

## Background

AMS received two petitions from the NWA requesting a revision to the United States Standards for Grades of Watermelons. In the first petition, the NWA requested that the USDA revise the standards by defining seedless watermelons as: "Seedless Watermelons" are watermelons which have 16 or less mature seeds, not to include pips/caplets, on the face of the melon which has been cut into four equal sections (one lengthwise cut and one crosswise cut). The petitioner also requested the size requirements be revised by adding an allowance for watermelons to vary 3 pounds above the stated average weight.

Prior to undertaking research and other work associated with a revision of the grade standards, AMS decided to seek public comments on the petition. A notice requesting comments on the petition to revise the United States Standards for Grades of Watermelons was published in the April 22, 2004, **Federal Register** (69 FR 21812).

In response to our request for comments, AMS received one comment from an industry group. The comment was in favor of the proposed revision of the standards.

On October 29, 2004, AMS published a notice in the **Federal Register** (69 FR 209) proposing to revise the standards based on the petitioner request to define seedless watermelons and add a variance to the size requirements.

A 60-day comment period was provided for interested parties to comment on the proposed changes to the standards.

In response to our request for comments, AMS received two comments on the proposed revision. One from an industry group representing receivers and one comment from a consumer. Both commenters supported the inclusion of a definition for seedless watermelons with a lower number of allowable seed count. The commenter representing receivers supported the inclusion of a 3 pound variance in the size requirements, while the other commenter supported a 1 pound variance. The comments are available by accessing AMS's Home Page on the Internet at: <http://www.ams.usda.gov/fv/fpbdoctlist.htm>.

After the comment period ended, AMS received a second petition from the NWA amending the seedless watermelon definition in their original petition. The amended petition is requesting that seedless watermelons be defined as: "Watermelons which have 10 or less mature seeds, not to include

pips/caplets, on the face of the melon which has been cut into four equal sections (one lengthwise cut and one crosswise cut)." NWA did not amend their petition in regard to the inclusion of a the 3 pound variance.

Based on the submitted information and comments received, AMS is proposing to revise the standards for watermelons following the standard format for U.S. Grade Standards. Specifically, the proposed revision will define seedless watermelons by including the following definition: "Seedless Watermelons" are watermelons which have 10 or less mature seeds, not to include pips/caplets, on the face of the melon which has been cut into four equal sections (one lengthwise cut and one crosswise cut).

AMS is also proposing to change the size requirements by adding an allowance for watermelons to vary 3 pounds above the stated average weight. As previously stated, one commenter recommended a 1 pound variance rather than 3 pound variance. However, AMS is proposing to change the size requirements by adding an allowance for watermelons to vary 3 pounds above average weight as the standard currently allows watermelons to vary 3 pounds below the stated weight, therefore the inclusion would be consistent within the standards.

This proposal will bring the standards for watermelons in line with current marketing practices, thereby, improving the usefulness of the standards in serving the industry. The official grade of a lot of watermelons covered by these standards will be determined by the procedures set forth in the Regulations Governing Inspection, Certification, and Standards of Fresh Fruits, Vegetables and Other Products (Sec. 51.1 to 51.61).

This notice provides for a 60-day comment period for interested parties to comment on changes to the standards.

### Carbon and Alloy Seamless Standard, Line, and Pressure Pipe (Under 4 ½ inches) from the Czech Republic, Japan, Romania, and South Africa; Final Results of the Expedited Sunset Reviews of the Antidumping Duty Orders

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**SUMMARY:** On May 2, 2005, the Department of Commerce (the Department) initiated sunset reviews of the antidumping duty orders on certain carbon and alloy seamless standard, line, and pressure pipe (under 4 ½ inches) (seamless pipe) from the Czech Republic, Japan, Romania, and South Africa pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). On the basis of a notice of intent to participate and adequate substantive responses filed on behalf of domestic interested parties and no response from respondent interested parties, the Department conducted expedited (120-day) sunset reviews. As a result of these sunset reviews, the Department finds that revocation of the antidumping duty orders would likely lead to the continuation or recurrence of dumping. The dumping margins are identified in the *Final Results of Review* section of this notice.

**EFFECTIVE DATE:** September 7, 2005.
