AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction

SUMMARY: This document makes a correction to Airworthiness Directive (AD) 2005-12-20, which was published in the **Federal Register** on June 20, 2005 (70 FR 35370), and applies to certain The Lancair Company (Lancair) Model LC41-550FG airplanes. We incorrectly referenced the affected airplane model as LC41-550F in the applicability section. The correct airplane model is LC41-550FG. This action corrects the regulatory text.

DATES: The effective date of this AD remains June 21, 2005.

SUPPLEMENTARY INFORMATION:

Discussion

On June 10, 2005, FAA issued AD 2005-12-20, Amendment 39-14136 (70 FR 35370, June 20, 2005), which applies to certain The Lancair Company (Lancair) Model LC41-550FG airplanes.

We incorrectly referenced the affected airplane model as LC41-550F. The correct airplane model is LC41-550FG. This action corrects the regulatory text.

This AD requires both visual and dye penetrant inspections of the elevator torque tube assembly for cracks. If a crack is found, this AD requires replacement with a modified assembly that incorporates a steel doubler. This AD also requires replacement of the modified elevator torque tube assembly every 300 hours time-in-service or 18 months (whichever occurs first).

Need for the Correction

This correction is needed to ensure that the affected airplane model is correct and to eliminate misunderstanding in the field.

Correction of Publication

■ Accordingly, the publication of June 20, 2005 (70 FR 35370), of Amendment 39-14136; AD 2005-12-20, which was the subject of FR Doc. 05-11880, is corrected as follows:

§ 39.13 [Corrected]

On page 35371, in section 39.13 [Amended], in paragraph (c), replace Model LC41-550F with Model LC41-550FG.

Action is taken herein to correct this reference in AD 2005-12-20 and to add this AD correction to section 39.13 of the Federal Aviation Regulations (14 CFR 39.13).

The effective date remains June 21, 2005.

Issued in Kansas City, Missouri, on June 20, 2005.

Establish Class D Airspace; Front Range Airport, Denver, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule will establish Class D airspace at Front Range Airport, Denver, CO. An Airport Traffic Control Tower (ATCT) is being constructed at Front Range Airport, Denver, CO, which will meet criteria for Class D airspace. Class D airspace is required when the ATCT is open, and to contain and protect Standard Instrument Approach

Procedures (SIAPs) and other Instrument Flight Rules (IFR) operations at the airport. This action would establish Class D airspace extending upward from the surface to 8,000 feet Mean Sea Level (MSL) within a 5.1 nautical mile radius of the airport.

DATES: *Effective Date:* 0901 UTC, August 4, 2005.

SUPPLEMENTARY INFORMATION:

History

On March 11, 2005, the FAA proposed to amend Title 14 Code of Federal Regulations part 71 (CFR part 71) to establish Class D airspace at Front Range Airport, Denver, CO, (70 FR 12161). An Airport Traffic Control Tower (ATCT) is under construction at Front Range Airport, Denver CO, which will meet criteria for Class D airspace. The Class D airspace area will be effective during periods that the ATCT is open.

Interested parties were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. No comments were received. Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9M dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR part 71.1. The Class D airspace designation listed in this document will be published subsequently in that Order.

The Rule

This amendment to 14 CFR part 71 establishes Class D airspace at Front Range Airport, Denver CO. An Airport Traffic Control Tower (ATCT) is under construction at Front Range Airport, Denver, CO, which will meet criteria for Class D airspace.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air

traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Modification of Class E Airspace; Columbus, NE

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; confirmation of effective date.

SUMMARY: This document confirms the effective date of the direct final rule which revises Class E airspace at Columbus, NE.

SUPPLEMENTARY INFORMATION: The FAA published this direct final rule with a request for comments in the **Federal Register** on April 25, 2005 (70 FR 21144). The FAA uses the direct final rulemaking procedure for a non-controversial rule where the FAA believes that there will be no adverse public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on September 1, 2005. AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments.

SUMMARY: This action amends Title 14 Code of Federal Regulations, part 71 (14 CFR 71) by revising Class E airspace areas at Mc Cook, NE.
