

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden for this collection of information is estimated to range between 265 hours and 609 hours per response. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities:

Companies that manufacture or import chemical substances, mixtures, or categories.

Estimated total number of potential respondents : 3,026.

Frequency of response: Once every four years.

Estimated total/average number of responses for each respondent: 8.9

Estimated total annual burden hours: 413,575 hours.

Estimated total annual burden costs : \$28,362,706.

IV. Are There Changes in the Estimates from the Last Approval?

There is essentially no change in the total estimated burden for this request compared with that identified in the information collection request most recently approved by OMB. The estimate for this request is 413,575 hours whereas the estimate in the existing request is 413,577 hours. This minuscule difference is probably due to rounding error or some other non-significant factor.

V. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
