

principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: American Petroleum Institute, Washington, DC. The nature and scope of API's standards development activities are: Development and maintenance of voluntary standards for the petroleum industry through committees charged with developing standards for (1) oilfield equipment and materials, (2) petroleum measurement, (3) refinery equipment, (4) marketing operations, (5) pipeline transportation, (6) fire and safety, (7) lubricants, and (8) business and information technology. More information regarding API standards development activities may be obtained from the API Web site at <http://www.api.org>, which includes contact information for API standards activities.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—American Society of Sanitary Engineering

Notice is hereby given that, on September 15, 2004, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the American Society of Sanitary Engineering ("ASSE") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) The name and principal place of business of the standards development organization and (2) The nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to Section 6(b) of the Act, the name and principal place of business of the standards development

organization is: American Society of Sanitary Engineering, Westlake, OH. The nature and scope of ASSE's standards development activities are: the creation, promotion and issuance of standards and seals of approval with respect to plumbing, water supply, sewage disposal, water purification, drainage, fire protection and medical gasses.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—ENrG/Corning Fuel Cell Research

Notice is hereby given that, on October 8, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), ENrG/Corning Fuel Cell Research ("ENrG") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identifies of the parties to the venture and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the identities of the parties to the venture are: Corning Incorporated, Corning, NY; and ENrG Incorporated, Buffalo, NY. The general areas of ENrG's planned activities are to develop and demonstrate scalable thin, large area planar solid oxide fuel cell (SOFC) and stack technology for enterprise-level primary and cogeneration distributed power that can cycle repeatedly and be more easily fabricated into 200kW power units.

Additional information concerning the venture can be obtained by contacting Joan Kane at Corning Incorporated, One Science Center Drive, Corning, NY 14831.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—International Air Transport Association

Notice is hereby given that, on September 20, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), International Air Transport Association ("IATA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and

principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: International Air Transport Association, Montreal, Quebec, CANADA. The nature and scope of IATA's standards development activities are: To develop, promulgate and publish voluntary consensus standards for international air transportation services provided by airlines and their agents and representatives to passengers, shippers and postal authorities. The IATA standards establish common practices and procedures, documentation and communication formats for the processing and handling of passengers, cargo and mail in the complex international air transportation environment. IATA's voluntary consensus standards are developed by IATA member airlines in consultation with other interested parties, including governments and intergovernmental organizations, whose expertise is sought as part of the standards development process.

Additional information concerning IATA can be obtained from Constance O'Keefe, Acting General Counsel of IATA, at (514) 874-0202.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—International Institute of Ammonia Refrigeration

Notice is hereby given that, on September 20, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), International Institute of Ammonia Refrigeration ("IIAR") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standard development organization and

(2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: International Institute of Ammonia Refrigeration, Arlington, VA. The nature and scope of IIAR's standards development activities are: To develop, plan, establish, coordinate and publish voluntary consensus standards applicable to the field of the design, construction, installation and use of ammonia mechanical refrigeration systems. Specifically, IIAR develops, plans, establishes, coordinates and publishes voluntary consensus standards in the form of industry standards, technical bulletins, and regulatory guidelines covering topics including equipment, design and installation of ammonia mechanical refrigeration systems; product integrity of ammonia refrigeration valves and strainers; training guidelines for operators of ammonia refrigerating systems; technical guidance addressing topics such as good practices, safety procedures and information, operating procedures, water contamination, and machinery room ventilation; and guidelines for compliance with regulatory requirements governing Process Safety Management and Risk Management.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—International Staple, Nail, and Tool Association

Notice is hereby given that, on September 8, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the International Staple, Nail, and Tool Association ("ISANTA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and

scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: International Staple, Nail, and Tool Association, La Grange, IL. The nature and scope of ISANTA's standards development activities are: To develop, plan, establish and coordinate voluntary consensus standards applicable to safety requirements for portable hand-held compressed air powered tools which drive fasteners such as nails and staples on a national level (American National Standards). Through its standards development activities, ISANTA seeks to establish safety requirements for the design, construction, use and maintenance of portable hand-held compressed air-powered tools to guard against the injury of tool users and bystanders in the workplace. ISANTA also provides guidelines to manufacturers, owners, employers (including self-employed contractors), supervisors, purchasers, operators and other persons concerned with or responsible for safety in the workplace and assists in the promulgation of appropriate safety directives and safety training programs.
