

overall U.S. trend, and the population trend in any two adjacent sub-regions can not be declining significantly; and (4) all five listing factors are addressed.

The western DPS of Steller sea lion may be delisted when all of the following conditions have been met: (1) Counts of non-pups in the U.S. portion of the DPS have increased at an average annual rate of 3 percent for 30 years (i.e., 3 generations); (2) the population ecology and vital rates in the U.S. region are consistent with the observed trend; (3) the non-pup trends in at least 5 of the 7 sub-regions are consistent with the overall U.S. trend; the population trend in any two adjacent sub-regions can not be declining significantly, and the population trend in any single sub-region can not have declined by more than 50 percent; and (4) all five listing factors are addressed.

The eastern DPS of Steller sea lion may be delisted when all of the following have been met: (1) The population has increased at an average rate of 3 percent per year for 30 years (i.e., 3 generations); (2) the population ecology and vital rates are consistent with the observed trend; and (4) all five listing factors are addressed.

Time and cost for recovery actions are contained in the Plan. The recovery program for the western DPS will cost \$93,840,000 for the first 5 fiscal years and \$430,425,000 to full recovery assuming 30 years for recovery starting in 2000, and using year 5 costs as the cost for all future years. The recovery program for the eastern DPS will cost \$150,000 for the first year and \$1,050,000 total for 10 years of post-delisting monitoring.

In accordance with the 1994 peer review policy, NMFS solicited peer review on the draft Plan. Reviews were requested from 5 scientists and managers with expertise in recovery planning, statistical analyses, fisheries, and marine mammals. The reviews of the Plan were generally favorable. In particular, the reviewers found the recovery criteria to be well reasoned and supported. In response to reviewer's comments, changes were made to the plan to clarify the recovery criteria, add delisting criteria for the western DPS, and focus priorities and actions. NMFS anticipates that many of the recommendations made by the reviewers will be addressed in an implementation and research plan which NMFS intends to develop after the Plan is finalized. Reviewers' comments and NMFS' formal response to the comments will be provided in detail in the final recovery plan.

Public Comments Solicited

NMFS solicits written comments on the draft Revised Recovery Plan. All substantive comments received by the date specified above will be considered prior to final approval of the Plan. NMFS seeks comments particularly in the following areas: (1) The threats assessment; (2) the biological and threats criteria for removing the Steller sea lion from the Federal list of Endangered and Threatened Wildlife and Plants; (3) the recovery strategy and measures; and (4) estimates of time and cost to implement recovery actions.

Authority

The authority for this action is section 4(f) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*).

ACTION: Notice; correction.

SUMMARY: The Office of Oceanic and Atmospheric Research (OAR) published a notice in the **Federal Register** on April 10, 2006 announcing availability of funds to establish a Northern Gulf of Mexico (NGOM) Cooperative Institute (CI). That notice contained an error in the description of how proposals on cost-sharing would be evaluated. This notice corrects the error.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of April 10, 2006, in FR Volume 71, Number 68, on page 18084, the second sentence in the section on cost sharing requirements is

incorrect. The sentence, "There is no minimum cost sharing requirement, however, the amount of cost sharing will be considered in determining the level of CI commitment under NOAA's standard evaluation of project costs" is corrected to read, "There is no minimum cost sharing requirement; however, the amount of cost sharing will be considered when determining the level of the CI's commitment under NOAA's standard evaluation criterion for overall qualifications of applicants."

All other requirements and information listed in the original notice remains the same.
