SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0750.

Title: 47 CFR 73.671, Educational and Informational Programming for Children; 47 CFR 73.673, Public Information Initiatives Regarding Educational and Informational Programming for Children.

Form Number: Not applicable.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 2,350.

Estimated Time per Response: 1-5 minutes.

Frequency of Response: Third party disclosure requirement.

Total Annual Burden: 438,920 hours.

Total Annual Cost: None.

Privacy Impact Assessment: No impact(s).

Needs and Uses: On September 9, 2004, the Commission adopted a *Report And Order (R&O) and Further Notice of Proposed Rule Making (FNPRM)*, In *The Matter of Children's Television Obligations of Digital Television Broadcasters*, FCC 04-221, MM Docket No. 00-167. 47 CFR 73.673 is amended to remove program identification requirements. New identification requirements are in section 73.671. Section 73.673 now states that each commercial television broadcast station licensee shall provide information identifying programming specifically designed to educate and inform children to publishers of program guides. Such information shall include an indication of the age group for this the program is intended. 47 CFR 73.671 states that each educational television broadcast station licensee has an obligation to serve, over

the term of its license, the Educational and Informational (E/I) needs of children ("Core Programming") through both the licensee's overall programming and programming specifically designed to serve such needs. In order for a program to be identified as a core educational program, the E/I symbol must be displayed throughout the program.

These changes are intended to provide greater clarity about broadcasters' obligations under the Children's Television Act (CTA) of 1990 which specified the airing of programs "specifically designed" to serve the educational and informational needs of children and to improve public access to information about the availability of these programs. These requirements will provide better information to the public about the shows broadcasters air to satisfy their obligation to provide educational and informational programming under the Children's Television Act of 1990.

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission

January 31, 2005.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of

information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before March 14, 2005. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments regarding this Paperwork Reduction Act submission to Judith B. Herman, Federal Communications Commission, Room 1-C804, 445 12th Street, SW., DC 20554 or via the Internet to Judith-B.Herman@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0370.

Title: Part 32—Uniform System of Accounts for Telecommunications Companies.

Form No: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local and tribal government.

Number of Respondents: 239.

Estimated Time Per Response: 1.07-104 hours.

Frequency of Response: On occasion reporting requirement and recordkeeping requirement.

Total Annual Burden: 1,516,702 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Needs and Uses: With this submission to OMB, the Commission is revising this information collection, and adopts the Joint Conference's recommendations to reinstate the following Part 32 Class A accounts: Account 5230, Directory revenue; Account 6621, Call completion services; Account 6622, Number services; Account 6623, Customer services; Account 6561, Depreciation expenses—telecommunications plant in service; Account 6562, Depreciation expenses—property held for future telecommunications use; Account 6563, Amortization expense—tangible; Account 6564, Amortization expense—intangible; Account 6565, Amortization expense—other. These accounting changes are mandatory only for Class A Incumbent Local Exchange Carriers (ILECs). The reinstatement of these accounts will impose a minor increase (7%) in burden on Class A ILECs only.

Additionally, the Commission establishes a requirement that Class A ILECs maintain subsidiary record categories for unbundled network element revenues, resale revenues, reciprocal compensation revenues, and other interconnection revenues in the accounts in which these revenues are currently recorded. The use of subsidiary record categories allows carriers to use whatever mechanisms they choose, including those currently in place, to identify the relevant amounts as long as the information can be made available to state and federal regulators upon request. The use of subsidiary record categories for interconnection revenue does not require massive changes to the ILECs' accounting system and is far less burdensome alternative than the creation of new accounts and/or subaccounts.

Title: Mitigation of Orbital Debris.

Form No: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 53.

Estimated Time Per Response: 3 hours.

Frequency of Response: On occasion and other one-time reporting requirements and third party disclosure requirement.

Total Annual Burden: 159 hours.

Total Annual Cost: \$74,200.

Privacy Act Impact Assessment: N/A.

Needs and Uses: The Second Report and Order in IB Docket No. 02-54, FCC 04-130, requires that a satellite system operator requesting FCC space station authorization, or an entity requesting a Commission ruling for access to a non-U.S.-licensed space station under the Commission's satellite market access procedures, must submit an orbital debris mitigation plan to the Commission regarding spacecraft design and operation as part of its request. For commercial operators, this requirement is added to the technical information that is already required under Section 25.114 of the Commission's rules in support of an application for space station authorization. For applications for authority for experimental and amateur space stations, information about the space station's orbital debris

mitigation plans is added to the information already required under Section 5.63 [experimental] and Section 97.202(g) [amateur] of the Commission's rules.

The Second Report and Order reduces information collection requirements for all licensees—including small businesses—by amending FCC rules to provide automatic authorization for certain satellite maneuvers, such as qualifying orbit-raising maneuvers or end-of-life disposal maneuvers that previously required licensees to apply for prior FCC authorization.

I. General Information

1. The Wireless Telecommunications Bureau ("Bureau") announces the auction of ten AMTS licenses. This auction is scheduled to commence on August 3, 2005 (Auction No. 61). AMTS is a specialized system of coast stations which provide integrated and interconnected marine voice and data communications, somewhat like a cellular phone system, for tugs, barges, and other vessels on waterways. Service to units on land is permitted, so long as marine-originating communications receive priority. In Auction No. 61, two 500-kilohertz blocks of paired spectrum in the 217/219 MHz band will be offered in each of ten AMTS Areas ("AMTSAs"), where available. A complete list of licenses available for Auction No. 61 follows.

Market No.	Description	License No.	Frequencies (MHz)	Channel block
AMTSA001	Northern Atlantic	PC-AMT001-A	217.5-218.0 / 219.5-220.0	A
AMTSA002	Mid-Atlantic	PC-AMT002-A	217.5-218.0 / 219.5-220.0	A
AMTSA003	Southern Atlantic	PC-AMT003-A	217.5-218.0 / 219.5-220.0	A
AMTSA004	Mississippi River	PC-AMT004-A	217.5-218.0 / 219.5-220.0	A
AMTSA005	Great Lakes	PC-AMT005-A	217.5-218.0 / 219.5-220.0	A
