alternatives are differentiated by training type and tempo. However, all of the alternatives would involve 36 weeks per year of training on the East Pearl River, an increase of 11 weeks per year compared to existing conditions. Even with implementation of any of the proposed alternatives, Naval SOF will continue to conduct necessary live-fire training at the Army ranges at Fort Knox, KY.

Basic Training Alternative A would allow Naval SOF to conduct basic training activities within the selected range location. This would include small arms training with SRTA and the use of High Mobility Multi-purpose Wheeled Vehicles (HMMWVs).

Basic Training Alternative B builds upon the activities identified for Basic Training Alternative A and would allow possible use of the range by other SOF elements such as Army SOF Surveillance and Reconnaissance
