

license, for a 20-year period, at the licensee's Lynchburg, Virginia facility. On June 30, 2004, BWXT requested that the NRC approve the renewal application. BWXT's request for the proposed change was previously noticed in the **Federal Register** on March 6, 2006 (71 FR 11231), with a notice of license amendment request and opportunity to request a hearing.

The staff has prepared the EA in support of the proposed action. The NRC staff concluded that the proposed renewal, for a 20-year period, of Materials License SNM-42 involving the continued operations at the BWXT site in Lynchburg will not result in a significant impact to the environment. The NRC staff concluded that the proposed action will not adversely affect federally listed species or federally designated critical habitat because no federally listed species are known to occur in the project area. The NRC staff found that no historic properties will be affected by the proposed action. The facility is already built, and no changes to the operations are associated with the action. The proposed action can be viewed as a continuation of impacts and can be evaluated based on the previous impacts from past operations.

Airborne effluents released through stacks and liquid effluents released in the James River are below regulatory limits for nonradiological and radiological contaminants. The radiological dose associated with the exposure to these effluents, for the maximally exposed individual is less than 1 percent of the NRC's 1.0 mSv [100 mrem] annual limit pursuant to 10 CFR 20.1301. Occupational doses are also well below regulatory limits.

The environmental impacts of the proposed action have been evaluated in accordance with the requirements presented in 10 CFR part 51. The NRC staff has determined that the renewal of license SNM-42, allowing continued operations at the BWXT facility for a 20-year period will not have a significant impact on the human environment. No environmental impact statement is required, and a finding of no significant impact is appropriate in accordance with 10 CFR 51.31.

III. Finding of No Significant Impact

On the basis of the EA, the NRC has concluded that there are no significant environmental impacts from the proposed action and has determined not to prepare an environmental impact statement.

1. Background Information

In accordance with section 2104 of the Trade Act of 2002 (Trade Act) (19 U.S.C. 3804), on March 8, 2006, the United States Trade Representative notified the Congress of the President's intent to initiate FTA negotiations with Malaysia. Also, the United States Trade Representative requested the U.S. International Trade Commission (ITC) to provide advice on probable economic effects of an FTA as soon as possible. USTR and ITC mutually agreed to delivery of the report by June 30. In addition, USTR published a notice in the **Federal Register** soliciting views from the public on the negotiations in general, and the TPSC will hold a public hearing on May 3, 2006. The United States intends to begin negotiations with Malaysia in June 2006.

2. Employment Impact Review

Section 2102(c)(5) of the Trade Act (19 U.S.C. 3802(c)(5)) directs the President to "review the impact of future trade agreements on United States employment, including labor markets, modeled after Executive Order 13141 to the extent appropriate in establishing procedures and criteria, report to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate on such review, and make that report available to the public." USTR and Labor will conduct the employment reviews through the TPSC.

The employment impact review will be based on the following elements, which are modeled to the extent

The review will be: (1) Written; (2) initiated through a notice in the **Federal Register** soliciting public comment and information on the employment impact of the FTA in the United States; (3) made available to the public in draft form for public comment, to the extent practicable; and (4) made available to the public in final form.

Comments may be submitted on potentially significant sectoral or regional employment impacts (both positive and negative) in the United States as well as other likely labor market impacts of the FTA. Persons submitting comments should provide as much detail as possible in support of their submissions.

3. Requirements for Submissions

To the extent possible, any attachments to the submission should be included in the same file as the submission itself, and not as separate files.
