

and minimize associated impacts on gag and other groupers: Secretarial Amendment 1 to the Reef Fish Fishery Management Plan of the Gulf of Mexico established a rebuilding plan and 6.56 million pounds of gutted weight allowable biological catch for red grouper. During 2003 and 2004, recreational red grouper landings exceeded the 1.25 million pounds gutted weight recreational allocation and during 2004, commercial fishing was closed on November 15 because the commercial quota was reached. In March 2005, the NMFS implemented an emergency rule to set trip limits but they will expire in February 2006 unless continued through this regulatory amendment. In July 2005, the NMFS implemented an interim rule to reduce the 2005 recreational red grouper harvest to levels in Secretarial Amendment 1 but they will expire in January 2006 unless continued through this regulatory amendment. The purpose of this regulatory amendment is to adjust regulatory management measures for the Gulf of Mexico red grouper fishery. New or adjusted management measures are needed if the Council intends to reduce the adverse socioeconomic effects of derby fishing in the commercial fishery, return recreational landings to levels specified in the red grouper rebuilding plan, and prevent or minimize impacts on gag and other groupers resulting from more restrictive recreational red grouper regulations.

A copy of the Amendment and related materials can be obtained by calling the Council office at (813) 348-1630.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
